Travel to Germany to participate in (ITER) Technical Meeting on Fueling and Pumping: Foreign trip report, January 18–February 2, 1994, 19:20458 (R;US)

Travel to Germany to participate in an overview of Global Analysis, Interpretation, and Modeling Task Force activities: Foreign trip report, March 14–19, 1994, 19:19550 (R;US)

Travel to Switzerland to participate in the Annual Congress of the European Association of Nuclear Medicine: Foreign trip report, September 9–October 30, 1993, 19:19781 (R;US)

Travel to the Netherlands for a meeting of the International Standards Organization Technical Committee 204 on transport information and control systems: Foreign trip report, January 22–29, 1994, 19:18959 (R;US)

Travel to the Netherlands for the International Energy Agency's Heat Pump Centre Promotion Task Force meeting: Foreign trip report, January 28–February 5, 1994, 19:18925 (R;US)

Uranium resources: Issues and facts, 19:18540 (R;US)

US-JAPAN Workshop on Plasma Profile Control for High Power Performance Operation and Non-inductive Current Drive: Foreign trip report, January 30–February 4, 1994, 19:20457 (R;US)

US-Japan Workshop on the Development of Millimeter- and Submillimeter-Wave Technology for Diagnostic Applications for Large Plasma Devices: Foreign trip report, March 10–16, 1994, 19:20566 (R;US)

Validation of multigroup neutron cross sections for the Advanced Neutron Source against the FOEHN critical experimental measurements, 19:18290 (R;US)

Validation procedures used in the Background Soil Characterization Project on the Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 19:19597 (R;US)
Verification of RELAP5 capabilities to simulate pressure wave propagation for instantaneous pipe breaks, 19:18640 (R;US)
Visit Germany in order to participate in the International Thermonuclear Experimental Reactor design activity: Foreign trip report, March 7–25, 1994, 19:20459 (R;US)

Oak Ridge National Lab., TN (United States). HAZWRAP Support Contractor Office
An assessment and evaluation for recycle/reuse of contaminated process and metallurgical equipment at the DOE Rocky Flats Plant Site – Building 865: Final report, 19:18023 (R;US)

Oak Ridge Y-12 Plant, TN (United States)
Consolidation of zircaloy-4 end crops by induction melting, 19:19056 (R;US)
Experience with performance based training of nuclear criticality safety engineers, 19:19246 (R;US)
Fabrication options for depleted uranium components in shielded containers, 19:19247 (R;US)
Federal and state regulatory requirements for the D&D of the Alpha-4 Building, Y-12 Plant, Oak Ridge, Tennessee, 19:18179 (R;US)
Testing of the Y-12 Plant Criticality Accident Alarm System detectors at the Sandia Pulsed Reactor Facility, 19:18811 (R;US)
Y-12 development organization technical progress report period ending December 1, 1993: Part 3, Metal processing, 19:17964 (R;US)
Y-12 development organization technical progress report period ending February 1, 1994: Part 7, Lithium and uranium chemical processing, 19:17965 (R;US)

OECD Nuclear Energy Agency, 75 - Paris (France)
WIMS-D/4: Multigroup Reactor Lattice Cell Calculation, 19:20538 (CM;GB)

Ohio Coal Development Office, Columbus, OH (United States)
Low temperature dry scrubbing reaction kinetics and mechanisms: Final report, September 1, 1992–November 30, 1993, 19:17857 (R;US)
Process configurations/modeling – Project 3.1: Final report, September 1, 1992–November 30, 1993, 19:17856 (R;US)
Recovery and recycling of limestone in LEC flue gas desulfurization: Final report, third year, 19:17855 (R;US)
Sorbent preparation/modification/additives: Final report, September 1, 1992–November 30, 1993, 19:17858 (R;US)

Ohio State Univ., Columbus, OH (United States). Dept. of Horticulture
Molecular characterization of the lignin-forming peroxidase: Role in growth, development and response to stress: Progress summary report, April 1, 1993–March 31, 1994, 19:18309 (R;US)

Ohio Univ., Athens, OH (United States). Dept. of Chemical Engineering
Process configurations/modeling – Project 3.1: Final report, September 1, 1992–November 30, 1993, 19:17856 (R;US)

Ohio Univ., Athens, OH (United States). Dept. of Physics and Astronomy
Theory of photon and electron induced reactions: Progress report, July 1, 1993–June 30, 1994, 19:20115 (R;US)

Oklahoma State Univ., Stillwater, OK (United States)
Synthesis of 6-Methyl-9-propyldibenzothiophene-4-ol amended to 9-isopropyl-6-methyldibenzothiophene-4-ol: Final technical report, July 25, 1991–January 25, 1993, 19:19133 (R;US)

Oklahoma State Univ., Stillwater, OK (United States). School of Chemical Engineering
Equilibrium and volumetric data and model development for coal fluids: [Quarterly] report, April 15, 1993–July 15, 1993, 19:19136 (R;US)
Equilibrium and volumetric data and model development for coal fluids: Final report, October 1, 1990–September 30, 1993, 19:17787 (R;US)

Oklahoma Univ., Norman, OK (United States)
A study of the thermodynamic properties of surfactant mixtures: Mixed micelle formation and mixed surfactant adsorption, 19:19129 (R;US)
An equilibrium model for ligand-modified micellar-enhanced ultrafiltration, selective separation of metal ions using iminoacetic substituted polyamines and a theoretical model for the titration behavior of polyamines, 19:19116 (R;US)
Solubilization of pentanol by cationic surfactants and binary mixtures of cationic surfactants, 19:18341 (R;US)
The use of micellar solutions for novel separation techniques, 19:19118 (R;US)
Use of ligand-modified micellar-enhanced ultrafiltration to selectively separate copper ions from wastewater streams, 19:19117 (R;US)

Oklahoma Univ., Norman, OK (United States). Dept. of Botany and Microbiology
Energetics and kinetics of anaerobic aromatic and fatty acid degradation: Progress report, November 1992–November 1993, 19:18308 (R;US)

Oklahoma Univ., Norman, OK (United States). School of Aerospace, Mechanical and Nuclear Engineering
Combustion of pulverized coal in vortex structures: Quarterly progress report No. 1, October 1, 1993–December 31, 1993, 19:17898 (R;US)

Oklahoma Univ., Norman, OK (United States). School of Petroleum and Geological Engineering
Characterization of non-Darcy multiphase flow in petroleum bearing formations: [Quarterly] report, January 1–March 30, 1993, 19:17910 (R;US)
Characterization of non-Darcy multiphase flow in petroleum bearing formations: Annual status report, May 14, 1991–May 13, 1992, 19:17911 (R;US)
Predictability of formation damage: An assessment study and generalized models: Final report, 19:17909 (R;US)

Optical Research Associates, Pasadena, CA (United States)
Final report: Optical design of 1.15:1 relay lens NAO=0.245, 19:19491 (R;US)

Oregon State Univ., Corvallis, OR (United States). Coll. of Oceanic and Atmospheric Sciences
Controls on marine carbon fluxes via phytoplankton-microzooplankton interactions in continental shelf waters: Progress report, 19:19653 (R;US)

Oregon State Univ., Corvallis, OR (United States). Dept. of Agricultural Chemistry
Improved radioimmunotherapy of hematologic malignancies: Progress report, 1988–1991, 19:19697 (R;US)
[Mass spectrometric analysis of polycyclic aromatic hydrocarbons adducted to DNA]: Final report, 19:19905 (R;US)

Oregon Univ., Eugene, OR (United States). Dept. of Biology
Phytoplankton excretion revisited: Healthy cells may not do it, but how many cells are healthy?: Continuation progress report, May 1, 1993–April 30, 1994, 19:19683 (R;US)

Osaka Univ., Ibaraki (Japan). Research Center for Nuclear Physics
Report of study meeting on dynamics of quarks-hadrons in atomic nuclei, 19:20011 (R;JP;In Japanese, English)
Report of study meeting on nuclear physics of quasi-elastic scattering, 19:20053 (R;JP;In Japanese, English)

Oslo Univ. (Norway)
Four essays on the economics of climate change - with a supplement, 19:18830 (R;NO)

Oulu Univ. (Finland)
Conduction of heat through slabs and walls: A differential-difference approach for design, energy analysis and building automation applications, 19:18935 (R;FI)

P

Pacific Northwest Lab., Richland, WA (United States)
1993 study of long-billed curlews on the Yakima Training Center, 19:19622 (R;US)
A comparison of artificial neural networks and statistical analyses, 19:20569 (R;US)
A method and apparatus for making continuous-reinforced thermoplastic/cellulose composites from recycled materials, 19:18996 (RA;US)
A novel high-capacity technology for removing volatile organic contaminants from water, 19:18981 (RA;US)

A novel photocatalytic detoxification process for cyanide wastes, 19:18984 (RA;US)

A procedure for oscillatory parameter identification, 19:18812 (R;US)

A stratiform cloud parameterization for General Circulation Models, 19:19562 (R;US)

Advanced aerogel materials for in-situ capture of waste gases from fossil fuel combustion, 19:18464 (RA;US)

Aerosol optical depth derived from solar radiometry observations at northern mid-latitude sites, 19:19554 (R;US)

Air pathway effects of nuclear materials production at the Hanford Site, 1983 to 1992, 19:18188 (R;US)

Air quality implications associated with the selection of power plants in the Pacific Northwest, 19:18467 (R;US)

An experimental and numerical study of boundary layer structure over areas of inhomogeneous sensible heat fluxes, 19:19559 (R;US)

An international comparison of commercial nuclear power plant staffing regulations and practice, 1980–1990, 19:18577 (R;US)

An investigation of bergmounds as analogs to erosion control factors on protective barriers, 19:18105 (R;US)

Analysis of area monitoring options for Westinghouse Hanford Company, 19:18239 (R;US)

Analysis of mid-tropospheric carbon monoxide data using a three-dimensional Global atmospheric Chemistry numerical Model, 19:19558 (R;US)

ARM: A climate process observatory, 19:19556 (R;US)

Atmospheric pathway dosimetry report, 1944-1992: Hanford Environmental Dose Reconstruction project, 19:19563 (R;US)

Cape Canaveral Air Force Station integrated resource assessment: Volume 3, Resource assessment, 19:18926 (R;US)

Characterization and processing of sintered products from Nanocrystalline powders generated by the RTDS method, 19:19076 (R;US)

Columbia River Pathway Dosimetry Report, 1944-1992: Hanford Environmental Dose Reconstruction Project, 19:19663 (R;US)

Comparative efficiency of microbial systems for destroying carbon tetrachloride contamination in Hanford groundwater, 19:19623 (R;US)

Comparing statistical tests for detecting soil contamination greater than background, 19:18241 (R;US)

Complications of anticancer chemotherapy, 19:19805 (R;US)

Computer modeling of jet mixing in INEL waste tanks, 19:18109 (R;US)

Conceptual Site Treatment Plan Laboratory for Energy-Related Health Research Environmental Restoration Project, 19:18108 (R;US)

Concrete application for magnetic sand waste from steel foundries, 19:18977 (RA;US)

Decontamination solution development studies, 19:18102 (R;US)

Destruction of nuclear graphite using closed chamber incineration, 19:18113 (R;US)

Diagnosis and management of endocrine gland neoplasmas: Revision 1, 19:19803 (R;US)

Diffusion/desorption of tritium from irradiated beryllium, 19:20461 (R;US)

Direct sulfur recovery during the regeneration of flue-gas sorbents, 19:18465 (RA;US)

Discussion of the paper "the use of conditional simulation in nuclear waste site performance assessment," by Carol A. Gotway, 19:18111 (R;US)

Dungeness crab and razor clam surveys at sites near Grays Harbor, Washington, and at Willapa Bay bar entrance, September 1993, 19:19662 (R;US)

Ecological evaluation of proposed dredged material from Winyah Bay, South Carolina, 19:19613 (R;US)

Ecotoxicity literature review of selected Hanford Site contaminants, 19:19618 (R;US)

Environmental surveillance master sampling schedule, 19:18189 (R;US)

Estimates of durability of TMI-2 core debris canisters and cask liners, 19:19047 (R;US)

Estimating pressurized water reactor decommissioning costs: A user's manual for the PWR Cost Estimating Computer Program (CECP) software: Draft report for comment, 19:18515 (R;US)

Evaluation of computer-based ultrasonic inservice inspection systems, 19:18590 (R;US)

Evaluation of options for disposition of dispersible material in B-Cell, 19:18238 (R;US)

Field evaluation of gas engine driven rooftop air-conditioning equipment at the Willow Grove (PA) Naval Air Station, 19:18928 (R;US)

Fiscal Year 1993 annual report for the Bubble Membrane Radiator Project, 19:18927 (R;US)

Global tropospheric chemistry models for radiatively important trace species: Design and research recommendations, 19:19552 (R;US)

Hanford Site ground-water model: Geographic information system linkages and model enhancements, FY 1993, 19:19615 (R;US)

Hydrocyclone classifiers for microsorting mixed thermoplastics from consumer waste, 19:18995 (RA;US)

I think that I shall never see · · · a lovely forestry policy: Land use programs for conservation of forests, 19:19561 (R;US)

Impact of access port diameter on the long reach manipulator design, 19:19232 (R;US)

Implementation plan for operating alternatives for the Naval Computer and Telecommunications Station cogeneration facility at Naval Air Station North Island, San Diego, California, 19:18976 (R;US)

Implementing and operating the Hanford Environmental Information System (HEIS), 19:20605 (R;US)

Information on Hoover's desert parsley for base realignment, 19:19616 (R;US)

Innovative use of activated carbon for recovering heavy metals, 19:18980 (RA;US)

Interactive calculator for use with multi-dimensional netCDF files, 19:20570 (R;US)

Intrathoracic neoplasms in the dog and cat, 19:19806 (R;US)

Introduction to Neural Networks: Neural Network workshop for the Hanford community, 19:20571 (R;US)

Investigation of exposure to Extremely Low Frequency (ELF) magnetic and electric fields: Ongoing animals studies, 19:19910 (R;US)

Micellar-enhanced absorption for controlling dilute emissions of volatile organic compounds and chlorinated solvents, 19:18999 (RA;US)

Minimizing waste in automotive spray washers using ozone and electrolysis, 19:18982 (RA;US)

Mixed waste and waste minimization: The effect of regulations and waste minimization on the laboratory, 19:18112 (R;US)

Monitoring groundwater and river interaction along the Hanford reach of the Columbia River, 19:19619 (R;US)

Novel pulverization process for recovering commingled plastic waste, 19:18998 (RA;US)

Organic carbon in Hanford single-shell tank waste, 19:18242 (R;US)

Organic layer sampling for SST 241-C-103 background, and Data Quality Objectives, and analytical plan, 19:18107 (R;US)

Pantex Plant Cell 12-44-1 tritium release: Re-assessment of environmental doses for 1990 to 1992, 19:19896 (R;US)

Paraneoplastic syndromes, 19:19784 (R;US)

Photocatalytic enhancement of pulp effluent bioreactors, 19:18983 (RA;US)

Physical and hydraulic properties of sediments and engineered materials associated with grouted double-shell tank waste disposal at Hanford, 19:18104 (R;US)

Preliminary conceptual design for the destruction of organic/ferrocyanide constituents in the Hanford tank waste with low-temperature hydrothermal processing, 19:18114 (R;US)

Preliminary potentiometric map and flow dynamic characteristics for the upper-basalt confined aquifer system, 19:19612 (R;US)

Primary bone neoplasms; Revision 2, 19:19791 (R;US)

Qualitative assessment of the impacts of proposed system operating strategies to resident fish within selected Columbia River Reservoirs, 19:18348 (R;US)

Radioactive waste vitrification offgas analysis proposal, 19:18115 (R;US)

Radionuclide concentrations in white sturgeon from the Columbia River: Revision 1, 19:19661 (R;US)
Relationship between cross section measurements and understanding radiation induced damage to biomolecules, 19:19897 (R;US)
Review of grout particulate-emissions methodology: Letter report, 19:18103 (R;US)
Sage grouse on the Yakima Training Center: A summary of studies conducted during 1991 and 1992, 19:19621 (R;US)
Saturation of swelling in neutron irradiated molybdenum and its dependence on irradiation temperature and starting microstructural state, 19:19048 (R;US)
Scintillating glass fiber neutron sensors: 3, Photon economy in scintillating fibers, 19:19474 (R;US)
Scintillating glass fiber neutron sensors: 2, Light transmission in scintillating fibers, 19:19475 (R;US)
Selecting the seismic HRA approach for Savannah River Plant PRA revision 1, 19:18637 (R;US)
Short-tower σ_θ measurements in the Colorado Plateaus region, 19:19555 (R;US)
Sound barrier wall containing recycled rubber and plastic, 19:18997 (RA;US)
Structure-function studies of DNA damage using AB INITIO quantum mechanics and molecular dynamics simulation, 19:19688 (R;US)
Substituting nonrecyclable waste paper for virgin paper in industrial and commercial packaging, 19:18979 (RA;US)
Summary of 1990 eolian characterization studies, Hanford Site, Washington, 19:18237 (R;US)
Surface-layer response over shrub-steppe canopy during springtime, 19:19560 (R;US)
The AMTEX Partnership™: A role model for US competitiveness: Quarterly report, 19:18866 (R;US)
The Atmospheric Radiation Measurement Program and interfaces with external data sources, 19:19557 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 19:19614 (R;US)
Two-channel microwave radiometer for observations of total column precipitable water vapor and cloud liquid water path, 19:19553 (R;US)
Underground tank vitrification: A pilot-scale in situ vitrification test of a tank containing a simulated mixed waste sludge, 19:18106 (R;US)
Urogenital tumors, 19:19804 (R;US)
Using fungi and bacteria to extract pollutants from solid wastes, 19:18978 (RA;US)
Vegetation survey of knapweed on the Yakima Training Center - 1992, 19:19620 (R;US)
Waste Tank Organic Safety Project: Analysis of liquid samples from Hanford waste tank 241-C-103, 19:18110 (R;US)
Water erosion field tests for Hanford protective barriers: FY 1992 status report, 19:18240 (R;US)
Wildlife studies on the Hanford Site: 1993 Highlights report, 19:19617 (R;US)

Passamaquoddy Technology, L.P., Portland, ME (United States)
Passamaquoddy technology recovery scrubber™: Volume 2, Final report: Appendices A-M, 19:18449 (R;US)

Pennsylvania State Univ., University Park, PA (United States)
Hydrothermal reactions of fly ash: [Quarterly] report, January 1, 1994–March 31, 1994, 19:17849 (R;US)
Hydrothermal reactions of fly ash: [Quarterly] report, July 1, 1993–September 30, 1993, 19:17847 (R;US)
Hydrothermal reactions of fly ash: Quarterly report, October 1, 1993–December 31, 1993, 19:17848 (R;US)
Micro-agglomerate location flotation for deep cleaning of coal: Quarterly progress report, October 1–December 31, 1993, 19:17752 (R;US)
[Investigation of the structure and phase relations of C-S-H gels], 19:19068 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Coal and Organic Petrology Labs.
Maintenance of the coal sample bank and database: Quarterly technical progress report, September 29, 1993–December 28, 1993, 19:17840 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Dept. of Chemical Engineering
The effect of alternative fuels on the stability and lubricity of crankcase lubricants: Final report, September 1992–September 1993, 19:19013 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Dept. of Chemistry
Metal cluster alloys and oxides: Elucidating structural and electronic effects in governing the reactivity and catalytic role of matter in finite dimensions: Progress report, December 2, 1992–December 10, 1993, 19:19131 (R;US)

Pennsylvania State Univ., University Park, PA (United States). Dept. of Materials Science and Engineering
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, July–September 1993, 19:17791 (R;US)
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, October 1993–December 1993, 19:17792 (R;US)

Sandia National Labs., Albuquerque, NM (United States)
A critical examination of charge funneling and its impact on single-event upset in Si devices, 19:19481 (R;US)
A multi-tiered wavefront sensor using binary optics, 19:19489 (R;US)
Advanced direct liquefaction concepts for PETC generic units: Quarterly technical progress report, July 1993–September 1993, 19:17790 (R;US)
Advances in rapid prototyping, 19:19050 (R;US)
Aging management guideline for commercial nuclear power plants-pumps, 19:18491 (R;US)
Aging management guideline for commercial nuclear power plants-stationary batteries: Final report, 19:18492 (R;US)
Airbags to Martian Landers: Analyses at Sandia National Laboratories, 19:19236 (R;US)
An experimental comparison of laboratory techniques in determining bulk properties of tuffaceous rocks: Yucca Mountain Site Characterization Project, 19:18121 (R;US)
An intense proton beam diagnostic using the $^{7}Li(p,\gamma^{8})Be \rightarrow {}^{141}Pr(\gamma,n)^{140}Pr(\beta^{+})$ nuclear reaction sequence, 19:20466 (R;US)
Analysis of anelastic flow and numerical treatment via finite elements, 19:19284 (R;US)
Application of higher-order multipoint statistics to the ideal spray, 19:19177 (R;US)
Beam transport, 19:20465 (R;US)
Bounding the total-dose response of modern bipolar transistors, 19:19306 (R;US)
Capillary flow solderability test for printed wiring boards, 19:19304 (R;US)

Characterization of energetic devices for thermal battery applications by high-speed photography, 19:19505 (R;US)
Compilation of diamond-like carbon properties for barriers and hard coatings, 19:19109 (R;US)
Continuum fluorescence of Cu in NbTi/Cu composite wires, 19:20300 (R;US)
Correlation of hot-carrier stress and ionization induced degradation in bipolar transistors, 19:19307 (R;US)
Cross-condensation reactions in an organically modified silica sol-gel, 19:19077 (R;US)
D-D fusion experiments using fast z pinches, 19:20423 (R;US)
Demonstration of a high heat removal CVD diamond substrate edge-cooled multichip module, 19:19303 (R;US)
Design considerations for automated packaging operations, 19:19234 (R;US)
Design of a pressure/temperature logging system for geothermal applications, 19:18387 (R;US)
Designing aluminum sealing glasses for manufacturability, 19:19104 (R;US)
Detail of travel associated with methods of transmissivity field generation in the Culebra aquifer: Foreign trip report, January 23–February 8, 1994, 19:18021 (R;US)
Development of an alanine dosimeter for gamma dosimetry in mixed environments – Summary of research, 19:19477 (R;US)
Durability of concrete materials in high-magnesium brine, 19:19079 (R;US)
Enhanced charge trapping in bipolar spacer oxides during low-dose-rate irradiation, 19:19482 (R;US)
Estimating low-dose rate irradiation response of MOSFETs, 19:19484 (R;US)
Evaluation of an air drilling cuttings containment system, 19:18244 (R;US)
Experience with automatic, dynamic load balancing and adaptive finite element computation, 19:20572 (R;US)
Fatigue case study and loading spectra for wind turbines, 19:18420 (R;US)
Hardness variability in commercial and hardened technologies, 19:19485 (R;US)
Hazardous materials symposium in support of the cooperative program in surety technologies and initial meeting with the All Russia Institute of Automatics: Foreign trip report, January 23–February 11, 1994, 19:18022 (R;US)
Heterogeneous reaction mechanisms and kinetics relevant to the CVD of semiconductor materials, 19:19105 (R;US)
High-rate lithium thionyl-chloride battery development, 19:18826 (R;US)
Hydrometeor erosion flight tests, 19:19235 (R;US)
Independent review of SCDAP/RELAP5 natural circulation calculations, 19:18803 (R;US)
Individual and combined effects of chloride, sulfate, and magnesium ions on hydrated Portland-cement paste, 19:19156 (R;US)
Initial report on calorimetry for the Tore Supra Outboard pump Limiter, 19:20464 (R;US)
Input shaping for three-dimensional slew maneuvers of a precision pointing flexible spacecraft, 19:19022 (R;US)
Integrated Engineering Information Technology, FY93 accomplishments, 19:20606 (R;US)
Interim report for SNL/NM environmental drilling project, 19:18868 (R;US)
Iron hydrous titanium oxide catalysts for the dehydrogenation of ethylbenzene to styrene, 19:19155 (R;US)
Large-scale boiling experiments of the flooded cavity concept for in-vessel core retention, 19:18805 (R;US)
Large-scale testing of in-vessel debris cooling through external flooding of the reactor pressure vessel in the CYBL facility, 19:18806 (R;US)
Linear-size nonobtuse triangulation of polygons, 19:20573 (R;US)
Low-voltage cathodoluminescent properties of europium-activated anion-deficient fluorites, 19:19161 (R;US)
Magnetic properties of nanosize iron clusters, 19:19049 (R;US)
Meetings on renewable energy technology in Honduras: Foreign trip report, December 6–16, 1993, 19:18357 (R;US)
Methods for measuring the surface tritium inside TFTR using beta decay, 19:20467 (R;US)
Micromechanical modeling of advanced materials, 19:19106 (R;US)
Microstructural development in solution derived PZT thin films, 19:19108 (R;US)
Monitored Retrievable Storage/Multi-Purpose Canister analysis: Simulation and economics of automation, 19:18123 (R;US)
Network analyzer calibration for cryogenic on-wafer measurements, 19:19308 (R;US)
Non-alloyed, refractory metal contact optimization with shallow implantations of Zn and Mg, 19:19301 (R;US)
NPE: Close-in stress and motion measurements, 19:19021 (R;US)
Numerical simulation of dynamic fracture and failure in solids, 19:19107 (R;US)
Observations of quenching of downward-facing surfaces, 19:18535 (R;US)
On the use of fuzzy logic assessment for high consequence implementation risk analysis, 19:20575 (R;US)
Overview of the Defense Programs Research and Technology Development Program for fiscal year 1993: Appendix II research laboratories and facilities, 19:19498 (R;US)
PCCS model development for SBWR using the CONTAIN code, 19:18490 (R;US)
Plane Shock Generator Explosive Lens: Shock characterization of 4340 and PH13-8Mo steels, C360 brass and PZT 65/35 ferroelectric ceramic, 19:19506 (R;US)
Policies for implementing network firewalls, 19:20574 (R;US)
Progress in donor assisted coal liquefaction: Hydroaromatic compound formation, 19:17825 (R;US)
PVFORM3.3: Photovoltaic System Performance, 19:20551 (CM;US)
Radially combined 30 W, 14-16 GHz amplifier, 19:19309 (R;US)
Radiation effects in oxynitrides grown in N_2O, 19:19305 (R;US)
Radiative heat transfer in pulverized-coal-fired boilers: Development of the absorptive/reflective character of initial ash deposits, 19:17842 (R;US)
Report on the nuclear waste program in Sweden: Foreign trip report, December 12–16, 1993, 19:18020 (R;US)
Rich methane/air flames: Burning velocities, extinction limits, and flammability limit, 19:19175 (R;US)
Role of burn-in during qualification testing, 19:19483 (R;US)
Semantic modeling for theory clarification: The realist vs liberal international relations perspective, 19:18831 (R;US)
Sodium spray and jet fire model development within the CONTAIN-LMR code, 19:18804 (R;US)
Software Use Control, 19:19511 (R;US)
Spinnability of silica sols: The role of alkoxy group exchange, 19:19078 (R;US)
Status of the Beneficial Uses Shipping System cask (BUSS), 19:17989 (R;US)
Testing of the Y-12 Plant Criticality Accident Alarm System detectors at the Sandia Pulsed Reactor Facility, 19:18811 (R;US)
The Bayou Choctaw Oil Shipment Test, 19:17934 (R;US)
The in situ permeable flow sensor: A device for measuring groundwater flow velocity, 19:19627 (R;US)
The optimization of interfaces in InAsSb/InGaAs strained-layer superlattices grown by metal-organic chemical vapor deposition, 19:19302 (R;US)
Thin-film methods for examining the decomposition chemistry of explosives, 19:19504 (R;US)
Travel to Australia for Solar93 conference: Foreign trip report, November 28–December 20, 1993, 19:18349 (R;US)
Travel to Austria to attend the 10th Meeting of the IAEA Standing Advisory Group on the Safe Transport of Radioactive Materials: Foreign trip report, March 18–26, 1994, 19:17972 (R;US)
Travel to Bolivia for PV/Wind water water pumping workshop: Foreign trip report, September 13–18, 1993, 19:18358 (R;US)
Travel to England to resolve anomalies on the Channel Monitoring System: Foreign trip report, November 7, 1993–November 16, 1993, 19:17971 (R;US)
Travel to France and Switzerland to collaborate on radioactive waste storage: Foreign trip report, June 15–20, 1993, 19:18019 (R;US)
Travel to Moscow to attend the First Technical Working Group meeting for the Russian National Assistance Program: Foreign trip report, February 12–19, 1994, 19:18269 (R;US)

Travel to Russia to visit Arzamas, establish relationships with senior staff and identify opportunities for scientific collaboration: Foreign trip report, 24 February 1994–4 March 1994, 19:18861 (R;US)
Updated neutron spectrum characterization of SNL baseline reactor environments: Volume 1, Characterization, 19:19900 (R;US)
Updated neutron spectrum characterization of SNL baseline reactor environments: Volume 2, Analysis computer listings, 19:18299 (R;US)
Use of comprehensive NEPA documents to reduce program risk, 19:19500 (R;US)
User's manual for SNL-SAND-II code, 19:20225 (R;US)
Using performance assessment for radioactive waste disposal decision making – implementation of the methodology into the third performance assessment iteration of the Greater Confinement Disposal site, 19:18122 (R;US)

Sandia National Labs., Livermore, CA (United States)
Compilation of diamond-like carbon properties for barriers and hard coatings, 19:19109 (R;US)
Effects of molecular transport on turbulence-chemistry interactions in a hydrogen-argon-air jet diffusion flame, 19:19178 (R;US)
Evolution of char chemistry, crystallinity, and ultrafine structure during pulverized-coal combustion, 19:17901 (R;US)
Implementation of Raman lidar for profiling of atmospheric water vapor and aerosols at the SGP CART site, 19:19566 (R;US)
Meta-Transport Library, A protocol base class library: Release 1.1, 19:20576 (R;US)
Near-extinction and final burnout in coal combustion, 19:17902 (R;US)
Rich flammability limits in CH_3OH/CO/diluent mixtures, 19:19176 (R;US)
SandiaXTP, An object-oriented implementation of XTP 3.7: Release 1.1, 19:20577 (R;US)
Structural and compositional transformations of biomass chars during combustion, 19:18318 (R;US)
The history of NATO TNF policy: The role of studies, analysis and exercises conference proceedings: Volume 1, Introduction and summary, 19:19510 (R;US)
The thermochemistry and reaction mechanisms in the decomposition of energetic materials, 19:19507 (R;US)

Savannah River Ecology Lab., Aiken, SC (United States)
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
Savannah River Ecology Laboratory annual technical progress report of ecological research, period ending July 31, 1993, 19:18190 (R;US)
Species status of Mill Creek Elliptio, 19:19664 (R;US)

Science and Engineering Associates, Inc., Albuquerque, NM (United States)
Evaluation of safety assessment methodologies in Rocky Flats Risk Assessment Guide (1985) and Building 707 Final Safety Analysis Report (1987), 19:18229 (R;US)

Science Applications International Corp., Richland, WA (United States)
Final report on fiscal year 1992 activities for the environmental monitors line-loss study, 19:17967 (R;US)

SciTech, Inc., Aurora, IL (United States)
SciTech Clubs for Girls: [Annual] technical report, 19:20479 (R;US)

Secretariat d'Etat a la Recherche, Algiers (Algeria)
Synthesis, characterization and applications of tetraalkylalkylenediphosphonates, 19:19112 (R;DZ;In French)

Senes Oak Ridge, Inc., TN (United States). Center for Risk Analysis
Use of international data sets to evaluate and validate pathway assessment models applicable to exposure and dose reconstruction at DOE facilities: Progress report, August 1993–January 1994, 19:18807 (R;US)

Solmecs Ltd., Tel Aviv (Israel)
Development of a wet vapor homogeneous liquid metal MHD power system: Final report, 19:18899 (R;US)

South Carolina State Univ., Orangeburg, SC (United States). Dept. of Natural Sciences
Physiological ecology of SRS Carolina bay phytoplankton communities: Effects of nutrient changes and CO_2 sources: Renewal year two report, 19:19654 (R;US)

South Carolina Univ., Columbia, SC (United States). Dept. of Biological Sciences
Large scale solubilization of coal and bioconversion to utilizable energy: Quarterly technical progress report, September–December 1993, 19:17820 (R;US)
[Incremental funding request], 19:19906 (R;US)

South Carolina Univ., Columbia, SC (United States). Dept. of Chemistry
The transformation of organic amines by transition metal cluster compounds: Progress report, 1992–1993, 19:19127 (R;US)

South Carolina Univ., Columbia, SC (United States). Inst. of Archaeology and Anthropology
Intensive archaeological survey of the F/H Surface Enhancement Project Area, Savannah River Site, Aiken and Barnwell Counties, South Carolina, 19:18628 (R;US)

South Carolina Univ., Columbia, SC (United States). Savannah River Archaeological Research Program
Annual review of cultural resource investigations by the Savannah River Archaeological Research Program: Fiscal year 1992, 19:18627 (R;US)

Kinetics studies following state-selective laser excitation: Final progress report, March 15, 1984–July 15, 1993, 19:20231 (R;US)

Texas Univ., Austin, TX (United States). Fusion Research Center
Locked modes in TEXT-U tokamak, 19:20308 (R;US)
Scaling laws for TEXT plasma profiles, 19:20306 (R;US)

Theis Technologies, Inc., Oak Ridge, TN (United States)
An assessment and evaluation for recycle/reuse of contaminated process and metallurgical equipment at the DOE Rocky Flats Plant Site – Building 865: Final report, 19:18023 (R;US)

Tokyo Univ., Tanashi (Japan). Inst. for Nuclear Study
A computer code for measurement of SKS magnetic field: BKO-DAQ, 19:19417 (R;JP;In Japanese)
A heavy ion linac complex for unstable nuclei, 19:19334 (R;JP)
Computer control system of the cooler-synchrotron TARN-II, 19:19953 (R;JP)
Development of an interdigital-H linac for unstable nuclei and INS, 19:19323 (R;JP)
High frequency acceleration cavities of heavy ion storage rings and synchrotrons, 19:19418 (R;JP;In Japanese)
Injection method using the third order resonance at TARN II, 19:19352 (R;JP)
Interdigital-H linac for unstable nuclei at INS, 19:19335 (R;JP)
Proceedings of the meeting on beam monitors for Cyclotrons and related facilities, 19:19354 (R;JP;In Japanese, English)

TPS Termiska Processer AB, Nykoeping (Sweden)
Heterogeneous catalysis phase 2. Catalytic combustion of methane over magnesium oxide, 19:19179 (R;SE)

TRW Environmental Safety Systems, Inc., Las Vegas, NV (United States)
Site characterization plan thermal goals reevaluation, 19:18040 (R;US)

TSI Research, Inc., Solana Beach, CA (United States)
Activation cross section measurement for the $^{179}Hf(n,2n)^{178m2}Hf$ reaction, 19:20151 (RA;XA)
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Texts of papers presented at the second research co-ordination meeting held in Del Mar, California, USA, 29 to 30 April 1993, 19:20143 (R;XA)
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Summary report of the second research coordination meeting held in Del Mar, California, USA, 29 to 30 April 1993, 19:20158 (R;XA)
Calculated cross sections for production and destruction of some long-lived nuclides of importance in fusion energy applications, 19:20118 (RA;XA)
Comparison of 14 MeV isomer production of $^{178m2}Hf$ and $^{179m2}Hf$ using Feshbach-Kerman-Koonin and exciton preequilibrium models, 19:20117 (RA;XA)
Cross section measurement for $^{108}Cd(n,p)$ ^{108m}Ag reaction, 19:20150 (RA;XA)
Evaluation of some activation cross-sections for formation of long-lived activities important for fusion technology, 19:20153 (RA;XA)
Influence of sequential (x,n) reactions on production of long-lived radionuclides in fusion reactors, 19:20120 (RA;XA)
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology, 19:20119 (RA;XA)
Investigations on the systematics in (n,α) cross sections at 14.6 MeV, 19:20155 (RA;XA)
Measurement of the cross sections for the reactions $^{137}Ba(n,p)$ ^{137}Cs, $^{182}W(n,n'\alpha)$ $^{178m2}Hf$ and $^{193}Ir(n,2n)$ $^{192m2}Ir$ at 14 MeV, 19:20149 (RA;XA)
Measurements of 14 MeV neutron cross-sections for the production of isomeric states in Hafnium isotopes, 19:20147 (RA;XA)
Measurements of some activation cross-sections for generation of long-lived nuclides, 19:20152 (RA;XA)
Measurements on the cross sections for $^{94}Mo(n,p)$ and $^{95}Mo(n,np)^{94}Nb$, $^{159}Dy(n,p)^{159}Tb$, $^{182}W(n,n\alpha)^{178m2}Hf$ and $^{187}Re(n,2n)^{186m}Re$ reactions at 14 MeV region, 19:20146 (RA;XA)
Neutron reactions with nuclei in isomeric states, 19:20154 (RA;XA)
Nuclear data needs for fusion waste management, 19:20157 (RA;XA)
Recent radiochemical studies of some long-lived soft β^- omitting radioisotopes formed in fast neutron induced reactions, 19:20148 (RA;XA)
Results from the Argonne, Los Alamos, JAERI collaboration, 19:20145 (RA;XA)
Review of the activation data for fast charged particle induced reactions, 19:20156 (RA;XA)
Self-consistent description of isomer yields in neutron reactions, 19:20103 (RA;XA)
Some results of the production of long-lived radionuclides in fast neutron induced reactions, 19:20144 (RA;XA)

The Hanford Site Tank Waste Remediation System: An update, 19:18153 (R;US)
The new design of the Close Fit Shielding Ring for SP-100, 19:18809 (R;US)
The Transuranic Waste Program's integration and planning activities and the contributions of the TRU partnership, 19:18156 (R;US)
The use of ultra high pressure water for installation of instrumentation in "assumed" leaker tanks, 19:18152 (R;US)
Upgrading a 1944 plutonium-extraction plant to a modern decontamination facility, 19:18251 (R;US)
Use of an Open-path FTIR sensor to measure VOCs at the Hanford Site, 19:18253 (R;US)
Using PL/SQL to automatically enhance CASE*Generator 2.0 generated forms, 19:20583 (R;US)
Vegetation communities associated with the 100-Area and 200-Area facilities on the Hanford Site, 19:19634 (R;US)
Westinghouse radiological containment guide, 19:19904 (R;US)
WHC fire hazards analysis policy, 19:18494 (R;US)
WRAP 2A Waste Form Qualification Plan, 19:18162 (R;US)

Westinghouse Idaho Nuclear Co., Inc., Idaho Falls, ID (United States)

Idaho Chemical Processing Plant Site Development Plan, 19:18259 (R;US)
Portable high precision pressure transducer system, 19:19497 (PA;US)

Westinghouse Savannah River Co., Aiken, SC (United States)

Analysis of volatile organic compounds (VOCs) in A/M Area Crouch Branch (Cretaceous) Aquifer characterization samples: 1993, 19:19640 (R;US)
Annual radioactive waste tank inspection program – 1993, 19:18178 (R;US)
Application of cone penetrometer technology in hydrogeological investigations at the Savannah River Site (SRS) South Carolina, 19:19638 (R;US)
Atmospheric and dispersion modeling in areas of highly complex terrain employing a four-dimensional data assimilation technique, 19:19574 (R;US)
Axial piston pump wear plates, Delta-Q Corporation, 19:18593 (R;US)
Corrosion study for a radioactive waste vitrification facility, 19:18166 (R;US)
Critical Protection Item Classification for a waste processing facility at Savannah River Site: Revision 1, 19:18261 (R;US)
Criticality assessment of initial operations at the Defense Waste Processing Facility, 19:18168 (R;US)
Demonstration of innovative monitoring technologies at the Savannah River Integrated Demonstration Site, 19:19646 (R;US)
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
Development of a simple thermophysical property model for cane fiberboard packages subjected to a hypothetical accident fire, 19:19244 (R;US)
DOE mixed waste metals partition in a rotary kiln wet off-gas system, 19:18176 (R;US)
DORT certification package, 19:20228 (R;US)
DWPF coupled feed flowsheet material balance with batch one sludge and copper nitrate catalyst, 19:18174 (R;US)
Environmental implementation plan: Chapter 16, Environmental appraisal and surveillance program: Draft revision, 19:18856 (R;US)
Environmental implementation plan: Chapter 14, Environmental compliance tracking and data management: Revision, 19:18855 (R;US)
Environmental implementation plan: Chapter 5, Chemical management, pollution prevention and other compliance programs: Draft revision, 19:18854 (R;US)
Evaluation of replacement tritium facility (RTF) compliance with DOE safety goals using probabilistic consequence assessment methodology: Revision 1, 19:18260 (R;US)
F-Area Seepage Basins groundwater monitoring report: First and second quarters 1993: Volume 1, 19:19642 (R;US)
F-Area Seepage Basins groundwater monitoring report – third and fourth quarters 1993: Volume 1, 19:18194 (R;US)
Fall 1993 Hardwood Seed Collection Project for the Savannah River Site, 19:19648 (R;US)
Final report: In situ radio frequency heating demonstration, 19:18175 (R;US)
Frequency of deflagration in the in-tank precipitation process tanks due to loss of nitrogen purge system: Revision 2, 19:18173 (R;US)
Groundwater penetrating radar and high resolution seismic for locating shallow faults in unconsolidated sediments, 19:18191 (R;US)
Guidelines for acceptable soil concentrations in the old F- and H-Area Retention Basins, 19:18196 (R;US)
H-Area Seepage Basins groundwater monitoring report: Volume 1, First and second quarters 1993, 19:19643 (R;US)
H-Area Seepage Basins groundwater monitoring report – third and fourth quarters 1993: Volume 1, 19:18195 (R;US)
Industry survey for horizontal wells: Final report, 19:19291 (R;US)
L-Lake fish: L-Lake/Steel Creek Biological Monitoring Program, January 1986–December 1991, 19:18638 (R;US)
MCNP certification package, 19:20227 (R;US)
Measurement of SRS reactor recirculation pump performance using pump motor power, 19:18810 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report: Second quarter 1993, 19:19641 (R;US)
Method and apparatus for removing ions from soil, 19:19611 (PA;US)
Method for dissolution and stabilization of silica-rich fibers, 19:18101 (PA;US)
Method for processing aqueous wastes, 19:19660 (PA;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Fourth quarter 1993 and 1993 summary, 19:18193 (R;US)
Passive remediation of chlorinated volatile organic compounds using barometric pumping, 19:18262 (R;US)

Percolation testing at the F- and H-Area Seepage Basins: Final report, 19:18171 (R;US)
Program plan: DWPF/HLWDP stirred Melter Program Plan, 19:18172 (R;US)
Progress in resolving Savannah River Site high-level waste tank safety issues, 19:18167 (R;US)
Radiological impact of 1992 operations at the Savannah River Site, 19:18192 (R;US)
Radiological performance assessment for the E-Area Vaults at the Savannah River Site: Part 2, Simulation of contaminant migration in the far-field, 19:19639 (R;US)
Reaction of formic and nitric acids with Savannah River Site radioactive HLW sludge in the DWPF pretreatment steps, 19:18169 (R;US)
Research and development task plan: Shielded Cells Batch 1 campaign: Revision 2, 19:18170 (R;US)
Results of the quarterly tritium survey of Four Mile Creek and its seeplines in the F- and H-Areas of SRS, June 1993, 19:19667 (R;US)
Sanitary Landfill groundwater monitoring report: Third quarter 1993, 19:19645 (R;US)
Sanitary Landfill groundwater monitoring report: Fourth quarterly report and summary 1993, 19:19647 (R;US)
Savannah River Site environmental report for 1993 summary pamphlet, 19:19575 (R;US)
Selecting the seismic HRA approach for Savannah River Plant PRA revision 1, 19:18637 (R;US)
SRS Tier II emergency and hazardous chemical inventory report, 19:18177 (R;US)
SRTC criticality safety technical review: Phase 1 criticality analysis for the 9972-9975 family of shipping casks: (SRT-CMA-940003), 19:19237 (R;US)
Startup status of the Replacement Tritium Facility at the Savannah River Site, 19:20475 (R;US)
Structural analysis of closure cap barriers: A pre-test study for the Bentonite Mat Demonstration Project: Revision 1, 19:19110 (R;US)
Summary report of the drilling technologies tested at the Integrated Demonstration Project for cleanup of organic contaminants in soils and groundwater at non-arid sites, 19:19644 (R;US)
Technical and management considerations in conducting type B shipping container tests, 19:19245 (R;US)
Tritiated ammonia formation, 19:19158 (R;US)

Whatcom, County of, WA (United States)
Draft Environmental Impact Statement: BPA/Puget Power Northwest Washington Transmission Project, 19:18813 (R;US)

Wisconsin Univ., Madison, WI (United States)
A separate Higgs?, 19:19987 (R;US)
Development of a hydrogen and deuterium polarized gas target for application in storage rings: Progress report, [March 1, 1993–February 28, 1994], 19:19347 (R;US)

Worcester Polytechnic Inst., MA (United States)
Methane coupling by membrane reactor: Quarterly technical progress report, September 25, 1993–December 24, 1993, 19:18339 (R;US)

World Energy Conference, Helsinki (Finland). Finnish National Committee
Effects of lighting and task parameters on visual acuity and performance, 19:18930 (R;FI)
Lighting objectives and demands of future buildings, 19:18929 (R;FI)

World Technology Evaluation Center, Baltimore, MD (United States)
WTEC panel report on European nuclear instrumentation and controls: Final report, 19:18624 (R;US)

Wyoming Univ., Laramie, WY (United States)
Summary of 1990 eolian characterization studies, Hanford Site, Washington, 19:18237 (R;US)

Y

Yale Univ., New Haven, CT (United States). Dept. of Chemistry
Two dimensional NMR and NMR relaxation studies of coal structure: Progress report, October 1, 1993–December 31, 1993, 19:17832 (R;US)

Personal Author Index

Authors' surnames are indexed in the form appearing in the publication cited; given names generally have been reduced to initials. For documents with multiple authors, each author name is indexed. The entry for a primary author (first author listed on an abstracted document) includes the full document title and citation number. Entries for other authors provide a cross-reference to the primary author. Also included is information on the document type, country of publication, and the document language listed in parentheses in the format (J;FR;In French and English). Accent marks are not input because of computer alphabetization. Spelling and transliteration follow standard conventions.

Subject Index

This index is arranged by subject descriptors selected from those assigned to each citation in this publication. Subject descriptors are selected from a controlled thesaurus of terms, ETDE/PUB–2(Rev.1), *International Energy: Subject Thesaurus*. In order to enhance indexing, subject descriptor entries generally consist of a pair of descriptors: a main term and a qualifier term. Each entry includes the full title (which may be followed by supplementary descriptive information in parentheses) and the citation number. Additional information given in parentheses indicates the document type (an abbreviation such as B for book), the country of publication (such as DE for Federal Republic of Germany), and the language if non-English.

See references guide users from synonymous terms to the descriptors selected for the concept. *See also* references indicate subject concepts that are more specific than a particular descriptor. To gain complete subject coverage, all such terms should be reviewed.

Almaraz probabilistic safety analysis application, 19:18512 (RA;XA)

ALPHA PARTICLES
Alfven Waves
Anomalous losses of alpha particles caused by toroidal Alfven Eigenmodes and approach to saturation, 19:20340 (IA;XA)
Angular Momentum
Neoclassical transport of toroidal angular momentum caused by alpha-particles in axisymmetric tokamak, 19:20321 (IA;XA)
Charged-Particle Transport Theory
Alpha particles confinement in presence of magnetic ripple and MHD perturbations, 19:20324 (IA;XA)
Evolution of α particle distribution in burning tokamaks including energy dependent α transport effects, 19:20322 (IA;XA)
Coupling
Evolution of the alpha particle driven toroidicity induced Alfven mode, 19:20417 (R;US)
Self-consistent study of the alpha particle driven TAE mode, 19:20418 (R;US)
Diffusion
Alpha particles confinement in presence of magnetic ripple and MHD perturbations, 19:20324 (IA;XA)
Anomalous losses of alpha particles caused by toroidal Alfven Eigenmodes and approach to saturation, 19:20340 (IA;XA)
Dynamics
Evolution of the alpha particle driven toroidicity induced Alfven mode, 19:20417 (R;US)
Energy Deposition
Evolution of α particle distribution in burning tokamaks including energy dependent α transport effects, 19:20322 (IA;XA)
Energy Transfer
Alpha particle heating during sawteeth in ITER-like reactor, 19:20319 (IA;XA)
Fast Magnetoacoustic Waves
Nonlocal interaction of fast magnetosonic waves with alpha particles in tokamaks, 19:20335 (IA;XA)
Neoclassical Transport Theory
Neoclassical transport of toroidal angular momentum caused by alpha-particles in axisymmetric tokamak, 19:20321 (IA;XA)
Neutron Detection
Direct and indirect α-particle information from neutron measurements, 19:20349 (IA;XA)
Orbits
Alpha - particle containment and spatial distribution of prompt losses in stellarators as a function of the aspect ratio, 19:20346 (IA;XA)
Particle Losses
Alpha - particle containment and spatial distribution of prompt losses in stellarators as a function of the aspect ratio, 19:20346 (IA;XA)
Anomalous losses of alpha particles caused by toroidal Alfven Eigenmodes and approach to saturation, 19:20340 (IA;XA)
Experimental investigation of toroidal Alfven Eigenmodes in TFTR, 19:20338 (IA;XA)
Self-consistent study of the alpha particle driven TAE mode, 19:20418 (R;US)
The effect of X-points on alpha particle orbits in tokamak configurations, 19:20347 (IA;XA)
Trapped ion poloidal Alfven wave + α-particle interaction, 19:20334 (IA;XA)
Plasma Confinement
Degradation of alpha particle confinement by toroidal field ripple in non-circular tokamak reactors, 19:20323 (IA;XA)
Plasma Simulation
Experimental investigation of toroidal Alfven Eigenmodes in TFTR, 19:20338 (IA;XA)
Simulation of fusion α-component in a tokamak with He^3 plasma and high power NBI, 19:20337 (IA;XA)
Sawtooth Oscillations
Alpha particle heating during sawteeth in ITER-like reactor, 19:20319 (IA;XA)

ALPHA REACTIONS
Review of the activation data for fast charged particle induced reactions, 19:20156 (RA;XA)

ALPHA-BEARING WASTES
Active sites environmental monitoring Program - Program Plan: Revision 2, 19:18099 (R;US)
Area 5 Site Characterization Project: Report of hydraulic property analysis through August 1993, 19:18032 (R;US)
Discussion of the paper "the use of conditional simulation in nuclear waste site performance assessment," by Carol A. Gotway, 19:18111 (R;US)
End effectors and attachments for buried waste excavation equipment, 19:18052 (R;US)
Engineering scale electrostatic enclosure demonstration, 19:18054 (R;US)
Generation of volatile organic compounds by alpha particle degradation of WIPP plastic and rubber material, 19:17995 (R;US)
Retrieval/ex situ thermal treatment scoring interaction report, 19:18051 (R;US)
The Transuranic Waste Program's integration and planning activities and the contributions of the TRU partnership, 19:18156 (R;US)
Using performance assessment for radioactive waste disposal decision making – implementation of the methodology into the third performance assessment iteration of the Greater Confinement Disposal site, 19:18122 (R;US)

BEAM DYNAMICS
Symplectic tracking using point magnets and a reference orbit made of circular arcs and straight lines, 19:19329 (R;US)
Symplectic tracking using point magnets in the presence of a longitudinal magnetic field, 19:19330 (R;US)

BEAM INJECTION
Impedance and instability threshold estimates in the main injector I, 19:19332 (R;US)
Injection timing system for PLS, 19:19421 (RA;JP)

BEAM MONITORING
Fast automatic system for measurements of beam parameters of the MMF linac, 19:19375 (RA;JP)
Non-destructive fast data taking system of beam profile and momentum spread in KEK-PS, 19:19377 (RA;JP)

BEAM MONITORS
Beam position monitor multiplexer controller upgrade at the LAMPF proton storage ring, 19:19423 (RA;JP)
Preservation of beam loss induced quenches, beam lifetime and beam loss measurements with the HERA-p beam-loss-monitor system, 19:19443 (R;DE)
Proceedings of the meeting on beam monitors for Cyclotrons and related facilities, 19:19354 (R;JP;In Japanese, English)
The KEK PS fast beam loss monitor system, 19:19376 (RA;JP)

BEAM TRANSPORT
GLAD: a generic lattice debugger, 19:19324 (RA;JP)

BEAM-FOIL SPECTROSCOPY
See ION SPECTROSCOPY

BEAM-GAS SPECTROSCOPY
See ION SPECTROSCOPY

BEAM-PLASMA SYSTEMS
Stimulated scattering of a slow electromagnetic wave excited by the relativistic electron beam., 19:20415 (R;UA)

BEAMS
See also ION BEAMS
POLARIZED BEAMS
Beam energy absolute measurement using K-edge absorption spectrometers, 19:19331 (R;US)

BEAUTY MESONS
Beauty physics in lattice gauge theory, 19:20039 (R;DE)

BENTONITE
Diffusion in concrete, crushed rock and mixtures of crushed rock and bentonite, 19:18180 (R;FI)
Structural analysis of closure cap barriers: A pre-test study for the Bentonite Mat Demonstration Project: Revision 1, 19:19110 (R;US)

BENZENE
Computer simulations of benzene in faujasite-type zeolites, 19:19147 (R;US)
Direct aromatization of methane: Quarterly technical progress report Number 5, 1 October 1993–31 December 1993, 19:17941 (R;US)
On the role of delocalization in benzene: Theoretical and experimental investigation of the effects of strained ring fusion, 19:19148 (R;US)
Sampling and analyses report for December 1992 semiannual postburn sampling at the RMI UCG Site, Hanna, Wyoming, 19:17772 (R;US)

BENZOIC ACID
Energetics and kinetics of anaerobic aromatic and fatty acid degradation: Progress report, November 1992–November 1993, 19:18308 (R;US)

BENZOPYRENE
[Mass spectrometric analysis of polycyclic aromatic hydrocarbons adducted to DNA]: Final report, 19:19905 (R;US)

BERKELIUM ADDITIONS
See ALLOYS

BERYLLIUM
Anharmonic thermal vibrations of be metal found in the MEM nuclear density map, 19:20283 (RA;JP)
Direct observation of systematic deviations from the Bethe stopping theory for relativistic heavy ions, 19:20222 (R;DE)
Results from the Argonne, Los Alamos, JAERI collaboration, 19:20145 (RA;XA)

BERYLLIUM MODERATORS
See BERYLLIUM

BESSY STORAGE RING
Annual report 1992 of the Berliner Elektronenspeicherring-Gesellschaft fuer Synchrotronstrahlung (BESSY), 19:19416 (I;DE;In German)

BETA BEAMS (ELECTRONS)
See ELECTRON BEAMS

BIMETALS
Photodissociation and spectroscopy of gas phase bimetallic clusters: Progress report for 1990–1991, 19:19032 (R;US)

BINARY MIXTURES
A classical model for closed-loop diagrams of binary liquid mixtures, 19:19152 (R;US)
A new association-model for binary VLE of alcohol/hydrocarbon and amine/hydrocarbon mixtures, 19:19151 (R;US)

BINARY-FLUID SYSTEMS
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a 10MW-class plant), 19:18388 (IA;JP;In Japanese)

BIOADSORBENTS
Using fungi and bacteria to extract pollutants from solid wastes, 19:18978 (RA;US)

BIOCENOSES
See ECOSYSTEMS

BIOGAS
See METHANE

BIOGEOCENOSES
See ECOSYSTEMS

BIOLOGICAL MATERIALS
A low temperature scanning force microscope for biological samples, 19:19125 (R;US)

BIOLOGICAL RADIATION EFFECTS
See also RADIATION INJURIES
Radiation effects blamed on Chernobyl, 19:19847 (IA;DE;In German)

BIOLOGICAL REACTORS
See BIOREACTORS

BIOMASS
Biomass and morphology of Pinus ponderosa exposed to long-term elevated atmospheric CO_2 concentrations, 19:19789 (RA;US)
Effects of elevated atmospheric CO_2 concentrations and water stress on field-grown maize: Biomass production and water-use efficiency, 19:19792 (RA;US)
Energy analysis of biofuels from winter wheat, rape seed and salix, 19:18893 (R;SE;In Swedish)
Energy analysis of reed canary grass for solid fuel and ley for biogas, 19:18894 (R;SE)
Estimates of US biomass energy consumption 1992, 19:18319 (R;US)
IEA Bioenergy. Annual report 1993, 19:18865 (R;SE)
Integrated gasification combined cycle and steam injection gas turbine powered by biomass joint-venture evaluation, 19:18320 (R;US)
Process evaluation of the Regional Biomass Energy Program, 19:18321 (R;US)
Structural and compositional transformations of biomass chars during combustion, 19:18318 (R;US)
The American farm: Harnessing the sun to fuel the world, 19:18302 (R;US)
Water use and water-use efficiency of ponderosa pine exposed to long-term elevated atmospheric CO_2 concentrations, 19:19796 (RA;US)

BIOMIMETIC PROCESSES
Dynamic structural effects and ultrafast biomolecular kinetics in photoinduced charge transfer reactions: Three year progress report, March 15, 1991–May 14, 1994, 19:19159 (R;US)

Intramolecular energy transfer reactions in polymetallic complexes.: Progress report, 1991–1992, 19:19130 (R;US)
[Resonance Raman spectroscopy of metalloporphyrins and photoreaction centers]: Final report, 19:19160 (R;US)

BIOREACTORS
Biological determinants of photobioreactor design: Second quarterly report, December 1, 1993-February 28, 1994, 19:18355 (R;US)
Development of Biological Coal Gasification (MicGAS Process): Topical report, July 1991–February 1993, 19:17773 (R;US)
High pressure synthesis gas conversion: Final report, 19:18336 (R;US)

BIOTECHNOLOGY
Overview of patent protection in the context of other intellectual property protection, 19:18884 (RA;US)

BIRDS
1993 study of long-billed curlews on the Yakima Training Center, 19:19622 (R;US)
Sage grouse on the Yakima Training Center: A summary of studies conducted during 1991 and 1992, 19:19621 (R;US)
Vegetation survey of knapweed on the Yakima Training Center - 1992, 19:19620 (R;US)

BISMUTH 209 REACTIONS
Flow effects in Bi + Pb collisions at 1 GeV/u, 19:20134 (R;DE)

BISMUTH 209 TARGET
Cross section measurements of ^{6}He-induced fission of bismuth, 19:20191 (IA;RU)
Subthreshold antiproton and K^- production in heavy ion collisions, 19:20142 (R;DE)

BITUMINOUS COAL
Floatabilities of treated coal in water at room temperature: Annual topical report, September 1992–August 1993, 19:17748 (R;US)
Liquid chromatographic analysis of coal surface properties: Quarterly progress report, January–March 1994, 19:17747 (R;US)
Novel microorganism for selective separation of coal from ash and pyrite: Second quarterly technical progress report, 1 December 1993–28 February 1994, 19:17818 (R;US)
Protocols for the selective cleavage of carbon-sulfur bonds in coal: Final technical report, September 1, 1992–December 31, 1993, 19:17812 (R;US)
Thermodynamic properties of pulverized coal during rapid heating devolatilization processes: Quarterly progress report, October–December 1993, 19:17836 (R;US)

BLACK LIQUORS
See SPENT LIQUORS

BLADDER
Absorbed dose intercomparison in Sweden. Radiation treatment units and absorbed dose specification in an anatomical phantom, 19:19853 (RA;XA)

BLANKETS (BREEDING)
See BREEDING BLANKETS

BLAST FURNACES
On modeling and estimation of the blast furnace stack, 19:18960 (R;FI)

BLASTS
See EXPLOSIONS

BLENDERS

BLOOD FLOW
Development of skin surface radiation detector system to monitor radioactivity in arterial blood with positron emission tomography, 19:19778 (RA;JP)

BNL
Brookhaven highlights: Report on research, October 1, 1992–September 30, 1993, 19:19315 (R;US)

BODY BURDEN
Post-Chernobyl wholebody measurements, 19:19846 (IA;DE;In German)

BOILERS
See also FLUIDIZED BED BOILERS
The coal quality expert: A focus on slagging and fouling, 19:17884 (RA;US)

BOILING WATER COOLED AND MODERATED REACTOR
See BWR TYPE REACTORS

BOLOMETERS
Neutron transmutation doped natural and isotopically engineered germanium thermistors, 19:19486 (R;US)

BOM-ERDA PROCESS
See DESULFURIZATION

BONDING
Diffusion bonding of superplastic aluminum alloys, 19:19053 (R;US)

BONE MARROW
Evaluation of the contribution of three-phase scintigraphy of the skeleton to the diagnosis of diffuse tumorous disease of a bone (or bone marrow), 19:19745 (IA;CZ;In Slovak)
Proliferation ability of central immunological organ cells treated with low doses by different radiators, 19:19839 (R;CN;In Chinese)

BONE MARROW CELLS
Regulated expression of the MRP8 and MRP14 genes during terminal differentiation of human promyelocytic leukemic HL-60 cells, 19:19674 (R;US)

BONES
See SKELETON

BONNEVILLE POWER ADMINISTRATION
Draft Environmental Impact Statement: BPA/Puget Power Northwest Washington Transmission Project, 19:18813 (R;US)
Environmental assessment and finding of no significant impact: Hungry Horse–Columbia Falls line rebuild and relocation project, 19:18817 (R;US)
Inspection of surveillance activities and administrative leave policy at Bonneville Power Administration, Portland, Oregon, 19:20487 (R;US)

BOOSTERS (PARTICLE)
See PARTICLE BOOSTERS

BOREHOLES
Studies on drilling method for geothermal well and on downhole coaxial heat exchanger system, 19:18404 (IA;JP)
Study on geothermal well drilling technology, 19:18398 (IA;JP;In Japanese)

BORON 10
Nuclear structure of ^{10}B studied with (e,e'), (π,π') and (γ,π) reactions, 19:20066 (R;US)

BORON IONS
A Monte Carlo model of boron diffusion in an argon plasma, 19:20289 (IA;AU)

BORON OXIDES
Oil recovery improvement through profile modification by thermal precipitation: Final report, October 1, 1991–August 27, 1993, 19:17912 (R;US)

BOROSILICATE GLASS
Constraints on the affinity term for modeling long-term glass dissolution rates, 19:18135 (R;US)
Disposition of actinides released from high-level waste glass, 19:17997 (R;US)

BOROSILICATES
See BOROSILICATE GLASS

BOSE-EINSTEIN GAS
Quasi-particle description of a strongly interacting pion gas, 19:20003 (R;DE)

BOTTOM MESONS

Membrane processes for removal of hydrogen sulfide from natural gas, 19:17938 (R;US)

Solvent Properties
Selective chelation and extraction of lanthanides and actinides with supercritical fluids, 19:18224 (R;US)

CARBON DIOXIDE ACCEPTOR PROCESS
See COAL GASIFICATION

CARBON MONOXIDE
A new comprehensive reaction mechanism for combustion of hydrocarbon fuels, 19:19181 (R;US)
Analysis of mid-tropospheric carbon monoxide data using a three- dimensional Global atmospheric Chemistry numerical Model, 19:19558 (R;US)

CARBON STEELS
Basic tests on 48Y-Cylinder for integrity evaluation, 19:19215 (IA;JP)
Corrosion considerations for life management of Hanford high-level waste tanks, 19:18144 (R;US)
Estimates of durability of TMI-2 core debris canisters and cask liners, 19:19047 (R;US)
Hanford high-level waste evaporator/crystallizer corrosion evaluation, 19:18145 (R;US)

CARBON SULFIDES
Gasoline from natural gas by sulfur processing: Quarterly technical progress report No. 2, October 1, 1993–December 31, 1993, 19:18340 (R;US)

CARBON TETRACHLORIDE
Accelerated line-by-line calculations for the radiative transfer of trace gases related to climate studies: Progress report No. 1, 15 September 1993–14 September 1994, 19:19530 (R;US)
Comparative efficiency of microbial systems for destroying carbon tetrachloride contamination in Hanford groundwater, 19:19623 (R;US)
Use of an Open-path FTIR sensor to measure VOCs at the Hanford Site, 19:18253 (R;US)

CARBOXYLIC ACID ESTERS
Identification of subsurface microorganisms at Yucca Mountain: Third quarterly report, January 1, 1994–March 31, 1994, 19:18184 (R;US)

CARCINOGENESIS
Carcinogenicity and antitumor activity of metal ions, 19:19885 (RA;JP;In Japanese)

CARCINOMAS
Acquisition of patient data, anatomical data, 19:19713 (RA;XA)
The impact of quality assurance on the optimization of tumour control probability, 19:19703 (RA;XA)
What accuracy is needed in dosimetry, 19:19850 (RA;XA)
Which parameters of the dose distribution are best related to the radiation response of tumours and normal tissues?, 19:19702 (RA;XA)

CARDIOVASCULAR AGENTS
Role of thyroid hormones and adenopituitary in compensatory reactions at blood circulation insufficiency, 19:19801 (IA;UA;In Ukrainian)

CARDIOVASCULAR DISEASES
Diagnostic significance of radiation methods in thyroid diseases investigation, 19:19756 (IA;UA;In Ukrainian)

CARL STILL PROCESS
See DESULFURIZATION

CAROTENOIDS
Chlorophyll and carotenoid concentrations in two varieties of Pinus ponderosa seedlings subjected to long-term elevated carbon dioxide, 19:19790 (RA;US)
Picosecond laser induced electric field modulation of carotenoid absorption bands, 19:18351 (R;US)

CASKS
See also SPENT FUEL CASKS

Alpha-Bearing Wastes
Dynamic fracture toughness and evaluation of fracture in a ferritic nodular cast iron for casks, 19:19039 (IA;JP)
Elevated temperature tensile properties of borated 304 stainless steel: Effect of boride dispersion on strength and ductility, 19:19040 (IA;JP)

Depleted Uranium
Incentives for the use of depleted uranium alloys as transport cask containment structure, 19:19210 (IA;JP)
Design
A revision of the cask designers guide for the '90s, 19:19208 (IA;JP)
Fbr Type Reactors
Shielding test of a model for FBR irradiation fuel transport cask, 19:19201 (IA;JP)
High-Level Radioactive Wastes
Demonstration test for transporting vitrified high-level radioactive wastes: 0.3-m free-drop test, 19:19228 (IA;JP)
Experimental and analytical study for demonstration program on shielding of casks for high-level wastes, 19:19202 (IA;JP)
Impact Strength
A method for comparing impacts with real targets to impacts onto the IAEA unyielding target, 19:19217 (IA;JP)
Impact Tests
9 m side drop test of scale model, 19:19226 (IA;JP)
Demonstration test for transporting vitrified high-level radioactive wastes: 0.3-m free-drop test, 19:19228 (IA;JP)
GA-4/GA-9 honeycomb impact limiter tests, 19:19220 (IA;JP)
Multi-wall cask advantages with quarter-scale model drop test results for the NAC-STC Storable Transport Cask, 19:19227 (IA;JP)
Leak Testing
Evaluation method of gas leakage from casks, 19:19198 (IA;JP)
Mechanical Properties
Status of the Beneficial Uses Shipping System cask (BUSS), 19:17989 (R;US)
Multi-Parameter Analysis
Status of the Beneficial Uses Shipping System cask (BUSS), 19:17989 (R;US)
Radioactive Materials
A method for comparing impacts with real targets to impacts onto the IAEA unyielding target, 19:19217 (IA;JP)
Evaluation method of gas leakage from casks, 19:19198 (IA;JP)
Radioactive Waste Storage
Development of transport and long-term storage casks for spent fuel with high enrichment and high burn up, 19:19190 (IA;JP)
Rail Transport
Comparison of elastic and inelastic analyses, 19:19209 (IA;JP)
Rings
Comparison of elastic and inelastic analyses, 19:19209 (IA;JP)
Safety
Developments in shielding and criticality assessment for cask design, 19:19200 (IA;JP)
Shielding
Experimental and analytical study for demonstration program on shielding of casks for high-level wastes, 19:19202 (IA;JP)
Shielding test of a model for FBR irradiation fuel transport cask, 19:19201 (IA;JP)
Source Terms
STACE: source term analyses for containment evaluations of transport casks, 19:19196 (IA;JP)
Spent Fuels
9 m side drop test of scale model, 19:19226 (IA;JP)
Development of transport and long-term storage casks for spent fuel with high enrichment and high burn up, 19:19190 (IA;JP)
Developments in shielding and criticality assessment for cask design, 19:19200 (IA;JP)
GA-4/GA-9 honeycomb impact limiter tests, 19:19220 (IA;JP)
The use of burnup credit for spent fuel cask design, 19:19187 (IA;JP)
Thermal testing of solid neutron shielding materials, 19:19098 (IA;JP)
Thermal Testing
Study on thermal testing of RY-I type transport cask for spent fuels, 19:19182 (R;CN;In Chinese)
Waste Transportation
Multi-wall cask advantages with quarter-scale model drop test results for the NAC-STC Storable Transport Cask, 19:19227 (IA;JP)
STACE: source term analyses for containment evaluations of transport casks, 19:19196 (IA;JP)

CAST IRON
Dynamic fracture toughness and evaluation of fracture in a ferritic nodular cast iron for casks, 19:19039 (IA;JP)
Is ductile cast iron ductile at -40degC ?, 19:19038 (IA;JP)

CASTE (INSECTS)
See OCCUPATIONS

CASTING MOLDS
Advances in rapid prototyping, 19:19050 (R;US)

CAT SCANNING
Pseudo-3-dimensional (3D) imaging of cold nodes, 19:19742 (IA;CZ;In Czech)

CAT-OX PROCESS
See DESULFURIZATION

CATACARB CARBON DIOXIDE REMOVAL PROCESS
See DESULFURIZATION

CATACARB PROCESS
See DESULFURIZATION

CATACLYSMIC VARIABLE STARS
See ERUPTIVE VARIABLE STARS

CATALYSIS
Superacid catalysis of light hydrocarbon conversion: Second quarterly report, November 25, 1993–February 26, 1994, 19:19141 (R;US)

CATALYSTS
See also ELECTROCATALYSTS
Catalyst and process development for synthesis gas conversion to isobutylene: Quarterly report, April 1, 1993–June 30, 1993, 19:18334 (R;US)
Superacid catalysis of light hydrocarbon conversion: Second quarterly report, November 25, 1993–February 26, 1994, 19:19141 (R;US)
Bioconversion
Microbial recovery of metals from spent coal liquefaction catalysts: Quarterly report, October 1993–December 1993, 19:17807 (R;US)
Chemical Preparation
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 13, October 1, 1992–December 31, 1992, 19:17780 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 11, April 1, 1992–June 30, 1992, 19:17778 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 12, July 1, 1992–September 30, 1992, 19:17779 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 10, January 1, 1992–March 31, 1992, 19:17777 (R;US)
Development of improved iron Fischer-Tropsch catalysts: Final technical report: Project 6464, 19:17776 (R;US)
Direct catalytic decomposition of nitric oxide: Quarterly technical progress report No. 8, July–September 1993, 19:18457 (R;US)
Ethanol synthesis and water gas shift over bifunctional sulfide catalysts: Technical progress report, September 1993–November 1993, 19:17803 (R;US)
Superior catalysts for selective catalytic reduction of nitric oxide: Quarterly technical progress report, 1 January 1994–31 March 1994, 19:17854 (R;US)
Chemical Radiation Effects
Radiation influencing of catalytic activity and reactivity of two-component mixed oxides, 19:19162 (RA;CZ)
Comparative Evaluations
Gasoline from natural gas by sulfur processing: Quarterly technical progress report No. 2, October 1, 1993–December 31, 1993, 19:18340 (R;US)
Rate enhancement for catalytic upgrading coal naphthas: Quarterly report, April–June 1993, 19:17800 (R;US)
Diffusion
Hindered diffusion of coal liquids: Quarterly report No. 5, September 18, 1993–December 17, 1993, 19:17813 (R;US)

Materials Recovery
Microbiological recovery of metals from spent coal liquefaction catalysts: Quarterly status report, January–March 1993, 19:17850 (R;US)

Materials Testing
Fundamental and exploratory studies of catalytic steam gasification of carbonaceous materials: Final report, fiscal years 1985–1994, 19:17821 (R;US)

Performance Testing
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 13, October 1, 1992–December 31, 1992, 19:17780 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 14, January 1, 1993–March 31, 1993, 19:18332 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 12, July 1, 1992–September 30, 1992, 19:17779 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 11, April 1, 1992–June 30, 1992, 19:17778 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 10, January 1, 1992–March 31, 1992, 19:17777 (R;US)
Development of improved iron Fischer-Tropsch catalysts: Final technical report: Project 6464, 19:17776 (R;US)
Direct catalytic decomposition of nitric oxide: Quarterly technical progress report No. 8, July–September 1993, 19:18457 (R;US)
Ethanol synthesis and water gas shift over bifunctional sulfide catalysts: Technical progress report, September 1993–November 1993, 19:17803 (R;US)
Iron hydrous titanium oxide catalysts for the dehydrogenation of ethylbenzene to styrene, 19:19155 (R;US)
Technology development for iron Fischer-Tropsch catalysts: Technical progress report No. 11, March 26, 1993–June 26, 1993, 19:17783 (R;US)

Permeability
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, 20 December 1993–20 March 1994, 19:17805 (R;US)

Pore Structure
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, 20 December 1993–20 March 1994, 19:17805 (R;US)

Production
The relationship between hydroxyl groups on oxide surfaces and the properties of supported metals: Progress report, June 1, 1992–January 31, 1994, 19:19033 (R;US)

Promoters
Methyl chloride via oxyhydrochlorination of methane: Quarterly technical progress report No. 7, April–June 1993, 19:19137 (R;US)

Regeneration
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, June 20, 1993–September 20, 1993, 19:17804 (R;US)

Research Programs
Design of a high activity and selectivity alcohol catalyst: Eleventh quarterly report, February 7, 1993–May 7, 1993, 19:19135 (R;US)
Metal cluster alloys and oxides: Elucidating structural and electronic effects in governing the reactivity and catalytic role of matter in finite dimensions: Progress report, December 2, 1992–December 10, 1993, 19:19131 (R;US)

Surface Area
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, June 20, 1993–September 20, 1993, 19:17804 (R;US)

CATALYTIC-IFP AMMONIA SCRUBBING PROCESS
See DESULFURIZATION

CAVITY RESONATORS
See also SUPERCONDUCTING CAVITY RESONATORS
ANT tuner retrofit for LEB cavity, 19:19404 (R;US)

CBA PROCESS
See DESULFURIZATION

CCD
See CHARGE-COUPLED DEVICES

CEBAF ACCELERATOR
Beam energy absolute measurement using K-edge absorption spectrometers, 19:19331 (R;US)

CELL DIFFERENTIATION
Regulated expression of the MRP8 and MRP14 genes during terminal differentiation of human promyelocytic leukemic HL-60 cells, 19:19674 (R;US)
Regulated expression of the MRP8 and MRP14 genes in human promyelocytic leukemic HL-60 cell treated with the differentiation-inducing agents mycophenolic acid and 1α,25-Dihydroxyvitamin D_3, 19:19675 (R;US)

CELL PROLIFERATION
Increased IMP dehydrogenase gene expression in solid tumor tissues and tumor cell lines, 19:19673 (R;US)

CELLS (BACTERIAL)
See BACTERIA

CELLS (REACTOR)
See REACTOR CELLS

CELLULASE
The study of redox-active inorganic substituents of cellulase enzymes: Quarterly report, 25 August–25 November 1993, 19:18310 (R;US)

CELLULASES
See CELLULASE

CELLULOSE
A method and apparatus for making continuous-reinforced thermoplastic/cellulose composites from recycled materials, 19:18996 (RA;US)

CEMENTS
See also PORTLAND CEMENT
Durability of concrete materials in high-magnesium brine, 19:19079 (R;US)
Study on immobilization of high level waste with alkali-activated slag cement, 19:18007 (R;CN;In Chinese)

CENTRAL REGION
See USA

CERAMIC MELTERS
Program plan: DWPF/HLWDP stirred Melter Program Plan, 19:18172 (R;US)

CERAMICS
Classification of Japanese Granitic rocks and clays by K, Ca, Rb, Sr and its application to archaeology, 19:19604 (RA;JP)
Fracture mechanical treatment of bridging stresses in ceramics, 19:19073 (R;DE)
Laser-ultrasound characterization of spherical objects: G.L. report No. 5097, 19:19288 (R;US)
Phosphate bonded ceramics as candidate final-waste-form materials, 19:18002 (R;US)

CERCLA
See US SUPERFUND

CERIUM ARSENIDES
Crystal field splitting in CeAs and CeP under high pressure, 19:20257 (RA;JP)

CERIUM PHOSPHIDES
Crystal field splitting in CeAs and CeP under high pressure, 19:20257 (RA;JP)

CERN
CERN Heavy-Ion Facility design report, 19:19345 (R;XC)

CERN AG SYNCHROTRON

CERN LEAR
The replacement of touch-terminal consoles of the CERN antiproton accumulator complex (AAC) by office PC's as well as X-windows based workstations, 19:19387 (RA;JP)

CERN PS SYNCHROTRON
General man-machine interface used in accelerators controls: Some applications in CERN-PS control systems rejuvenation, 19:19386 (RA;JP)
Replacing PS controls front end minicomputers by VME based 32-bit processors, 19:19371 (RA;JP)
Workstations as consoles for the CERN-PS complex, setting-up the environment, 19:19385 (RA;JP)

CERN SPS SYNCHROTRON
An open software system based on X Windows for process control and equipment monitoring, 19:19391 (RA;JP)
Time and load measuring in the SPS/LEP Control System, 19:19363 (RA;JP)

CERNAVODA-1 REACTOR
The living PSA concept for the Cernavoda NPP, 19:18524 (RA;XA)

CESIUM
Field test of the Rapid Transuranic Monitoring Laboratory, 19:18053 (R;US)

CESIUM 134
Environmental radioactivity in the North Atlantic region including the Faroe Islands and Greenland. 1990 and 1991, 19:19625 (R;DK)
Model for transfer of cesium and strontium to domestic animal products as a consequence of accidental deposition on ground, 19:19807 (R;FI;In Finnish)
Proliferation ability of central immunological organ cells treated with low doses by different radiators, 19:19839 (R;CN;In Chinese)

CESIUM 137
Environmental radioactivity in the North Atlantic region including the Faroe Islands and Greenland. 1990 and 1991, 19:19625 (R;DK)
In-situ γ spectrometry of the Chernobyl fallout using soil-sample independent corrections for surface roughness and migration: Results from measurement campaigns in high contamination areas in Sweden, Russia and Ukraine, 19:19629 (R;SE)
Material accumulation in shallow sea. 2: Radionuclides in the Seto Inland Sea, 19:19659 (RA;JP;In Japanese)
Model for transfer of cesium and strontium to domestic animal products as a consequence of accidental deposition on ground, 19:19807 (R;FI;In Finnish)
Study on movement, accumulation and distribution of ^{137}Cs in rice and soils, 19:19579 (R;CN;In Chinese)

CFC

METHYL CHLORIDE
Analysis and evaluation of VOC removal technologies demonstrated at Savannah River, 19:19630 (R;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Fourth quarter 1993 and 1993 summary, 19:18193 (R;US)

CHLORINATION
Methyl chloride via oxyhydrochlorination of methane: Quarterly technical progress report No. 7, April–June 1993, 19:19137 (R;US)

CHLORINE
Reaction of uranium oxides with chlorine and carbon or carbon monoxide to prepare uranium chlorides, 19:17949 (R;US)

CHLORINE CHLORIDES
See CHLORINE

CHLOROBUTADIENE
See NEOPRENE

CHLOROFLUOROCARBONS
Accelerated line-by-line calculations for the radiative transfer of trace gases related to climate studies: Progress report No. 1, 15 September 1993–14 September 1994, 19:19530 (R;US)

CHLOROPHYLL
Chlorophyll and carotenoid concentrations in two varieties of Pinus ponderosa seedlings subjected to long-term elevated carbon dioxide, 19:19790 (RA;US)
Femtosecond transient grating studies of electron transfer in porphyrin and chlorophyll donor-acceptor molecules, 19:18353 (R;US)
Solvent effects on the energetics and dynamics of ultrafast electron transfer in chlorophyll-porphyrin-acceptor triads, 19:18354 (R;US)

CHLOROPHYLL-BINDING PROTEINS
Femtosecond transient absorption studies of the light harvesting Chl a/b protein complex of Photosystem II in higher plants, 19:18352 (R;US)

CHLOROPRENE
See NEOPRENE

CHO CELLS
Metaphase chromosome and nucleoid differences between CHO-K1 and its radiosensitive derivative xrs-5, 19:19811 (R;US)

CHONDRITES
A possible origin of EL6 chondrites from a high temperature-high pressure solar gas, 19:19930 (R;US)
On the origin of porphyritic chondrules, 19:19931 (R;US)

CHROMIUM ALLOYS
Investigation of moisture-induced embrittlement of iron aluminides: Interim report, 19:19046 (R;US)
Irradiation-related amorphization and crystallization: In situ transmission electron microscope studies, 19:19027 (R;US)
CHROMIUM COMPOUNDS
See also CHROMIUM OXIDES
Depth-resolved determination of heavy metal components in welding fume, 19:19124 (R;DE;In German)
Structure-phase state of thick amorphous and microcrystalline chromium-carbon films deposited by ion-plasma sputtering., 19:19101 (R;UA)
CHROMIUM OXIDES
Characterization and processing of sintered products from Nano-crystalline powders generated by the RTDS method, 19:19076 (R;US)
Superior catalysts for selective catalytic reduction of nitric oxide: Quarterly technical progress report, 1 January 1994–31 March 1994, 19:17854 (R;US)
CHROMODYNAMICS
See QUANTUM CHROMODYNAMICS
CHRYSENE
[Mass spectrometric analysis of polycyclic aromatic hydrocarbons adducted to DNA]: Final report, 19:19905 (R;US)
CIRCUITS (ELECTRONIC)
See ELECTRONIC CIRCUITS
CIRCULATING FLUIDIZED BED BOILERS
See CIRCULATING SYSTEMS
FLUIDIZED BED BOILERS
CIRCULATING SYSTEMS
Development of hot dry rock power generation technology, 19:18395 (IA;JP)
CISTRONS
See GENES
CITIES
See URBAN AREAS
CITREX PROCESS
See DESULFURIZATION
CLAMS
Dungeness crab and razor clam surveys at sites near Grays Harbor, Washington, and at Willapa Bay bar entrance, September 1993, 19:19662 (R;US)
CLAYS
See also BENTONITE
Structural analysis of closure cap barriers: A pre-test study for the Bentonite Mat Demonstration Project: Revision 1, 19:19110 (R;US)
Three-dimensional measurements of horizontal bore-hole, 19:18004 (R;BE;In Dutch)
CLEAN AIR ACTS
NESHAPs compliance tasks for the PUREX plant, 19:19573 (R;US)
Synergies and conflicts in multimedia pollution control related to utility compliance with Title IV of the Clean Air Act Amendments of 1990, 19:18432 (R;US)
CLEAN WATER ACTS
Planning for NPDES Permit compliance to meet changing stream standards at Los Alamos National Laboratory, 19:18849 (R;US)
CLEANAIR PROCESS
See DESULFURIZATION
CLERICAL PERSONNEL
See PERSONNEL
CLIMATE MODELS
Analysis of mid-tropospheric carbon monoxide data using a three- dimensional Global atmospheric Chemistry numerical Model, 19:19558 (R;US)
CLIMATES
See also MICROCLIMATES
Site Scientific Mission Plan for the Southern Great Plains CART site: January–June 1994, 19:19525 (R;US)
CLIMATIC CHANGE
See also GREENHOUSE EFFECT
Clean coal technologies and global climate change, 19:18442 (RA;US)
Four essays on the economics of climate change - with a supplement, 19:18830 (R;NO)
Proceedings: international symposium on global change (IGBP), 19:19539 (I;JP)
Travel to Germany to participate in an overview of Global Analysis, Interpretation, and Modeling Task Force activities: Foreign trip report, March 14–19, 1994, 19:19550 (R;US)
Trip report for oceanography forum in Japan and abstracts from workshop on global change held in Oakland, California: Foreign trip report, September 27–30, 1993, 19:19531 (R;US)
CLOSED PLASMA DEVICES
See also STELLARATORS
TOKAMAK DEVICES
TOROIDAL PINCH DEVICES
Flux-minimizing curves through islands, 19:20392 (IA;AU)
CLOSTRIDIUM
High pressure synthesis gas conversion: Final report, 19:18336 (R;US)
CLOUD COVER
The Atmospheric Radiation Measurement Program and interfaces with external data sources, 19:19557 (R;US)
CLOUDINESS (METEOROLOGY)
See CLOUD COVER
CLOUDS
A stratiform cloud parameterization for General Circulation Models, 19:19562 (R;US)
ARM: A climate process observatory, 19:19556 (R;US)
Anthropogenic sulfate and organic aerosols, CCN, and cloud project concentration at a marine site, 19:19569 (R;US)
Efficient light propagation for multiple anisotropic volume scattering, 19:19570 (R;US)
Factors influencing the parameterization of anvil clouds within GCMs: Revision 1, 19:19568 (R;US)
Proceedings of the third Atmospheric Radiation Measurement (ARM) science team meeting, 19:19526 (R;US)
Selected translated abstracts of Russian-language climate-change publications: II, Clouds: Issue 159, 19:19549 (R;US;In English, Russian)
Two-channel microwave radiometer for observations of total column precipitable water vapor and cloud liquid water path, 19:19553 (R;US)
CLUSTERS (SOLID)
See SOLID CLUSTERS
COAL
See also COAL FINES
SUBBITUMINOUS COAL
Anaerobic Digestion
Anaerobic biprocessing of low rank coals: Final technical report, September 12, 1990–August 10, 1993, 19:17782 (R;US)
Ashes
Field study of disposed wastes from advanced coal processes: Quarterly technical progress report, October–December 1993, 19:17844 (R;US)
Atomization
Rheological properties essential for the atomization of coal water slurries (CWS): Quarterly progress report, September 15, 1993–December 15, 1993, 19:17833 (R;US)
Bioconversion
Large scale solubilization of coal and bioconversion to utilizable energy: Quarterly technical progress report, September–December 1993, 19:17820 (R;US)
Biodegradation
Anaerobic biprocessing of low rank coals: Final technical report, September 12, 1990–August 10, 1993, 19:17782 (R;US)
Biotic and abiotic carbon to sulfur bond cleavage: Final report, 19:17785 (R;US)
Development of Biological Coal Gasification (MicGAS Process): Topical report, July 1991–February 1993, 19:17773 (R;US)
Catalysis
Catalysis and co-catalysis of bond cleavages in coal and coal analogs: Final report, August 1, 1990–January 31, 1994, 19:17786 (R;US)

Chemical Composition
Combustion characterization of beneficiated coal-based fuels: Quarterly report No. 7, October 1990–December 1990, 19:17745 (R;US)
Passamaquoddy technology recovery scrubber™: Volume 2, Final report: Appendices A-M, 19:18449 (R;US)

Cleaning
CCT deployment considerations, 19:17740 (RA;US)
Coal and public perceptions, 19:17738 (RA;US)
Development of a gas-promoted oil agglomeration process: Technical progress report, December 1, 1993–February 28, 1994, 19:17816 (R;US)
EPRI outreach program approach and accomplishments, 19:17739 (RA;US)
Implementing section 1332, Energy Policy Act of 1992, 19:17741 (RA;US)
Rosebud SynCoal® partnership advanced coal conversion process demonstration project, 19:17742 (RA;US)
Self-scrubbing coal: An integrated approach to clean air, 19:17743 (RA;US)
The Healy Clean Coal Project: Design verification tests, 19:17744 (RA;US)

Coal Preparation
Combustion characterization of beneficiated coal-based fuels: Quarterly report No. 7, October 1990–December 1990, 19:17745 (R;US)

Cocombustion
Emissions of organic chloro-compounds in combustion, 19:19519 (RA;FI)

Combustion
Combustion fume structure and dynamics: [Quarterly report], July 16, 1992–September 15, 1993, 19:17892 (R;US)
Combustion of pulverized coal in vortex structures: Quarterly progress report No. 1, October 1, 1993–December 31, 1993, 19:17898 (R;US)
Feasibility study for an advanced coal fired heat exchanger/gas turbine topping cycle for a high efficiency power plant: Technical report, April 1, 1993–June 30, 1993, 19:19004 (R;US)
Feasibility study for an advanced coal fired heat exchanger/gas turbine topping cycle for a high efficiency power plant: Technical report, January 1, 1993–March 31, 1993, 19:19003 (R;US)
Poland's Clean Fossil Fuels and Energy Efficiency Program: Foreign trip report, February 14–24, 1994, 19:18444 (R;US)
Radiation-turbulence interactions in pulverized-coal flames: Quarterly reports I and II, September 15, 1993–March 15, 1994, 19:17897 (R;US)

Combustion Products
Fundamental study of ash formation and deposition: Effect of reducing stoichiometry: Quarterly report No. 3, October 1, 1993–December 31, 1993, 19:17749 (R;US)

Combustion Properties
Combustion characterization of beneficiated coal-based fuels: Quarterly report No. 7, October 1990–December 1990, 19:17745 (R;US)

Comparative Evaluations
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, January 2, 1992–March 31, 1992, 19:17768 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, April 1, 1992–June 30, 1992, 19:17770 (R;US)

Coprocessing
Bench-Scale Co-Processing, 19:17774 (R;US)
Bench-scale co-processing: Quarterly report No. 16, April 1, 1992–June 30, 1992, 19:17927 (R;US)
The role of the resid solvent in coprocessing with finely divided catalysts: Quarterly report, October–December 1993, 19:17797 (R;US)

Cross-Linking
Investigation of coal structure: Quarterly report, July 1, 1993–September 30, 1993, 19:17830 (R;US)

Data Base Management
Maintenance of the coal sample bank and database: Quarterly technical progress report, September 29, 1993–December 28, 1993, 19:17840 (R;US)

Decarboxylation
Anaerobic biprocessing of low rank coals: Final technical report, September 12, 1990–August 10, 1993, 19:17782 (R;US)

Desulfurization
Biotic and abiotic carbon to sulfur bond cleavage: Final report, 19:17785 (R;US)
Development of enhanced sulfur rejection processes: Third quarterly technical progress report, April 1, 1993–June 31, 1993, 19:17751 (R;US)
Studies of incipient oxidation of pyrite for improved rejection: Fifth quarterly technical progress report, October 1, 1993–December 31, 1993, 19:17754 (R;US)

Dissolution
Large scale solubilization of coal and bioconversion to utilizable energy: Quarterly technical progress report, September–December 1993, 19:17820 (R;US)

Drying
Rosebud SynCoal® partnership advanced coal conversion process demonstration project, 19:17742 (RA;US)

Electron Spin Resonance
Magnetic relaxation: Coal swelling, extraction, pore size: Quarterly technical progress report, January 1, 1994–March 31, 1994, 19:17834 (R;US)
Molecular accessibility in oxidized and dried coals: Quarterly report, [January–March 1994], 19:17841 (R;US)

Flotation
Liquid chromatographic analysis of coal surface properties: Quarterly progress report, October–December 1993, 19:17746 (R;US)
New concept for coal wettability evaluation and modulation: Technical progress report, January 1, 1994–March 31, 1994, 19:17753 (R;US)

Fluidized-Bed Combustion
Bed material agglomeration during fluidized bed combustion: Technical progress report, October 1, 1993–December 31, 1993, 19:17895 (R;US)
Development of fireside performance indices, Task 7.33, Development of methods to predict agglomeration and deposition in FBCS, Task 7.36, Enhanced air toxics control, Task 7.45, 19:17827 (R;US)
Fluid dynamics of pressurized, entrained coal gasifiers: Second quarterly technical progress report, January 1, 1994–March 31, 1994, 19:17819 (R;US)
Measurement of alkali vapors in PFBC exhaust: Final report, 19:19494 (R;US)
Midwest Power's perspective of circulating PFBC, 19:17890 (R;US)
Pressurized circulating fluidized bed combustion research, 19:17880 (RA;FI)
Stochastic analysis of nitrous oxide (NO_x) formation and control in a second-generation pressurized fluidized-bed electric generation plant, 19:17891 (R;US)
Tidd PFBC demonstration project: Quarterly report, October–December 1993, 19:17889 (R;US)
Volatiles combustion in fluidized beds: Technical progress report, 4 December 1993–7 March 1994, 19:17896 (R;US)

Hydraulic Transport
Multiphase flow problems in coal log pipeline, 19:17860 (RA;US)

Nmr Spectra
Two dimensional NMR and NMR relaxation studies of coal structure: Progress report, October 1, 1993–December 31, 1993, 19:17832 (R;US)

Nuclear Magnetic Resonance
Mitigating crosslinking reactions through preconversion strategies: [Quarterly report, October–December 1993], 19:17765 (R;US)

Oxidation
Molecular accessibility in oxidized and dried coals: Quarterly report, [January–March 1994], 19:17841 (R;US)

Oxidation of coal and coal pyrite mechanisms and influence on surface characteristics: Technical progress report, December 31, 1993, 19:17829 (R;US)

Pyrolysis
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, April 1, 1992–June 30, 1992, 19:17770 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, January 2, 1992–March 31, 1992, 19:17768 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, July 1, 1992–September 30, 1992, 19:17769 (R;US)
Development of an advanced, continuous mild gasification process for the production of co-products: Quarterly report, October–December 1993, 19:17771 (R;US)

Quality Assurance
Development of fireside performance indices, Task 7.33, Development of methods to predict agglomeration and deposition in FBCS, Task 7.36, Enhanced air toxics control, Task 7.45, 19:17827 (R;US)

Radiant Heat Transfer
Determining the radiative properties of pulverized-coal particles from experiments: Final report, 19:17828 (R;US)
The scattering phase function coefficients of pulverized-coal particles in flames, 19:19255 (R;US)

Resins
Refining of fossil resin flotation concentrate from Western coal: Fourth quarterly final report, October 1, 1993–December 31, 1993, 19:17839 (R;US)
Refining of fossil resin flotation concentrate from Western coal: Second quarterly final report, April 1, 1993–June 30, 1993, 19:17837 (R;US)
Refining of fossil resin flotation concentrate from Western coal: Third quarterly final report, July 1, 1993–September 30, 1993, 19:17838 (R;US)
Selective flotation of fossil resin from Western coal: Final report, July 1, 1990–May 25, 1992, 19:19097 (R;US)

Scattering
The scattering phase function coefficients of pulverized-coal particles in flames, 19:19255 (R;US)

Staged Combustion
Slagging of ash in staged combustion of pulverized coal, 19:17875 (RA;FI)

Structural Chemical Analysis
Two dimensional NMR and NMR relaxation studies of coal structure: Progress report, October 1, 1993–December 31, 1993, 19:17832 (R;US)

Swelling
Magnetic relaxation: Coal swelling, extraction, pore size: Quarterly technical progress report, January 1, 1994–March 31, 1994, 19:17834 (R;US)

Thermal Analysis
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 7, July–September 1993, 19:17794 (R;US)
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 6, April–June 1993, 19:17793 (R;US)

Transport
Coal log pipeline research at the University of Missouri: 4th Quarterly report, October 1, 1993–December 31, 1993, 19:17867 (R;US)

Turbulence
Radiation-turbulence interactions in pulverized-coal flames: Quarterly reports I and II, September 15, 1993–March 15, 1994, 19:17897 (R;US)

Wettability
New concept for coal wettability evaluation and modulation: Technical progress report, January 1, 1994–March 31, 1994, 19:17753 (R;US)

COAL FINES
Bench scale testing of micronized magnetite beneficiation: Quarterly technical progress report 3, July–September, 1993, 19:17851 (R;US)
Bench scale testing of micronized magnetite beneficiation: Quarterly technical progress report 4, October–December, 1993, 19:17852 (R;US)
Bench scale testing of micronized magnetite beneficiation: Quarterly technical progress report 3, July–September, 1993, 19:17851 (R;US)
Bench scale testing of micronized magnetite beneficiation: Quarterly technical progress report 4, October–December, 1993, 19:17852 (R;US)
Coal log pipeline research at the University of Missouri: 3rd Quarterly report, July 1, 1993–September 30, 1993, 19:17866 (R;US)
Mulled coal - a beneficiated coal form for use as a fuel or fuel intermediate: Technical progress report No. 11, October 1, 1992–December 31, 1992, 19:17865 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 10, July 1, 1992–September 30, 1992, 19:17864 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 9, April 1, 1992–June 30, 1992, 19:17863 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 8, January 1, 1992–March 31, 1992, 19:17862 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 10, July 1, 1992–September 30, 1992, 19:17864 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 8, January 1, 1992–March 31, 1992, 19:17862 (R;US)
Mulled coal - a beneficiation coal form for use as a fuel or fuel intermediate: Technical progress report No. 9, April 1, 1992–June 30, 1992, 19:17863 (R;US)
Non-intrusive measurement of particle charge: Electrostatic dry coal cleaning: Technical progress report No. 10, October 1, 1993–December 31, 1993, 19:17846 (R;US)
The coal quality expert: A focus on slagging and fouling, 19:17884 (RA;US)

COAL GAS
Bench-scale demonstration of biological production of ethanol from coal synthesis gas: Quarterly report, October 1, 1993–December 31, 1993, 19:17806 (R;US)
High temperature electrochemical separation of H_2S from coal gasification process streams: Quarterly progress report, October 1, 1993–December 31, 1993, 19:17802 (R;US)

COAL GASIFICATION
Fabrication of full-scale fiber reinforced hot-gas filters by chemical vapor deposition: Final technical report, 19:17822 (R;US)
Fluid dynamics of pressurized, entrained coal gasifiers: Second quarterly technical progress report, January 1, 1994–March 31, 1994, 19:17819 (R;US)
Fundamental and exploratory studies of catalytic steam gasification of carbonaceous materials: Final report, fiscal years 1985–1994, 19:17821 (R;US)
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, October 1–December 31, 1992, 19:18445 (R;US)
Rate inhibition of steam gasification by adsorbed hydrogen: Technical progress report, December 1, 1993–February 28, 1994, 19:17817 (R;US)

COAL GASIFICATION PLANTS
IGCC demonstration project status combustion engineering IGCC repowering project, 19:17760 (RA;US)
Pinon Pine IGCC project status, 19:17761 (RA;US)
Tampa Electric Company integrated gasification combined cycle system, 19:17763 (RA;US)
The Wabash River coal gasification repowering project program update, 19:17762 (RA;US)

The economical production of alcohol fuels from coal-derived synthesis gas: Quarterly technical progress report Number 9, October 1, 1993–December 31, 1993, 19:18337 (R;US)
Toms Creek Integrated Gasification Combined Cycle Demonstration Project: Annual report, [January 1, 1993–December 31, 1993], 19:18423 (R;US)

COAL INDUSTRY
CCT deployment considerations, 19:17740 (RA;US)
Coal and public perceptions, 19:17738 (RA;US)
Implementing section 1332, Energy Policy Act of 1992, 19:17741 (RA;US)
US Energy Industry Financial Developments, 1993 fourth quarter, April 1994, 19:17931 (R;US)

COAL LIQUEFACTION
See also TSL PROCESS
Equilibrium and volumetric data and model development for coal fluids: Final report, October 1, 1990–September 30, 1993, 19:17787 (R;US)

Bench-Scale Experiments
Catalytic Multi-Stage Liquefaction of Coal: Fifth quarterly final report, 1 October 1993–31 December 1993, 19:17810 (R;US)
Catalytic Two-Stage Liquefaction (CTSL™) process: Laboratory scale studies modelling and technical assessment: Final report, [October 1, 1988–June 30, 1993], 19:17775 (R;US)

Catalysts
Advanced direct liquefaction concepts for PETC generic units: Quarterly technical progress report, July 1993–September 1993 (Bench-scale experiments insupport of coal liquefaction from a numbedr of laboatories are combined in this report.), 19:17790 (R;US)
Configurational diffusion of asphaltenes in fresh and aged catalyst extrudates: Quarterly progress report, June 20, 1993–September 20, 1993, 19:17804 (R;US)
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, October 1993–December 1993, 19:17792 (R;US)
Microbiological recovery of metals from spent coal liquefaction catalysts: Quarterly status report, January–March 1993, 19:17850 (R;US)
Travel to Canada for a project meeting on advanced direct coal liquefaction: Foreign trip report, January 18–21, 1994, 19:17766 (R;US)

Catalytic Effects
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, July–September 1993, 19:17791 (R;US)

Chemical Reaction Kinetics
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 6, April–June 1993, 19:17793 (R;US)
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 7, July–September 1993, 19:17794 (R;US)

Chemical Reactors
Optimization of reactor configuration in coal liquefaction: Ninth quarterly report, 1 October 1993–31 December 1993, 19:17796 (R;US)
Short contact time direct coal liquefaction using a novel batch reactor: Progress report, September 27, 1993–December 31, 1993, 19:17815 (R;US)

Coal Preparation
Mitigating crosslinking reactions through preconversion strategies: [Quarterly report, October–December 1993], 19:17765 (R;US)

Contracts
Travel to Canada for a project meeting on advanced direct coal liquefaction: Foreign trip report, January 18–21, 1994, 19:17766 (R;US)

Cross-Linking
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 7, July–September 1993, 19:17794 (R;US)
Mitigating crosslinking reactions through preconversion strategies: Quarterly report Number 6, April–June 1993, 19:17793 (R;US)

Hydrogen Transfer
Low severity coal liquefaction promoted by cyclic olefins: Quarterly report, October–December 1993, 19:17801 (R;US)

Materials
USDOE-Japan ministry of international trade and industry (MITI) meetings on SO_x NO_x processes and coal liquefaction: Foreign trip report, January 10–24, 1994, 19:17767 (R;US)

Meetings
USDOE-Japan ministry of international trade and industry (MITI) meetings on SO_x NO_x processes and coal liquefaction: Foreign trip report, January 10–24, 1994, 19:17767 (R;US)

Organic Solvents
Low severity coal liquefaction promoted by cyclic olefins: Quarterly report, October–December 1993, 19:17801 (R;US)
Progress in donor assisted coal liquefaction: Hydroaromatic compound formation, 19:17825 (R;US)

Oxidation
Effects of low-temperature catalytic pretreatments on coal structure and reactivity in liquefaction: Technical progress report, July–September 1993, 19:17791 (R;US)

Residues
Coal liquefaction process streams characterization and evaluation: The preliminary evaluation of the kinetics of coal liquefaction distillation resid conversion, 19:17781 (R;US)

Yields
Advanced direct liquefaction concepts for PETC generic units: Quarterly technical progress report, July 1993–September 1993 (Bench-scale experiments insupport of coal liquefaction from a numbedr of laboatories are combined in this report.), 19:17790 (R;US)
Travel to Canada for a project meeting on advanced direct coal liquefaction: Foreign trip report, January 18–21, 1994, 19:17766 (R;US)

COAL LIQUEFACTION PLANTS
Start-up and operation of the ENCOAL mild coal gasification project, 19:17759 (RA;US)

COAL LIQUIDS
Advanced coal liquefaction: Final quarterly report, October 1, 1993–December 31, 1993, 19:17808 (R;US)
Advanced direct liquefaction concepts for PETC generic units: Quarterly technical progress report, July 1993–September 1993 (Bench-scale experiments insupport of coal liquefaction from a numbedr of laboatories are combined in this report.), 19:17790 (R;US)
Deashing of coal liquids with ceramic membrane microfiltration and diafiltration: Final quarterly technical progress report, October 1–December 31, 1993, 19:17811 (R;US)
Development of an extraction process for removal of heteroatoms from coal liquids: Technical progress report No. 7, October 1, 1993–December 31, 1993, 19:17799 (R;US)
Equilibrium and volumetric data and model development for coal fluids: Final report, October 1, 1990–September 30, 1993, 19:17787 (R;US)
Hindered diffusion of coal liquids: Quarterly report No. 5, September 18, 1993–December 17, 1993, 19:17813 (R;US)
Molecular catalytic coal liquid conversion: Quarterly progress report, [April–June 1993], 19:17798 (R;US)
Novel catalysts for upgrading coal-derived liquids: Quarterly technical progress report, 1 October 1993–31 December 1993, 19:17814 (R;US)
Refining and end use of coal liquids: Quarterly report, November–December 1993, 19:17788 (R;US)
Start-up and operation of the ENCOAL mild coal gasification project, 19:17759 (RA;US)

COAL MINERS
Injury experience in coal mining, 1992, 19:17905 (R;US)
Noise exposures in US coal mines, 19:17904 (R;US)

COAL PREPARATION
Bench-scale testing of the Multi-Gravity Separator in combination with Microcel: Fifth quarterly report, October 1, 1993–December 31, 1993, 19:17750 (R;US)

Development of enhanced sulfur rejection processes: Third quarterly technical progress report, April 1, 1993–June 31, 1993, 19:17751 (R;US)
Engineereing development of advanced physical fine coal cleaning for premium fuel applications: Quarterly technical progress report No. 5, October–December 1993, 19:18426 (R;US)
Micro-agglomerate location flotation for deep cleaning of coal: Quarterly progress report, October 1–December 31, 1993, 19:17752 (R;US)
Refining of fossil resin flotation concentrate from Western coal: Fourth quarterly final report, October 1, 1993–December 31, 1993, 19:17839 (R;US)
Refining of fossil resin flotation concentrate from Western coal: Second quarterly final report, April 1, 1993–June 30, 1993, 19:17837 (R;US)
Refining of fossil resin flotation concentrate from Western coal: Third quarterly final report, July 1, 1993–September 30, 1993, 19:17838 (R;US)

COAL PREPARATION PLANTS
Self-scrubbing coal: An integrated approach to clean air, 19:17743 (RA;US)

CT SCANNING
See CAT SCANNING
CULTURAL RESOURCES
Environmental guidelines for Development of Cultural Resource Management plans: Working draft for comment, 19:20484 (R;US)
CUMULATIVE EFFECT
See PARTICLE PRODUCTION
CUPRATES
Crystal structures of new cuprates containing CO_3 analyzed by the Rietveld method of neutron powder diffraction, 19:20264 (RA;JP)
Neutron diffraction analysis of $BaCuO_2$ at 7 K, 19:20239 (RA;CZ)
CURIUM 242
Cluster decay, 19:20108 (IA;RU)
CURIUM 247 TARGET
Measurement and analysis of the neutron-induced fission cross sections of ^{247}Cm, ^{250}Cr and ^{254}Es, 19:20216 (R;US)
CURIUM 248 TARGET
Method for calculation of yields of neutron-rich heavy nuclei in nuclei in incomplete fusion reactions, 19:20203 (IA;RU)
CURRENT ALGEBRA
On bosonic and supersymmetric current algebras for non-semi-simple groups, 19:19952 (R;DE)
CYANIDES
A novel photocatalytic detoxification process for cyanide wastes, 19:18984 (RA;US)
CYCLIC ACCELERATORS
See also SYNCHROTRONS
Application package DeCA. Version 3.3: Users quide., 19:20563 (R;UA)
CYCLOTRON INSTABILITY
Ion cyclotron instability of real and simulated fusion product populations, 19:20336 (IA;XA)
CYLINDERS
Basic tests on 48Y-Cylinder for integrity evaluation, 19:19215 (IA;JP)
Consideration of impact behaviour of radioactive packages onto real targets, 19:19218 (IA;JP)
CYTRIPHOS

Aquicludes
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Depth 1-3 Km
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Electromagnetic Surveys
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)

Fluid Flow
Research consortium on fractured petroleum reservoirs: Third quarterly report, July 1–September 30, 1993, 19:17916 (R;US)

Geobarometry
Analysis and evaluation on the heat extraction system form hot dry rocks, 19:18403 (IA;JP;In Japanese)

Geologic Fractures
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)

Geothermal Systems
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Gravity Surveys
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)

Heat Extraction
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Hydraulic Conductivity
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Hydraulic Fracturing
Analysis and evaluation on the heat extraction system form hot dry rocks, 19:18403 (IA;JP;In Japanese)
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Injection Wells
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)

Magnetotelluric Surveys
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)
Mapping
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)
Multiphase Flow
A study of multiphase flow in fractured porous media using a microscale lattice Boltzmann approach, 19:19920 (R;US)
Progress Report
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)
Prospecting
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)
Rock-Fluid Interactions
Analysis and evaluation on the heat extraction system form hot dry rocks, 19:18403 (IA;JP;In Japanese)
Seismic Surveys
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)
Integrated seismic study of naturally fractured tight gas reservoirs: Technical progress report, October 1, 1993–December 31, 1993, 19:17936 (R;US)
Strain Gages
Analysis and evaluation on the heat extraction system form hot dry rocks, 19:18403 (IA;JP;In Japanese)
Sunshine Project
Analysis and evaluation on exploration methods for fractured type geothermal reservoir, 19:18379 (IA;JP)
Two-Phase Flow
Two-phase flow in fractured rock, 19:18087 (R;US)

The foaming of U-A1 fuel under simulated reactor accident conditions, 19:18606 (RA;US)

Technology Assessment
Status of reduced enrichment program for research reactors in Japan, 19:18597 (RA;US)

Testing
Commissioning test of low enriched $UA1_x$ fuel core on upgraded JRR-3, 19:18609 (RA;US)
Measurements and experiences during conversion of DR 3 to low enriched silicide fuel, 19:18608 (RA;US)
Production test IP-324-C upstream flux depression correction at C Reactor, 19:18669 (R;US)
Status of LEU fuel development and irradiation testing at Chalk River Laboratories, 19:18600 (RA;US)
Status report on the irradiation testing of four low-enriched fuel elements (U3Si2-Al and UdSi1.6-A1) by the Netherlands Energy Research Foundation (ECN), 19:18603 (RA;US)
Status report: Protection fuel testing program, July 1960, 19:18672 (R;US)
Update on world-wide use of TRIGA-LEU fuel including loss of flow tests, 19:18613 (RA;US)

Thermal Analysis
Commissioning test of low enriched $UA1_x$ fuel core on upgraded JRR-3, 19:18609 (RA;US)

Thermal Expansion
Correlation of irradiation-induced microstructural changes and fission gas swelling in uranium compounds, 19:18604 (RA;US)

Tubes
Tube wall thickness isotope production tubes, 19:18723 (R;US)

FUEL FABRICATION PLANTS
Decommissioning of the NUKEM-Alt facility. The decommissioning procedure adopted for the Hanau fuel element fabrication plants NUKEM-A and HOBEG, 19:17952 (RA;DE;In German)
Field test of short-notice random inspections for inventory-change verification at a low-enriched-uranium fuel-fabrication plant: Preliminary summary, 19:18266 (R;US)
Hazard analysis for 300 Area N Reactor Fuel Fabrication and Storage Facilty, 19:18258 (R;US)

FUEL INJECTION SYSTEMS
Coal-fueled diesel technology development – Fuel injection equipment for coal-fueled diesel engines, 19:17887 (R;US)
FUEL LOADING
See REACTOR FUELING
FUEL PENCILS
See FUEL PINS
FUEL PINS
A transient overpower experiment in EBR-II, 19:18762 (R;US)
Implementation, verification, and validation of the FPIN2 metal fuel pin mechanics model in the SASSYS/SAS4A LMR transient analysis codes, 19:18758 (R;US)
FUEL PLATES
Flat plate bonded fuel elements: Report No. 4, December 11, 1953–February 10, 1954, 19:18643 (R;US)
Fuel plate defects for research reactors with UAlx-Al core, 19:18621 (RA;US)
FUEL REPROCESSING PLANTS
See also IDAHO CHEMICAL PROCESSING PLANT
Upgrading a 1944 plutonium-extraction plant to a modern decontamination facility, 19:18251 (R;US)
FUEL ROD CONSOLIDATION
See FUEL RODS
FUEL RODS
Defect-tests of power generating co-extruded fuel rods, 19:18670 (R;US)
Examination of selected ruptures from the 1956 KE outbreak, 19:18660 (R;US)
Goal exposure for rupture-prone fuel element lots, 19:18714 (R;US)
Proposal for irradiation of uranium swelling capsule, 19:18654 (R;US)
FUEL SHEATHS
See FUEL CANS
FUEL SLUGS
See FUEL RODS
FUEL SLURRIES
Coal-fueled diesel technology development – Fuel injection equipment for coal-fueled diesel engines, 19:17887 (R;US)
Design and operation of a medium speed 12-cylinder coal-fueled diesel engine: Phase 2 improvements, 19:19001 (R;US)
Engineereing development of advanced physical fine coal cleaning for premium fuel applications: Quarterly technical progress report No. 5, October–December 1993, 19:18426 (R;US)
Rheological properties essential for the atomization of coal water slurries (CWS): Quarterly progress report, September 15, 1993–December 15, 1993, 19:17833 (R;US)
Rheological properties essential for the atomization of coal water slurries (CWS): Quarterly progress report, December 15, 1993–March 15, 1994, 19:17894 (R;US)
FUEL STORAGE POOLS
Sand filter backwash pit criticality analysis, 19:19242 (R;US)
Travel to England to resolve anomalies on the Channel Monitoring System: Foreign trip report, November 7, 1993–November 16, 1993, 19:17971 (R;US)
FUEL SUBSTITUTION
Transesterified rape seed oil: Characteristics and production, 19:19015 (R;SE;In Swedish)
FUEL SUSPENSIONS
See FUEL SLURRIES
FUEL-COOLANT INTERACTIONS
Proceedings of the CSNI specialists meeting on fuel-coolant interactions, 19:18798 (R;US)
FUELS (NUCLEAR)
See NUCLEAR FUELS
FUELWOOD
See WOOD FUELS
FULHAM-SIMON-CARVES PROCESS
See DESULFURIZATION
FULLERENES
A new family of superconducting fullerides, $Na_3(NH_3)_xC_{60}$(x = 2–8), 19:19081 (R;US)
Supersonic bare metal cluster beams: Technical progress report, February 1, 1993–March 31, 1994, 19:20234 (R;US)
FUMES
See AEROSOLS
FUNDAMENTAL PARTICLES
See ELEMENTARY PARTICLES
FURANS
Toxic emissions from a cyclone burner boiler with an ESP and with the SNOX demonstration and from a pulverized coal burner boiler with an ESP/wet flue gas desulfurization system, 19:18443 (R;US)
FUSED SALTS
See MOLTEN SALTS
FUSION (BONDING, NONMETALLIC)
See BONDING
FUSION ENERGY

Ion cyclotron instability of real and simulated fusion product populations, 19:20336 (IA;XA)
FW-STOIC PROCESS
See COAL GASIFICATION

G

G CODES
GAUGE3: Two-Dimensional Neutron Diffusion-Depletion for Hexagonal Lattice, 19:20556 (CM;US)
GAGES (STRAIN)
See STRAIN GAGES
GALAXIES
Angular momentum in the Local Group, 19:19937 (R;US)
GALLIUM ARSENIDES
Etching and deposition in the helicon reactor with $SiCl_4$, 19:20288 (IA;AU)
GAME THEORY
A parallel implementation of nonnumeric search problems in SISAL, 19:20522 (RA;US)
GAMMA CASCADES
Self-consistent description of isomer yields in neutron reactions, 19:20103 (RA;XA)
GAMMA DOSIMETRY
Development of an alanine dosimeter for gamma dosimetry in mixed environments – Summary of research, 19:19477 (R;US)
GAMMA SOURCES
High energy decomposition of halogenated hydrocarbons FY93 final report, 19:18047 (R;US)
GAMMA SPECTRA
Application of linear associative neural network to NaI(Tl) gamma-ray spectrum analysis, 19:19467 (RA;JP)
GAMMA SPECTROMETERS
Heidelberg-Darmstadt Crystal-Ball-Spectrometer as 4 π-neutron detector, 19:19455 (RA;DE)
X-ray and gamma-ray spectrometry systems developed at the Nuclear Research Institute at Rez, 19:19459 (RA;CZ)
GAMMA SPECTROSCOPY
γ-spectroscopy as a means to investigate mass and charge distributions in the fission of actinides, 19:19453 (RA;DE)
Determination of the total efficiency for point sources in volume-sample geometries in gamma-ray spectrometry, 19:19458 (RA;CZ)
To attend and present an invited talk on Identical Bands at Low Spins and Low Excitation Energies, Switzerland: Foreign trip report, September 19–25, 1993, 19:20100 (R;US)
GANGLIOSIDES
Single chain FV constructs of anti-ganglioside GD2 antibodies for radioimaging and radioimmumotheraphy: Progress report, 19:19700 (R;US)
GANIL
See GANIL CYCLOTRON

GANIL CYCLOTRON
Database management in the new GANIL control system, 19:19319 (R;FR)

GAS COOLANTS
See GASES

GAS ENGINES
See INTERNAL COMBUSTION ENGINES

GAS FLOW
A nonconservative scheme for isentropic gas dynamics, 19:19253 (R;US)
DIAN3D: Three-Dimensional SO2 Predictions for Duct Injection, 19:20544 (CM;US)
DIAN3D: Three-Dimensional SO2 Predictions for Duct Injection, 19:20545 (CM;US)

GAS GENERATORS
Pneumatic solids feeder for coal gasification reactor, 19:17823 (PA;US)

GAS TURBINE POWER PLANTS
Integrated gasification combined cycle and steam injection gas turbine powered by biomass joint-venture evaluation, 19:18320 (R;US)

GAS TURBINES
See also COAL-FIRED GAS TURBINES
Feasibility study for an advanced coal fired heat exchanger/gas turbine topping cycle for a high efficiency power plant: Technical report, January 1, 1993–March 31, 1993, 19:19003 (R;US)
Feasibility study for an advanced coal fired heat exchanger/gas turbine topping cycle for a high efficiency power plant: Technical report, April 1, 1993–June 30, 1993, 19:19004 (R;US)
Heavy duty gas turbine combustion tests with simulated low BTU coal gas, 19:19002 (R;US)
University participation in the ATS program, 19:19293 (R;US)

GASES
See also AIR
COAL GAS
RARE GASES
SYNTHESIS GAS
Flammable gas generation, retention, and release in high-level waste tanks – physical and chemical models, 19:18154 (R;US)
Laser-matter interaction at extreme intensity, 19:20440 (IA;AU)
Progress toward mitigation of flammable gas Tank 241-SY-101, 19:18157 (R;US)
The DEFUZE code for modeling gaseous diffusion of volatile contaminants in the vadose zone, 19:19631 (R;US)
Thermodynamical and transport properties of gases, 19:17824 (R;DK)

GASIFICATION
See also COAL GASIFICATION
Aerosol formation in fluidized bed solid fuel conversion processes, 19:17874 (RA;FI)
Gasifier gas desulfurization at high temperatures and pressures, 19:17756 (RA;FI)
LIEKKI Combustion Research Program: Technical Review 1988-1992, 19:19167 (R;FI)
Pressurized fluidized bed gasification of wood, peat and coal - Research at the Otaniemi PFBC/G test facility, 19:17758 (RA;FI)
Reactivity and fragmentation of low grade solid fuels in fluidized bed gasification, 19:17755 (RA;FI)
Sulphur and nitrogen chemistry under pressurized combustion and gasification conditions, 19:17871 (RA;FI)

GASOLINE
Gasoline from natural gas by sulfur processing: Quarterly technical progress report No. 2, October 1, 1993–December 31, 1993, 19:18340 (R;US)

GASOLINE ENGINES

GEOTHERMAL ENERGY

Binary-Fluid Systems
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Energy Recovery
Development of technology for increasing geothermal energy recovery, 19:18407 (IA;JP)

Geothermal Exploration
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Nationwide geothermal resources exploration project, 19:18376 (IA;JP)

Geothermal Resources
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Heat Extraction
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Heat Sources
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Hot-Dry-Rock Systems
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Hydraulic Fracturing
Development of technology for increasing geothermal energy recovery, 19:18407 (IA;JP)
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Hydrothermal Systems
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Progress Report
Confirmation study On the effectiveness of prospecting techniques for deep geothermal resources, 19:18378 (IA;JP)

Research Programs
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)
Confirmation study On the effectiveness of prospecting techniques for deep geothermal resources, 19:18378 (IA;JP)
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Nationwide geothermal resources exploration project, 19:18376 (IA;JP)

Surveys
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Well Drilling
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

Well Stimulation
Development of technology for increasing geothermal energy recovery, 19:18407 (IA;JP)
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)

GEOTHERMAL EXPLORATION

Data Analysis
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)
Data analysis and evaluation accompanied with confirmation study on the effectiveness of prospecting.: Analysis and evaluation of fracture type reservoir prospecting, 19:18385 (IA;JP;In Japanese)

Depth
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)

Depth 1-3 Km
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)

Evaluation
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)
Data analysis and evaluation accompanied with confirmation study on the effectiveness of prospecting.: Analysis and evaluation of fracture type reservoir prospecting, 19:18385 (IA;JP;In Japanese)

Feasibility Studies
Japan's Sunshine Project.: 1992 annual summary of geothermal enregy R and D, 19:18380 (I;JP;In Japanese)

Geothermal Fields
Confirmation study on the effectiveness of prospecting.: Development of fracture type reservoir prospecting, 19:18384 (IA;JP;In Japanese)

Geothermal Resources
Geothermal energy prospecting technology.: Study on evaluation technology for nationwide geothermal resources, 19:18381 (IA;JP;In Japanese)

Progress Report
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)

Resource Assessment
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)

Seismic Surveys
Confirmation study on the effectiveness of prospecting.: Development of fracture type reservoir prospecting, 19:18384 (IA;JP;In Japanese)

Sunshine Project
Analysis and Evaluation on the nation-wide geothermal resources exploration project, 19:18377 (IA;JP;In Japanese)
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)
Geothermal energy prospecting technology.: Study on evaluation technology for nationwide geothermal resources, 19:18381 (IA;JP;In Japanese)
Nationwide geothermal resources exploration project, 19:18376 (IA;JP)

Tomography
Confirmation study on the effectiveness of prospecting.: Development of fracture type reservoir prospecting, 19:18384 (IA;JP;In Japanese)

Verification
Confirmation study on the effectiveness of prospecting.: Development of fracture type reservoir prospecting, 19:18384 (IA;JP;In Japanese)
Data analysis and evaluation accompanied with confirmation study on the effectiveness of prospecting.: Analysis and evaluation of fracture type reservoir prospecting, 19:18385 (IA;JP;In Japanese)

GEOTHERMAL FIELDS
An integrated approach to reservoir engineering at Pleasant Bayou Geopressured-Geothermal reservoir, 19:18397 (R;US)

GEOTHERMAL FLUIDS
Hydrodynamic/kinetic reactions in liquid dominated geothermal systems: Hydroscale Test Program, Mercer 2 well site South Brawley, California (Tests No. 15–20): Final report, 27 October 1980–6 February 1981, 19:18413 (R;US)

GEOTHERMAL POWER PLANTS
Data analysis and evaluation accompanied with development of power generation plant using hot water.: Analysis and evaluation of detector and trasmitter, 19:18393 (IA;JP;In Japanese)
Development of 10MW-class power plant, 19:18394 (IA;JP)
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of measurement wile drilling system for geothermal wells), 19:18391 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a 10MW-class plant), 19:18388 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of measurement wile drilling system for geothermal wells), 19:18391 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a downhole pump), 19:18389 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (study on Production and re-injection of hot water/development of technology for increasing geothermal energy recovery), 19:18390 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a 10MW-class plant), 19:18388 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (study on Production and re-injection of hot water/development of technology for increasing geothermal energy recovery), 19:18390 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a downhole pump), 19:18389 (IA;JP;In Japanese)

GEOTHERMAL REGIONS
See GEOTHERMAL FIELDS

GEOTHERMAL RESOURCES
Depth
Geothermal energy prospecting technology.: Study on technology for deep-seated geothermal resources exploration, 19:18375 (IA;JP;In Japanese)

Depth 1-3 Km
Confirmation study On the effectiveness of prospecting techniques for deep geothermal resources, 19:18378 (IA;JP)
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)

Electromagnetic Surveys
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)

Experimental Data
Data analysis and evaluation accompained with nationwide geothermal resources exploration project, 19:18383 (IA;JP;In Japanese)

Geologic Surveys
Nationwide geothermal resources exploration project, 19:18382 (IA;JP;In Japanese)

GLOW DISCHARGES
Calibration procedure for space-resolved line emission measurements, 19:20357 (IA;AU)
The simulation of glow discharges, 19:20291 (IA;AU)

GLUCURONIDASE
Molecular characterization of the lignin-forming peroxidase: Role in growth, development and response to stress: Progress summary report, April 1, 1993–March 31, 1994, 19:18309 (R;US)

GLUONS
Particle spectra of gluon jet, 19:20005 (RA;JP)

GOBAR GAS
See METHANE

GOITER
About the possibility of ^{131}I leukosogenic action during diffusion toxic goiter treatment, 19:19768 (IA;UA;In Ukrainian)
Particularities of clinics, hormonal and immune homeostasis in persons with diffused toxic goiter after the accident in Chernobyl NPP, 19:19876 (IA;UA;In Ukrainian)

GOLD
Determination of grain boundary volume expansion by HREM, 19:19028 (R;US)
Fast light particles in Kr+Au collisions at 43 MeV/u, 19:20207 (IA;RU)

GOLD 197 REACTIONS
Energy dependence of collective flow of neutrons and charged particles in ^{197}Au+^{197}Au collisions, 19:20137 (R;DE)
High p_t pions as probes of the early dense reaction phase in heavy ion collisions at 1 GeV/nucleon, 19:20138 (R;DE)
Is there Δ-matter at 1 GeV/nucleon?, 19:20139 (R;DE)
Pion-nucleon interactions in relativistic heavy ion collisions: new sensitivities to the nuclear equation of state, 19:20141 (R;DE)
Statistical multifragmentation: Is the distinction between simultaneous and sequential decay inessential?, 19:20219 (R;US)
Transverse energy dependence of neutron squeeze-out in relativistic heavy ion collisions, 19:20140 (R;DE)

GOLD 197 TARGET
Energy dependence of collective flow of neutrons and charged particles in ^{197}Au+^{197}Au collisions, 19:20137 (R;DE)
Evaporation residues from complete and incomplete fusion of ^{20}Ne with ^{197}Au and ^{208}POb at E/A=8.6 to 15.0 MeV/u, 19:20198 (IA;RU)
Fission of spin-aligned projectile-like nuclei from ^{208}Pb (29MeV/u) + Au, 19:20128 (RA;DE)
Fragmentation of hot nuclear systems formed in Xe-induced reactions at E_{beam}=60 MeV/nucleon, 19:20218 (R;US)
Hadron production in S+nucleus collisions at 200 GeV/nucleon, 19:20008 (R;US)
High p_t pions as probes of the early dense reaction phase in heavy ion collisions at 1 GeV/nucleon, 19:20138 (R;DE)
High-energy γ-rays in heavy-ion fusion-fission, 19:20130 (RA;DE)
Is there Δ-matter at 1 GeV/nucleon?, 19:20139 (R;DE)
Photon-photon and photon-hadron processes in relativistic heavy ion collisions, 19:20212 (R;DE;In German)
Pion-nucleon interactions in relativistic heavy ion collisions: new sensitivities to the nuclear equation of state, 19:20141 (R;DE)
Production of ϕ mesons in central Si+Au collisions at 14.6 A·GeV/c, 19:20124 (R;US)
Transverse energy dependence of neutron squeeze-out in relativistic heavy ion collisions, 19:20140 (R;DE)

GOVERNMENT BUILDINGS
Annual report to Congress on Federal Government Energy Management and Conservation Programs, 19:18881 (R;US)
Cape Canaveral Air Force Station integrated resource assessment: Volume 3, Resource assessment, 19:18926 (R;US)
DOE-2, BDL summary: Version 2.1E, 19:18918 (R;US)

GRAIN ALCOHOL
See ETHANOL

GRAIN BOUNDARIES
Determination of grain boundary volume expansion by HREM, 19:19028 (R;US)

GRAINS (CEREAL)

GREENHOUSE EFFECT
Clean coal technologies and global climate change, 19:18442 (RA;US)
Integrated science model for assessment of climate change, 19:19572 (R;US)

GREENHOUSE GASES
Advanced aerogel materials for in-situ capture of waste gases from fossil fuel combustion, 19:18464 (RA;US)
Four essays on the economics of climate change - with a supplement, 19:18830 (R;NO)
Global tropospheric chemistry models for radiatively important trace species: Design and research recommendations, 19:19552 (R;US)
I think that I shall never see ··· a lovely forestry policy: Land use programs for conservation of forests, 19:19561 (R;US)
Integrated science model for assessment of climate change, 19:19572 (R;US)
Travel to Germany to participate in an overview of Global Analysis, Interpretation, and Modeling Task Force activities: Foreign trip report, March 14–19, 1994, 19:19550 (R;US)
Tropospheric radiative forcing of CH_4, 19:19567 (R;US)

GREENLAND
Environmental radioactivity in the North Atlantic region including the Faroe Islands and Greenland. 1990 and 1991, 19:19625 (R;DK)
Measurements of the summer surface heat budget of the Northeast Water Polynya: USCGC Polar Sea cruise, July 15–August 15, 1992, 19:19651 (R;US)

GRENOBLE REACTOR
New ionization chamber for the mass spectrometer LOHENGRIN (ILL Grenoble), 19:19452 (RA;DE)

GRILLO PROCESS
See DESULFURIZATION

GROUND DISPOSAL
Environmental Assessment for the new sanitary sludge land application sites at the Savannah River Site, 19:18183 (R;US)
Field study of disposed wastes from advanced coal processes: Quarterly technical progress report, October–December 1993, 19:17844 (R;US)

GROUND MOTION
Effects of structural setting and rock peroperties on amplitudes of surface motions in the vicinity of small explosive tests, 19:19173 (R;US)

GROUND RELEASE
WHC fire hazards analysis policy, 19:18494 (R;US)

GROUND WATER
Baseline Ecology
Identification of subsurface microorganisms at Yucca Mountain: Second quarterly report, October 1, 1993–December 31, 1993, 19:19786 (R;US)
Identification of subsurface microorganisms at Yucca Mountain: Third quarterly report, January 1, 1994–March 31, 1994, 19:18184 (R;US)

Chemical Analysis
UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 19:18210 (R;US)

Chemical Composition
Field study of disposed wastes from advanced coal processes: Quarterly technical progress report, October–December 1993, 19:17844 (R;US)

Cleaning
The use of micellar solutions for novel separation techniques, 19:19118 (R;US)

Contamination
Baseline risk assessment of ground water contamination at the Uranium Mill Tailings Site near Shiprock, New Mexico: Revision 1, 19:18203 (R;US)
Baseline risk assessment of groundwater contamination at the Uranium Mill Tailings Site near Gunnison, Colorado, 19:18204 (R;US)
Baseline risk assessment of groundwater contamination at the Uranium Mill Tailings Site near Gunnison, Colorado: Revision 1, 19:18205 (R;US)
Environmental assessment of remedial action at the Slick Rock uranium mill tailings sites, Slick Rock, Colorado: Revision 1, 19:18217 (R;US)
F-Area Seepage Basins groundwater monitoring report – third and fourth quarters 1993: Volume 1, 19:18194 (R;US)
Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:18092 (R;US)
H-Area Seepage Basins groundwater monitoring report – third and fourth quarters 1993: Volume 1, 19:18195 (R;US)
Mixed Waste Management Facility (MWMF) groundwater monitoring report: Fourth quarter 1993 and 1993 summary, 19:18193 (R;US)
Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 2, 19:18219 (R;US)
UMTRA project water sampling and analysis plan, Mexican Hat, Utah, 19:18215 (R;US)
UMTRA project water sampling and analysis plan, Monument Valley, Arizona, 19:18216 (R;US)
UMTRA project water sampling and analysis plan, Riverton, Wyoming, 19:18214 (R;US)
UMTRA project water sampling and analysis plan, Spook, Wyoming, 19:18213 (R;US)

Corrosive Effects
Disposition of actinides released from high-level waste glass, 19:17997 (R;US)

Filtration
Percolation testing at the F- and H-Area Seepage Basins: Final report, 19:18171 (R;US)
Flow Models
Hanford Site ground-water model: Geographic information system linkages and model enhancements, FY 1993, 19:19615 (R;US)
Inverse modeling of test SB4-VM2/216.7 at Wellenberg, 19:18088 (R;US)
Review and selection of unsaturated flow models, 19:19918 (R;US)
Flow Rate
Discussion of the paper "the use of conditional simulation in nuclear waste site performance assessment," by Carol A. Gotway, 19:18111 (R;US)
The in situ permeable flow sensor: A device for measuring groundwater flow velocity, 19:19627 (R;US)
Fluid Flow
Preliminary potentiometric map and flow dynamic characteristics for the upper-basalt confined aquifer system, 19:19612 (R;US)
Hydrology
Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix A of Attachment 3: Calculations, Final, 19:18202 (R;US)
Remedial action plan and site design for stabilization of the inactive uranium processing site at Naturita, Colorado: Appendix B of Attachment 3: Groundwater hydrology report, Attachment 4: Water resources protection strategy, Final, 19:18201 (R;US)
Irradiation
SSCL groundwater model, 19:19628 (R;US)
Liquid Flow
FEFLOW 1.10: Solving of coupled equation for flow, heat transfer and solute transport, 19:20584 (R;FI;In Finnish)
Monitoring
Aquifer test plan for the 100-HR-3 Operable Unit, 19:19636 (R;US)
Environmental assessment for the Groundwater Characterization Project, Nevada Test Site, Nye County, Nevada: Revision 1, 19:18835 (R;US)
F-Area Seepage Basins groundwater monitoring report: First and second quarters 1993: Volume 1, 19:19642 (R;US)
H-Area Seepage Basins groundwater monitoring report: Volume 1, First and second quarters 1993, 19:19643 (R;US)
Long-term surveillance plan for the Lowman, Idaho, Disposal site: Revision 1, 19:18009 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report: Second quarter 1993, 19:19641 (R;US)
Monitoring groundwater and river interaction along the Hanford reach of the Columbia River, 19:19619 (R;US)
Sanitary Landfill groundwater monitoring report: Fourth quarterly report and summary 1993, 19:19647 (R;US)
Sanitary Landfill groundwater monitoring report: Third quarter 1993, 19:19645 (R;US)
Radioactivity
Tritium activities in selected wells on the Nevada Test Site, 19:19586 (R;US)
Radionuclide Migration
Aquifer test plan for the 100-HR-3 Operable Unit, 19:19636 (R;US)
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
Hanford Site ground-water model: Geographic information system linkages and model enhancements, FY 1993, 19:19615 (R;US)
Metallurgical Laboratory Hazardous Waste Management Facility groundwater monitoring report: Second quarter 1993, 19:19641 (R;US)
Radiological performance assessment for the E-Area Vaults at the Savannah River Site: Part 2, Simulation of contaminant migration in the far-field, 19:19639 (R;US)
The effect of fuel type in unsaturated spent fuel tests, 19:17996 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 19:19614 (R;US)
Remedial Action
Application of cone penetrometer technology in hydrogeological investigations at the Savannah River Site (SRS) South Carolina, 19:19638 (R;US)
Comparing statistical tests for detecting soil contamination greater than background, 19:18241 (R;US)
Programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 2, 19:18219 (R;US)
Summary report of the drilling technologies tested at the Integrated Demonstration Project for cleanup of organic contaminants in soils and groundwater at non-arid sites, 19:19644 (R;US)
US Department of Energy Uranium Mill Tailings Remedial Action ground water Project: Revision 1, Version 1: Final project plan, 19:18206 (R;US)
Sampling
Demonstration of innovative monitoring technologies at the Savannah River Integrated Demonstration Site, 19:19646 (R;US)
Sampling and analyses report for December 1992 semiannual postburn sampling at the RMI UCG Site, Hanna, Wyoming, 19:17772 (R;US)
UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 19:18210 (R;US)
Site Characterization
Environmental assessment for the Groundwater Characterization Project, Nevada Test Site, Nye County, Nevada: Revision 1, 19:18835 (R;US)
Water Quality
Draft programmatic environmental impact statement for the Uranium Mill Tailings Remedial Action Ground Water Project: Revision 3, 19:18220 (R;US)

Production test IP-285-C and supplement a measurement of operating temperatures of uncooled thermal shield cooling tube: Final report, 19:18680 (R;US)
Production test IP-326-I: Low flow calibration tests at the old reactors, 19:18671 (R;US)
Production test IP-338-A: DR-reactor heat decay test at high outlet water temperatures, 19:18674 (R;US)
Results of reverse flow experimental tests for C operational charge-discharge tube at low tub powers, 19:18785 (R;US)
Results of the 105-DR effluent piping stress measurements from IP-342-AG, 19:18681 (R;US)
System curves for 100-K water plant expansion pump analysis, 19:18651 (R;US)
Technical note on the determination of K-reactor last-ditch cooling adequacy, 19:18734 (R;US)
The effect of fringe poison on heat generation in the shield complex, 19:18697 (R;US)

Reactor Cores
Production Test IP-358-AC: Replacement of carbon dioxide with nitrogen as a constituent of the K reactor atmosphere, 19:18682 (R;US)

Reactor Fueling
Speed-of-control limits, 105-DR, 19:18789 (R;US)

Reactor Operation
A review of Hanford power level limits, 19:18701 (R;US)
Description of Reactor Operating Limits (ROL) and Reactor Master File (RMF) reports, 19:18720 (R;US)
History of the project as of February 1, 1951, 19:17958 (R;US)
Operating limits: Hanford production reactors operating and performance restrictions, 19:18707 (R;US)

Reactor Protection Systems
Preliminary engineering study, Intermediate range instrumentation, 19:18794 (R;US)

Reactor Safety
High radiation levels at the discharge faces of the reactors, 19:18782 (R;US)
Risk management study for the retired Hanford Site facilities: Risk management executive summary: Volume 1, 19:18247 (R;US)

Reactor Shutdown
Discussion-preliminary review of the safety aspects of the crossunder line, Project CG-884: Volume 1, 19:18786 (R;US)
Radiochemistry for the rupture of a Zircaloy-2 clad uranium fuel element in KER-2, 19:18788 (R;US)
Recommended emergency procedure for extended outage at all IDP production reactors, 19:18791 (R;US)

Samarium Oscillations
Xenon and Samarium reactivity effects associated with coolant loss, 19:18664 (R;US)

Scram Rods
Report of GETHC meeting December, 1963 review of IPD Ball 3X safety philosophy, 19:18792 (R;US)

Secondary Coolant Circuits
Design criteria for coolant backup three remaining smaller reactors: Revision 1, 19:18737 (R;US)

Shielding
Final report B, D, F reactor side shield hole boring technology, 19:18793 (R;US)

Thermal Effluents
Development test IP-342-AG increase of bulk outlet water temperature 105-DR, 19:18675 (R;US)
Effects of Hanford Operations on Columbia River temperatures: Interim report No. 2, 19:18631 (R;US)

Water Chemistry
Reduction of the amount of dichromate added to reactor cooling water: Interim report, Production Test-IP-321-A, 19:18691 (R;US)

Xenon Oscillations
Xenon and Samarium reactivity effects associated with coolant loss, 19:18664 (R;US)

HANFORD RESERVATION

Decommissioning
Accelerated Decontamination and Decommissioning at the Hanford Site, 19:18155 (R;US)

Decontamination
Accelerated Decontamination and Decommissioning at the Hanford Site, 19:18155 (R;US)

Economic Development
Redeployment as an alternative to decommissioning: Conversion of a US Department of Energy facility to fish rearing, 19:18256 (R;US)

Environmental Effects
Wildlife studies on the Hanford Site: 1993 Highlights report, 19:19617 (R;US)

Environmental Quality
Environmental surveillance master sampling schedule, 19:18189 (R;US)

Geology
Geophysical data fusion for subsurface imaging: Phase 1, 19:19916 (R;US)

Hazardous Materials
1993 Tier Two emergency and hazardous chemical inventory: Emergency Planning and Community Right-To-Know Act Section 312, 19:18846 (R;US)

Historical Aspects
Legend and legacy: Fifty years of defense production at the Hanford Site, 19:18250 (R;US)

Hydrology
Monitoring groundwater and river interaction along the Hanford reach of the Columbia River, 19:19619 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 19:19614 (R;US)

Inorganic Compounds
1993 Tier Two emergency and hazardous chemical inventory: Emergency Planning and Community Right-To-Know Act Section 312, 19:18846 (R;US)

Nuclear Facilities
Deactivation completed at historic Hanford Fuels Laboratory, 19:17963 (R;US)
Establishing a predictive maintenance (PdM) program at the Hanford Site, 19:18255 (R;US)

Organic Compounds
1993 Tier Two emergency and hazardous chemical inventory: Emergency Planning and Community Right-To-Know Act Section 312, 19:18846 (R;US)

Program Management
Documentation of Hanford Site independent review of the Hanford Waste Vitrification Plant Preliminary Safety Analysis Report: Revision 3, 19:18142 (R;US)
RCRA and operational monitoring 1994 fiscal year work plan, WBS 1.5.3, 19:18165 (R;US)
The Hanford Site focus, 1994, 19:20489 (R;US)

Progress Report
Hanford Laboratories Operation monthly activities report, February 1957, 19:17948 (R;US)

Public Relations
Public participation at Hanford: A new approach to a long-lived problem, 19:18880 (R;US)

Radiation Monitoring
Air pathway effects of nuclear materials production at the Hanford Site, 1983 to 1992, 19:18188 (R;US)

Radioactive Waste Disposal
Hanford surplus facilities programs facilities listings and descriptions: Revision 1, 19:18164 (R;US)

Radioactive Waste Facilities
Corrosion considerations for life management of Hanford high-level waste tanks, 19:18144 (R;US)
Establishing a predictive maintenance (PdM) program at the Hanford Site, 19:18255 (R;US)
Hanford high-level waste evaporator/crystallizer corrosion evaluation, 19:18145 (R;US)
National emission standards for hazardous air pollutants application for approval to stabilize the 105N Basin, 19:18223 (R;US)
Technology Evaluation Workshop Report for Tank Waste Chemical Characterization, 19:18249 (R;US)

Radioactive Waste Management
Tank waste processing and disposal technology development data summary, 19:18140 (R;US)

Radioactive Waste Processing
Tank waste processing and disposal technology development data summary, 19:18140 (R;US)

Radioactive Waste Storage
Environmental Assessment: Waste Tank Safety Program, Hanford Site, Richland, Washington, 19:18011 (R;US)
Ferrocyanide Safety Program: Quarterly report for the period ending March 31, 1994, 19:18246 (R;US)
Flammable gas generation, retention, and release in high-level waste tanks – physical and chemical models, 19:18154 (R;US)
Gas generation from Hanford grout samples: Final report, 19:17994 (R;US)
Organic carbon in Hanford single-shell tank waste, 19:18242 (R;US)
Recommendation 93-5 Implementation Plan, 19:18039 (R;US)
Resolving the Ferrocyanide Safety Issue at the Hanford Site, 19:18252 (R;US)
Tank farm surveillance and waste status summary report for December 1993, 19:18136 (R;US)

Remedial Action
Establishing a predictive maintenance (PdM) program at the Hanford Site, 19:18255 (R;US)
Interim remedial measures proposed plan for the 200-ZP-1 Operable Unit, Hanford Site, Washington, 19:18185 (R;US)
Public comments and responses to the 1993 Hanford cleanup five-year plan, 19:18038 (R;US)
Rare earth analysis on a composite reactor effluent water sample, 19:19119 (R;US)
Redeployment as an alternative to decommissioning: Conversion of a US Department of Energy facility to fish rearing, 19:18256 (R;US)
Sediment and process water characterization in support of 300 Area North Process Pond physical soil washing test, 19:18257 (R;US)
Use of an Open-path FTIR sensor to measure VOCs at the Hanford Site, 19:18253 (R;US)

Risk Assessment
Risk management study for the Hanford Site facilities: Risk reduction cost comparison for the retired Hanford Site facilities: Volume 4, 19:18248 (R;US)
Risk management study for the retired Hanford Site facilities: Risk management executive summary: Volume 1, 19:18247 (R;US)

Spent Fuel Storage
Spent Fuel Working Group report on inventory and storage of the Department's spent nuclear fuel and other reactor irradiated nuclear materials and their environmental, safety and health vulnerabilities: Volume 2, Working Group Assessment Team reports; Vulnerability development forms; Working group documents, 19:17969 (R;US)
Spent Fuel Working Group report on inventory and storage of the Department's spent nuclear fuel and other reactor irradiated nuclear materials and their environmental, safety and health vulnerabilities: Volume 3, Site team reports, 19:17970 (R;US)

Tanks
Chemical Processing Department 200 West Area tank farm inventory and waste reports, January 1956–December 1956, 19:18062 (R;US)
Chemical Processing Department 200 west area tank farm inventory and waste reports, 19:18061 (R;US)
Ferrocyanide Safety Program: Data requirements for the ferrocyanide safety issue developed through the data quality objectives (DQO) process, 19:18139 (R;US)
Preliminary conceptual design for the destruction of organic/ferrocyanide constituents in the Hanford tank waste with low-temperature hydrothermal processing, 19:18114 (R;US)
The use of ultra high pressure water for installation of instrumentation in "assumed" leaker tanks, 19:18152 (R;US)

Terrestrial Ecosystems
Vegetation communities associated with the 100-Area and 200-Area facilities on the Hanford Site, 19:19634 (R;US)

Waste Management
Characterization of past and present waste streams from the 325 Radiochemistry Building, 19:18138 (R;US)
Chemical Processing Department 200 West Area tank farm inventory and waste reports, January 1956–December 1956, 19:18062 (R;US)
Public comments and responses to the 1993 Hanford cleanup five-year plan, 19:18038 (R;US)
Remote infrared imaging system for scanning hazardous waste tanks, 19:18148 (R;US)

Waste Processing
Data validation report for the 100-D Ponds Operable Unit: 100-D ponds sampling, 19:18161 (R;US)
Mixed waste and waste minimization: The effect of regulations and waste minimization on the laboratory, 19:18112 (R;US)
Preliminary plan for treating mixed waste, 19:17992 (R;US)
Testing and evaluation of alternative process systems for immobilizing radioactive mixed particulate waste in cement, 19:18159 (R;US)

Waste Storage
State Waste Discharge Permit Application: Electric resistance tomography testing, 19:19590 (R;US)

HAPO
Meteorological information, 19:19537 (R;US)
Quality and availability of fission-products, 19:18057 (R;US)

HAZARDOUS MATERIALS
See also TOXIC MATERIALS
Adsorption Isotherms
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
Catalysts
Development studies for a novel wet oxidation process, 19:18966 (R;US)
Composting
Composting of soils/sediments and sludges containing toxic organics including high energy explosives: Final report, 19:19582 (R;US)
Containment
Engineering Assessment and Certification of Integrity of the 177-R2 tank system, 19:18128 (R;US)
Ecological Concentration
Toxicological benchmarks for screening potential contaminants of concern for effects on terrestrial plants: Environmental Restoration Program, 19:19598 (R;US)
Emergency Plans
Emergency Planning and Community Right-to-Know Act (EPCRA) requirements: CERCLA Information Brief, 19:18840 (R;US)
Emission
Measurement of chemical emissions under the influence of low-NO_x combustion modifications: Final report, 19:18448 (R;US)
Environmental Transport
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
H-Area Seepage Basins groundwater monitoring report: Volume 1, First and second quarters 1993, 19:19643 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 19:19614 (R;US)
Inventories
1993 Tier Two emergency and hazardous chemical inventory: Emergency Planning and Community Right-To-Know Act Section 312, 19:18846 (R;US)
SRS Tier II emergency and hazardous chemical inventory report, 19:18177 (R;US)
Meetings
Hazardous materials symposium in support of the cooperative program in surety technologies and initial meeting with the All Russia Institute of Automatics: Foreign trip report, January 23–February 11, 1994, 19:18022 (R;US)
Pollution Regulations
Environmental regulatory update table, March–April 1994, 19:18851 (R;US)
Public Information
Emergency Planning and Community Right-to-Know Act (EPCRA) requirements: CERCLA Information Brief, 19:18840 (R;US)
Quantitative Chemical Analysis
Data validation report for the 100-D Ponds Operable Unit: 100-D ponds sampling, 19:18161 (R;US)
SRS Tier II emergency and hazardous chemical inventory report, 19:18177 (R;US)
Radiation Monitoring
Surface soil sampling plan for the 200-UP-2 operable unit, 19:18160 (R;US)
Radioactive Waste Disposal
Area 5 Site Characterization Project: Report of hydraulic property analysis through August 1993, 19:18032 (R;US)
Remedial Action
Surface soil sampling plan for the 200-UP-2 operable unit, 19:18160 (R;US)
Scavenging
Scavenging of stored TBP waste, 19:18058 (R;US)
Solidification
Testing and evaluation of alternative process systems for immobilizing radioactive mixed particulate waste in cement, 19:18159 (R;US)
Storage Facilities
Decision analysis for INEL hazardous waste storage, 19:18050 (R;US)
Transport Regulations
Hazardous materials package performance regulations, 19:18277 (IA;JP)
Manifest requirements: RCRA Information Brief, 19:18014 (R;US)

HIGH-LEVEL RADIOACTIVE WASTES
Chemical Properties
Waste Tank Organic Safety Project: Analysis of liquid samples from Hanford waste tank 241-C-103, 19:18110 (R;US)

Containment
Progress in resolving Savannah River Site high-level waste tank safety issues, 19:18167 (R;US)

Health Hazards
Limited field investigation report for the 100-BC-1 Operable Unit, 19:18036 (R;US)

Liquid Wastes
Study on immobilization of high level waste with alkali-activated slag cement, 19:18007 (R;CN;In Chinese)

Mixing
Progress toward mitigation of flammable gas Tank 241-SY-101, 19:18157 (R;US)

Packaging
Issues and design concepts for high-activity liquid packaging, 19:19243 (R;US)
Packaging development needs to support environmental restoration, 19:19601 (IA;JP)

Physical Properties
Waste Tank Organic Safety Project: Analysis of liquid samples from Hanford waste tank 241-C-103, 19:18110 (R;US)

Pumping
Progress toward mitigation of flammable gas Tank 241-SY-101, 19:18157 (R;US)

Radioactive Waste Disposal
Yucca Mountain Site Characterization Project: Technical Data Catalog quarterly supplement, 19:18041 (R;US)

Radioactive Waste Management
Public involvement in radioactive waste management decisions, 19:18042 (R;US)
Systems Engineering Management Plan: Volume 5 of the MRS Project Management Plan, 19:18043 (R;US)

Radioactive Waste Processing
Frequency of deflagration in the in-tank precipitation process tanks due to loss of nitrogen purge system: Revision 2, 19:18173 (R;US)
Program plan: DWPF/HLWDP stirred Melter Program Plan, 19:18172 (R;US)

Radioactive Waste Storage
Nuclear waste programs: Semiannual progress report, October 1991–March 1992, 19:17993 (R;US)
Recommendation 93-5 Implementation Plan, 19:18039 (R;US)
Travel to France and Switzerland to collaborate on radioactive waste storage: Foreign trip report, June 15–20, 1993, 19:18019 (R;US)

Risk Assessment
Limited field investigation report for the 100-BC-1 Operable Unit, 19:18036 (R;US)

Solidification
Study on immobilization of high level waste with alkali-activated slag cement, 19:18007 (R;CN;In Chinese)

Tanks
Environmental Assessment: Waste Tank Safety Program, Hanford Site, Richland, Washington, 19:18011 (R;US)
Recommendation 93-5 Implementation Plan, 19:18039 (R;US)

Test Facilities
Present status of the Waste Safety Testing Facility, 19:18080 (RA;JP)

Underground Disposal
Natural alteration in the cooling Topopah Spring tuff, Yucca Mountain, Nevada, as an analog to a waste-repository hydrothermal regime, 19:18082 (R;US)
Plant succession on disturbed sites in four plant associations in the Northern Mojave Desert, 19:18044 (R;US)
Site characterization plan thermal goals reevaluation, 19:18040 (R;US)
The impact of repository heat on hydrological behavior at Yucca Mountain, 19:18134 (R;US)
The influence of annual species composition and density on perennial seedling density in four plant communities in the Northern Mojave Desert, 19:19591 (R;US)
The integrated interaction between high-level waste glass and the near field barriers, 19:19578 (R;BE)
The role of multiple barriers in assuring waste package reliability: Yucca Mountain Project, 19:18130 (R;US)

Underground Storage
Distributions of 14 elements on 60 selected absorbers from two simulant solutions (acid-dissolved sludge and alkaline supernate) for Hanford HLW Tank 102-SY, 19:18081 (R;US)
Environmental Assessment: Waste Tank Safety Program, Hanford Site, Richland, Washington, 19:18011 (R;US)
Organic layer sampling for SST 241-C-103 background, and Data Quality Objectives, and analytical plan, 19:18107 (R;US)
Progress toward resolution of vapor problems associated with tank 241-C-103, 19:18149 (R;US)
The Hanford Site Tank Waste Remediation System: An update, 19:18153 (R;US)

Vitrification
Corrosion study for a radioactive waste vitrification facility, 19:18166 (R;US)
Criticality assessment of initial operations at the Defense Waste Processing Facility, 19:18168 (R;US)
Disposition of actinides released from high-level waste glass, 19:17997 (R;US)
Nuclear waste programs: Semiannual progress report, October 1991–March 1992, 19:17993 (R;US)
Program plan: DWPF/HLWDP stirred Melter Program Plan, 19:18172 (R;US)
Properties of glass-bonded zeolite monoliths, 19:17999 (R;US)
Radioactive waste vitrification offgas analysis proposal, 19:18115 (R;US)

Waste Transportation
Incentives for the use of depleted uranium alloys as transport cask containment structure, 19:19210 (IA;JP)

HIGH-TC SUPERCONDUCTORS
A high T_c proximity effect superconductor and its superconductivity, 19:20295 (R;CN)
A quantitative understanding of the enhanced irreversibility line and critical current density due to linear defects in $Bi_2Sr_2CaCu_2O_8$ single crystals with the vortex dimensionality-crossover model, 19:19064 (R;US)
An explanation of the irreversibility behavior in the highly-anisotropic high-temperature superconductors, 19:19061 (R;US)
Anisotropy of the critical current density in Bi-2223/Ag tapes, 19:19075 (R;US)
Defect structures in ceramic superconductors, 19:20299 (R;DK;In Danish)
Effect of thermal annealing on grain boundary chemistry of polycrystalline $TlBa_2Ca_2Cu_3O_y$ films, 19:19067 (R;US)
Enhanced irreversibility by crystal defects in the Bi-Sr-Ca-Cu-O system, 19:19060 (R;US)
Flux-pinning related defects in $YBa_2Cu_3O_{7-x}$ thin films grown on miscut $LaAlO_3$ (001) substrates, 19:19066 (R;US)
Lattice instability of high-Tc oxide superconductors studied by inelastic neutron scattering, 19:20258 (RA;JP)
Magnetic measurements of the lower critical fields and irreversible properties of oxygen deficient $YBa_2Cu_3O_{7-\delta}$ single crystals, 19:19063 (R;US)
Response of high T_c superconducting Josephson junction to nuclear radiation, 19:19437 (R;CN)
Structures and properties of materials recovered from high shock pressures, 19:19080 (R;US)
Superconductive properties, interaction mechanisms, materials preparation and electronic transport in high-T_c superconductors: Final report, 19:20296 (R;DE)
Transport critical currents and grain boundary coupling in high-$T_c$superconductors, 19:19062 (R;US)

HIGHLY ENRICHED URANIUM
Georgia Tech research reactor conversion to low enrichment–calculational capabilities assessment, 19:18616 (RA;US)
HEU - LEU conversions: Status and application considerations, 19:18599 (RA;US)
HEU-LEU conversion of FRJ-2 DIDO at KFA Juelich, 19:18522 (RA;US)
Measurements and experiences during conversion of DR 3 to low enriched silicide fuel, 19:18608 (RA;US)
Power upgrade and conversion of the Colombia R-1 reactor to TRIGA-Leu fuel, 19:18618 (RA;US)
State of the LEU conversion effort at the University of Virginia reactor, 19:18617 (RA;US)
Status report on the conversion of the Rhodel Island Nuclear Science Center Reactor, 19:18615 (RA;US)
Status report on the core conversion of the OSIRIS reactor, 19:18614 (RA;US)

HIGHWAYS
See ROADS

HILACS
A heavy ion linac complex for unstable nuclei, 19:19334 (R;JP)
ILSE combiner study, 19:20455 (R;US)

HIPURE PROCESS
See DESULFURIZATION

HISTONES
Modulation of expression of genes encoding nuclear proteins following exposure to JANUS neutrons or γ-rays, 19:19814 (R;US)

HOELTER PROCESS
See DESULFURIZATION

HOFFMAN PROCESS
See COAL GASIFICATION

HOG FUEL
See WOOD WASTES

HOLMIUM 151
In-beam γ-ray spectroscopy of N=84 nuclei above Gd and the impact of the $(\pi h_{11/2}\nu h_{9/2})1^+$ attraction on their yrast lines, 19:20091 (R;DE)

HOLMIUM 165 TARGET
Fragmentation of hot nuclear systems formed in Xe-induced reactions at E_{beam}=60 MeV/nucleon, 19:20218 (R;US)
Incomplete fusion of ^{20}Ne and ^{165}Ho, 19:20202 (IA;RU)
Partition of excitation energy between reaction products in heavy ion collisions, 19:20205 (IA;RU)
HORIZONTAL AXIS TURBINES
Effects of a vibration mass damper in a wind turbine tower, 19:18416 (R;DK)
HOT CELLS
Decommissioning of the Risoe Hot Cell facility: 7. Periodic report covering July 1 to December 31, 1993, 19:19233 (R;DK)
HOT GAS CLEANUP
Hot gas cleanup test facility for gasification and pressurized combustion: Quarterly technical progress report, October 1–December 31, 1992, 19:18445 (R;US)
HOT NUCLEI
Hot nuclei and fragmentation, 19:20068 (R;FR)
HOT PLASMA
Soft X-ray detection in diagnostics of hot plasmas, 19:20412 (RA;CZ)
HOT WATER
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a 10MW-class plant), 19:18388 (IA;JP;In Japanese)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (development of a 10MW-class demonstration plant/development of a downhole pump), 19:18389 (IA;JP;In Japanese)
HOT-DRY-ROCK SYSTEMS
Analysis and evaluation on the heat extraction system form hot dry rocks, 19:18403 (IA;JP;In Japanese)
Data analysis and evaluation on the development of hot dry rock power generation technology, 19:18412 (IA;JP)
Development of a power generation plant using hot water.: Development of a hot dry rock power generation system (development of elemental technologies), 19:18392 (IA;JP;In Japanese)
Development of hot dry rock power generation technology, 19:18395 (IA;JP)
Researches on fracturing and heat extraction from hot dry rock, 19:18405 (IA;JP)
Study on technology of fracture heat extraction from hot dry rock, 19:18400 (IA;JP;In Japanese)
HOUSES
DARTS: SAS Mainframe Energy/Housing Data Cross-Tabulation Report Generator, 19:20543 (CM;US)
Ecolonia, 19:18946 (RA;FI)
Improving the thermal performance of the US residential window stock, 19:18920 (R;US)
Low-energy building concepts, 19:18951 (RA;FI)
System integration for low energy buildings, 19:18952 (RA;FI)
The self-sufficient solar house Freiburg, 19:18942 (RA;FI)
Transparent insulation materials in active and passive solar heating, 19:18947 (RA;FI)
HT-6M TOKAMAK
The experiment and analysis of tailoring V_L and I_P with ZnO voltage-sensitive resistor on HT-6M, 19:20430 (R;CN)
HTGR TYPE REACTORS
A review of selected aspects of the effect of water vapor on fission gas release from uranium oxycarbide, 19:18521 (R;US)
HTO
See HEAVY WATER
HUGENHOLTZ-PINES THEORY
See HYDROGEN
HUMAN CHROMOSOME 6
International workshop on chromosome 6: Final report, June 1, 1992–May 31, 1993, 19:19690 (R;US)
HUMAN FACTORS
Selecting the seismic HRA approach for Savannah River Plant PRA revision 1, 19:18637 (R;US)
HUMAN FACTORS ENGINEERING
A human factors approach to waste form design, 19:18119 (R;US)
HUMAN POPULATIONS
See also A-BOMB SURVIVORS
MINORITY GROUPS
A summation of results on radiation exposure and radiation risks, 19:19848 (IA;DE;In German)
Columbia River Pathway Dosimetry Report, 1944-1992: Hanford Environmental Dose Reconstruction Project, 19:19663 (R;US)
Radioactivity of people in Finland in 1989-1990: Supplement 8 to Annual Report STUK-A–89, 19:19901 (R;FI)
Radiological impact of 1992 operations at the Savannah River Site, 19:18192 (R;US)
Radiological performance assessment for the E-Area Vaults at the Savannah River Site: Part 2, Simulation of contaminant migration in the far-field, 19:19639 (R;US)
SEECAL: Program to calculate age-dependent, 19:19895 (R;US)
Some particularities of thyroid and sugar diabetes diseases development in Gutsul region, 19:19875 (IA;UA;In Ukrainian)
HUMANS
See HUMAN POPULATIONS
HUMIC ACIDS
Influence of organic matter and humic acids in solution on uranium solvent extraction process, 19:17947 (R;CN;In Chinese)
HUNGARY
Spent fuel management in Hungary: Present status and progress in the back-end of the nuclear fuel cycle, 19:18068 (RA;XA)
HYBRID ELECTRIC-POWERED VEHICLES
Kansas State University DOE/KEURP Site Operator Program: Year 3, Third quarter report, January 1, 1994–March 31, 1994, 19:19009 (R;US)
HYDRAULIC FRACTURES
Analysis and assessment on hydrothermal systems, 19:18409 (IA;JP)
Study on technology of fracture heat extraction from hot dry rock, 19:18400 (IA;JP;In Japanese)
HYDRAULIC FRACTURING
Analysis and assessment on hydrothermal systems, 19:18409 (IA;JP)
Researches on fracturing and heat extraction from hot dry rock, 19:18405 (IA;JP)
HYDRAULIC RAMS
See PUMPS
HYDRAULICS
ERP-IV-A program for transient thermal-hydraulic analysis of PWR plant, 19:20508 (R;CN;In Chinese)
HYDROCARBONS

ALKENES
BENZENE
BENZOPYRENE
CAROTENOIDS
CHRYSENE
NAPHTHALENE
POLYCYCLIC AROMATIC HYDROCARBONS
POLYENES
PYRENE
STYRENE
A new association-model for binary VLE of alcohol/hydrocarbon and amine/hydrocarbon mixtures, 19:19151 (R;US)
A new comprehensive reaction mechanism for combustion of hydrocarbon fuels, 19:19181 (R;US)
Phase effect in 3-fold and 6-fold potentials of CH_3 group on Q-dependence in neutron scattering, 19:20282 (RA;JP)
Radiative properties of char, fly-ash, and soot particles in coal flames: Quarterly report No. 5, September 15–December 15, 1993, 19:19172 (R;US)
Some effects of heat release in premixed flames, 19:19174 (R;US)
Superacid catalysis of light hydrocarbon conversion: Second quarterly report, November 25, 1993–February 26, 1994, 19:19141 (R;US)
HYDROCHLORIC ACID
Toxicological benchmarks for screening potential contaminants of concern for effects on terrestrial plants: Environmental Restoration Program, 19:19598 (R;US)

HYDROELECTRIC POWER
Salt Lake City Area Integrated Projects Electric Power Marketing: Draft environmental impact statement: Volume 1, Summary, 19:18818 (R;US)

HYDROELECTRIC POWER PLANTS
South Fork Tolt River Hydroelectric Project: Adopted portions of a 1987 Federal Energy Regulatory Commission's Final Environmental Impact Statement, 19:18347 (R;US)

HYDROELECTRICITY
See HYDROELECTRIC POWER

HYDROFLUORIC ACID
Nuclear criticality safety assessment of the proposed CFC replacement coolants, 19:18235 (R;US)

HYDROGEN
Action plan for response to abnormal conditions in Hanford high level radioactive liquid waste storage tanks containing flammable gases: Revision 1, 19:18137 (R;US)
Advanced hydrogen/method utilization technology demonstration: Final report, 19:19014 (R;US)
Detonation cell size measurements and predictions in hydrogen-air-steam mixtures at elevated temperatures, 19:18769 (R;US)
Development of a hydrogen and deuterium polarized gas target for application in storage rings: Progress report, [March 1, 1993–February 28, 1994], 19:19347 (R;US)
Effects of molecular transport on turbulence-chemistry interactions in a hydrogen-argon-air jet diffusion flame, 19:19178 (R;US)
Explicit construction of convergent MBPT series for the ^{1} triangle state of C_2 and the H_2 ground state at large bond distance, 19:20230 (R;DE)
High temperature membranes for H_2S and SO_2 separations: Quarterly progress report, October 1, 1993–December 31, 1993, 19:17784 (R;US)
Investigation of synchrotron radiation-induced photodesorption in cryosorbing quasi-cooled geometry: Revision 2, 19:19409 (R;US)
Nuclear isovector spin responses from $(\vec{p},\vec{n})$ reactions at 494 MeV, 19:20214 (R;US)
Preparation of H_2-permselective silica membranes by alternating reactant deposition: Quarterly progress report, September 1, 1993–December 31, 1993, 19:18301 (R;US)

HYDROGEN 2

HYDROGEN SULFATES
See SULFURIC ACID

HYDROGEN SULFIDES
Gasoline from natural gas by sulfur processing: Quarterly technical progress report No. 2, October 1, 1993–December 31, 1993, 19:18340 (R;US)
High temperature electrochemical separation of H_2S from coal gasification process streams: Quarterly progress report, October 1, 1993–December 31, 1993, 19:17802 (R;US)
High temperature membranes for H_2S and SO_2 separations: Quarterly progress report, October 1, 1993–December 31, 1993, 19:17784 (R;US)
Membrane processes for removal of hydrogen sulfide from natural gas, 19:17938 (R;US)
Production of elemental sulfur from H_2S and CO_2 derived from a coal desulfurization process: Quarterly technical process report, December 1, 1993–March 31, 1994, 19:17826 (R;US)

HYDROGEN-BASED ECONOMY
Hydrogen as an energy carrier, 19:18886 (R;DK)

HYDROGENASE
See HYDROGENASES

HYDROGENASES
Crystallographic studies of nitrogenase and hydrogenase: Progress report, June 1, 1992–April 1, 1994, 19:19681 (R;US)

HYDROGENATION
Molecular catalytic coal liquid conversion: Quarterly progress report, [April–June 1993], 19:17798 (R;US)
Rate enhancement for catalytic upgrading coal naphthas: Quarterly report, April–June 1993, 19:17800 (R;US)

HYDROTHERMAL CONVECTIVE SYSTEMS
See HYDROTHERMAL SYSTEMS

HYDROTHERMAL SYSTEMS
Analysis and assessment on hydrothermal systems, 19:18409 (IA;JP)
Data analysis and assessment accompanied with technology development for increasing geothermal energy recovery.: Analysis and assessment on geothermal fluid flow, 19:18401 (IA;JP;In Japanese)
Development of a downhole pump, 19:18406 (IA;JP)
Development of power generation plant using hot water.: Development of a binary cycle power generation plant (study on Production and re-injection of hot water/development of technology for increasing geothermal energy recovery), 19:18390 (IA;JP;In Japanese)
Geothermal energy prospecting technology.: Study on technology for deep-seated geothermal resources exploration, 19:18375 (IA;JP;In Japanese)
Summary report on the 1992 Sunshine Project R and D.: Geothermal energy, 19:18374 (I;JP;In Japanese)
Travel to Argentina to conduct a series of discussions with members of the Reactor Chemistry Division and Corrosion Division and the University of Buenos Aires concerning those topics of research at ORNL: Foreign trip report, March 14–March 21, 1994, 19:19153 (R;US)

HYFLEX PROCESS
See COAL GASIFICATION

HYPERFRAGMENTS
See HYPERNUCLEI

HYPERNUCLEI
Production of Λ hypernuclei with a large neutron excess, 19:20188 (IA;RU)

I

IAEA
Travel to Austria to attend the 10th Meeting of the IAEA Standing Advisory Group on the Safe Transport of Radioactive Materials: Foreign trip report, March 18–26, 1994, 19:17972 (R;US)

IAEA SAFEGUARDS
SARP-II: Safeguards Accounting and Reports Program, Revised, 19:18265 (R;US)
Simulation of HLNC and NCC measurements, 19:18264 (R;US)

IBR-1
See IFR REACTOR

ICE
Measurements of the summer surface heat budget of the Northeast Water Polynya: USCGC Polar Sea cruise, July 15–August 15, 1992, 19:19651 (R;US)

ICELAND
Environmental radioactivity in the North Atlantic region including the Faroe Islands and Greenland. 1990 and 1991, 19:19625 (R;DK)

ICF DEVICES
Preliminary hazards analysis for the National Ignition Facility, 19:20470 (R;US)

ICI PROCESS
See DESULFURIZATION

ICR HEATING
Slow Alfven wave excitation by fast wave resonant mode conversion and direct antenna coupling in the scrape-off layer of a fusion plasma, 19:20368 (IA;AU)
Tuning of JET transmission line/antenna system during ICRH, 19:20424 (R;SE)

ICRP CRITICAL GROUP
Secretion of thyroid hormones in Chernobyl accident mitigators suffering from jaundice, 19:19762 (IA;UA;In Ukrainian)
Simulation of timogen action on immunity at persons irradiated during the Chernobyl accident, 19:19878 (IA;UA;In Ukrainian)
ICRU
An inventory of dose specification in the Nordic centres and a suggestion for a standardized procedure, 19:19706 (RA;XA)
Background considerations for the ICRU-report group on dose specifications, 19:19704 (RA;XA)
Comments on ICRU 29 and ICRU 38, 19:19705 (RA;XA)
Discussion of the differences between the ICRU definition and the alternative proposal presented at the meeting, 19:19708 (RA;XA)
What accuracy is needed in dosimetry, 19:19850 (RA;XA)
IDAHO CHEMICAL PROCESSING PLANT
INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 2, Final report: Attachment, 19:19915 (R;US)
Idaho Chemical Processing Plant Site Development Plan, 19:18259 (R;US)
IDAHO NATIONAL ENGINEERING LABORATORY
1994 INEL site-specific plan, 19:18024 (R;US)
Benchmark and partial validation testing of the FLASH computer code, Version 3.0, 19:18045 (R;US)
Computer modeling of jet mixing in INEL waste tanks, 19:18109 (R;US)
Environmental resource document for the Idaho National Engineering Laboratory: Volume 2, 19:19596 (R;US)
Environmental resource document for the Idaho National Engineering Laboratory: Volume 1, 19:18186 (R;US)
INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 2, Final report, 19:18025 (R;US)
Retrieval/ex situ thermal treatment scoring interaction report, 19:18051 (R;US)
IFP PROCESS
See DESULFURIZATION
IFR REACTOR
Analysis of IFR driver fuel hot channel factors, 19:18539 (R;US)
Applied physical chemistry progress report, October 1991–September 1992, 19:18754 (R;US)
Designing for a safe response to operational and severe accident initiators in the Integral Fast Reactor, 19:18764 (R;US)
Energy over the centuries: The IFR option, 19:18263 (R;US)
Recent innovations in IFR safety research, 19:18763 (R;US)

Beta decay of deformed A=100-120 nuclei, 19:20113 (IA;RU)
Decay energies and half-lives of nuclei far from beta-stability line, 19:20114 (IA;RU)
Fission of nuclei with A=100-200, 19:20172 (IA;RU)
Nonstatistical effects in nuclei, 19:20082 (IA;RU)
Spontaneous fission stability of nuclei, 19:20183 (IA;RU)
INTERMEDIATE VECTOR BOSONS
See also W MINUS BOSONS
W PLUS BOSONS
Z NEUTRAL BOSONS
CDF results on electroweak physics, 19:20044 (R;US)
$W^{\pm}$ and Z^0 event rates and background estimates for the STAR detector at RHIC in pp collisions, 19:20014 (R;US)
INTERMEDIATE-LEVEL RADIOACTIVE WASTES
Impact of IAEA 85 implementation on transport of medium level waste in France, 19:19186 (IA;JP)
INTERNAL COMBUSTION ENGINES
See also DIESEL ENGINES
SPARK IGNITION ENGINES
A comparison between direct spark ignition and prechamber ignition in an internal combustion engine, 19:17944 (R;US)
Advanced hydrogen/method utilization technology demonstration: Final report, 19:19014 (R;US)
INTERNATIONAL AFFAIRS
See INTERNATIONAL RELATIONS
INTERNATIONAL ATOMIC ENERGY AGENCY
See IAEA
INTERNATIONAL COMMISSION RADIATION UNITS
See ICRU
INTERNATIONAL NUCLEAR INFORMATION SYSTEM
See INIS
INTERNATIONAL RELATIONS
Semantic modeling for theory clarification: The realist vs liberal international relations perspective, 19:18831 (R;US)
INTERNATIONAL STANDARD ORGANIZATION
See ISO
INVENTIONS
A review of the utility requirement under U.S. Patent Law, 19:19693 (RA;US)
Licensing law and business report, 19:18860 (RA;US)
Perspectives on technological competitiveness, 19:18859 (RA;US)

The human genome project and the downside of federal technology transfer, 19:19692 (RA;US)

IODINE
Determination of iodine excretion from the body with urine, 19:19873 (IA;UA;In Ukrainian)

IODINE 129
Air pathway effects of nuclear materials production at the Hanford Site, 1983 to 1992, 19:18188 (R;US)
Radionuclide releases from natural analogues of spent nuclear fuel, 19:18083 (R;US)
Three-dimensional conceptual model for the Hanford Site unconfined aquifer system, FY 1993 status report, 19:19614 (R;US)

IODINE 131
Bayesian approach to the evaluation of dosimetric data for the diagnosis and therapy of thyroid gland disorder. Theoretical, 19:19740 (IA;CZ;In Czech)
Bayesian approach to the evaluation of dosimetric data for the diagnosis and therapy of thyroid gland disorder. Experimental, 19:19741 (IA;CZ;In Czech)

IODINE IODIDES
See IODINE

IODINE ISOTOPES
See also IODINE 129
!ODINE 131
Peculiarities of development, diagnosis and treatment of thyroid cancer at children and teen-ages, 19:19764 (IA;UA;In Ukrainian)

ION BEAMS
See also DEUTERON BEAMS
MAGNESIUM 24 BEAMS
RADIOACTIVE ION BEAMS
An intense proton beam diagnostic using the $^{7}Li(p,\gamma^{8})Be \rightarrow {}^{141}Pr(\gamma,n){}^{140}Pr(\beta^{+})$ nuclear reaction sequence, 19:20466 (R;US)
Measurement of fluence distribution of large area irradiated by scanning high energy ion beam, 19:19469 (RA;JP)

ION CYCLOTRON-RESONANCE HEATING
See ICR HEATING

ION DETECTION
Design and construction of a imaging instrument for studying ion emission from pure ion emitters, 19:19446 (R;US)

ION EXCHANGE MEMBRANES
See MEMBRANES

ION PLASMA WAVES
On helicon wave induced radial plasma transport, 19:20396 (IA;AU)

ION SOURCES
See also DUOPLASMATRONS
NANOGAN: An ultra compact ECRIS for on-line and high voltage applications, 19:19350 (R;FR)

ION SPECTROSCOPY
Channeling of heavy ions: perspectives for precision spectrometry, 19:19454 (RA;DE)
Spectroscopy of fission fragments, 19:19449 (RA;DE)

ION TEMPERATURE
A method for ion temperature measurements at the Extrap-T1 reversed field pinch, 19:20425 (R;SE)
Equilibria and dynamics of temperature in a fusion reactor plasma, 19:20331 (IA;XA)
Transition to thermonuclear burn in fusion plasmas, 19:20330 (IA;XA)

ION-ATOM COLLISIONS
A Monte-Carlo model of differential argon ion-neutral cross-sections, 19:20386 (IA;AU)

IONIC REACTIONS
See CHEMICAL REACTIONS

IONIZATION CALORIMETERS
See SHOWER COUNTERS

IONIZATION CHAMBERS
Evaluation of passive alpha detectors for sensitive/inexpensive/fast characterization of radiological contamination on surfaces and in soils, 19:19580 (R;US)
Experimental determination of corrections for fission fragment investigations using a Frisch gridded ionization chamber, 19:19450 (RA;DE)
New ionization chamber for the mass spectrometer LOHENGRIN (ILL Grenoble), 19:19452 (RA;DE)

IONIZING RADIATIONS
See also X RADIATION
Westinghouse radiological containment guide, 19:19904 (R;US)

IRIDIUM 189
Statistical model analysis of level densities and facilities of excited compound nuclei for heavy ion induced nuclear reactions, 19:20178 (IA;RU)

IRIDIUM 192
Dose specification in iridium-192 interstitial brachytherapy, 19:19707 (RA;XA)

IRON
See also IRON-GAMMA
Comment on: Direct observation of spin-split electronic status of Pd at the Pd(111)/Fe(110) interface, 19:19030 (R;US)
Magnetic and structural instabilities of ferromagnetic and antiferromagnetic Fe/Cu(100), 19:19026 (R;US)
Magnetic properties of nanosize iron clusters, 19:19049 (R;US)
X-ray and Γ-ray spectroscopy of solids under pressure: Annual technical progress report, November 1993–October 1994, 19:19093 (R;US)

IRON 56 REACTIONS
Partition of excitation energy between reaction products in heavy ion collisions, 19:20205 (IA;RU)

IRON ALLOYS
See also IRON BASE ALLOYS
Amorphization kinetics of Zr_3Fe under electron irradiation, 19:19025 (R;US)
Applied physical chemistry progress report, October 1991–September 1992, 19:18754 (R;US)

IRON BASE ALLOYS
See also CAST IRON
STEELS
High-temperature corrosion of iron aluminides, 19:19024 (R;US)
Investigation of moisture-induced embrittlement of iron aluminides: Interim report, 19:19046 (R;US)

IRON COMPLEXES
See also FERROCYANIDES
Intramolecular energy transfer reactions in polymetallic complexes.: Progress report, 1991–1992, 19:19130 (R;US)

IRON COMPOUNDS
See also IRON OXIDES
Highly dispersed catalysts for coal liquefaction: Quarterly report No. 8, May 23, 1993–August 22, 1993, 19:17789 (R;US)

IRON IONS
New calculations of Fe spectra in high-temperature plasmas, 19:19945 (R;US)

IRON OXIDES
Superior catalysts for selective catalytic reduction of nitric oxide: Quarterly technical progress report, 1 January 1994–31 March 1994, 19:17854 (R;US)

IRON-GAMMA
On the 100 magnetic diffuse peak in γ-Fe precipitates in Cu, 19:20262 (RA;JP)

ISO
Travel to France as Chief US Delegate at a meeting of International Standards Organization ISO/TC-85, "Nuclear Technology": Foreign trip report, March 17–March 26, 1994, 19:17945 (R;US)
Travel to the Netherlands for a meeting of the International Standards Organization Technical Committee 204 on transport information and control systems: Foreign trip report, January 22–29, 1994, 19:18959 (R;US)

ISOBUTYLENE
See 2-METHYLPROPENE

ISOMERIC NUCLEI
Isomer beams: spin and excitation of the hot prefragments, 19:20193 (IA;RU)
Self-consistent description of isomer yields in neutron reactions, 19:20103 (RA;XA)

ISOTOPE ENRICHMENT
See ISOTOPE SEPARATION
ISOTOPE SEPARATION
See also LASER ISOTOPE SEPARATION
On line isotopic separator test benches at GANIL, 19:19351 (R;FR)
The GANIL plus program for a RNB facility at GANIL, 19:19349 (R;FR)
Uranium enrichment: An opportunity windo, 19:18575 (IA;CA)
ISOTOPE SEPARATORS
Thermal diffusion development design of experiments, 19:18286 (R;US)
Thermal diffusion development design of main equipment, 19:18287 (R;US)
ISOTOPIC SEPARATION
See ISOTOPE SEPARATION
ITER TOKAMAK
A simplified method to estimate beryllium burn up in breeder blankets of a fusion reactor and its impact on a tritium breeding, 19:20453 (R;JP)
Alpha particle heating during sawteeth in ITER-like reactor, 19:20319 (IA;XA)
An investigation of A.C. losses in two sub-size conductors for the ITER, 19:20452 (R;JP)
Degradation of alpha particle confinement by toroidal field ripple in non-circular tokamak reactors, 19:20323 (IA;XA)
Fusion Safety Program annual report, Fiscal Year 1993, 19:20432 (R;US)
Fusion energy development: The involvement of Canada's nuclear industry, 19:20436 (IA;CA)
ITER EDA newsletter. V. 2, no. 1 (International Thermonuclear Experimental Reactor Engineering Design Activities.), 19:20451 (I;XA)
ITER EDA newsletter. V. 2, no. 10 (International Thermonuclear Experimental Reactor Engineering Design Activities.), 19:20448 (I;XA)
ITER EDA newsletter. V. 2, no. 11 (International Thermonuclear Experimental Reactor Engineering Design Activities.), 19:20449 (I;XA)
ITER EDA newsletter. V. 2, no. 12 (International Thermonuclear Experimental Reactor Engineering Design Activities.), 19:20450 (I;XA)
ITER EDA newsletter. V. 2, no. 2, 19:20447 (I;XA)
Neoclassical transport of toroidal angular momentum caused by alpha-particles in axisymmetric tokamak, 19:20321 (IA;XA)
Requirements for US regulatory approval of the International Thermonuclear Experimental Reactor (ITER), 19:20433 (R;US)
The international controlled thermonuclear fusion research programme, 19:20437 (IA;AU)
Trapped alpha-particles stabilizing effect on low-frequency MHD ballooning modes in ITER plasmas with flat $q(\psi)$ profile, 19:20326 (IA;XA)
Travel to Germany for discussions on ITER divertor physics design and test program: Foreign trip report, February 19–March 5, 1994, 19:20460 (R;US)
Travel to Germany to participate in (ITER) Technical Meeting on Fueling and Pumping: Foreign trip report, January 18–February 2, 1994, 19:20458 (R;US)
Visit Germany in order to participate in the International Thermonuclear Experimental Reactor design activity: Foreign trip report, March 7–25, 1994, 19:20459 (R;US)
ITR REACTOR
See ENRICHED URANIUM REACTORS

J

JAERI TANDEM ACCELERATOR
Concurrent control system for the JAERI tandem accelerator, 19:19366 (RA;JP)
JAPAN
Basic study on nationwide and regional geothermal assessment, 19:18386 (IA;JP)
Spent fuel management in Japan, 19:18070 (RA;XA)
Study of Japanese electrodynamic-suspension maglev systems, 19:19007 (R;US)
JAPAN MATERIALS TESTING REACTOR
See JMTR REACTOR
JECCO PROCESS
See DESULFURIZATION
JET MODEL
Jets in deep inelastic scattering, 19:20028 (R;DE)
Study of jet reconstruction algorithms for HERA ep collider events, 19:20031 (R;DE)
JET REACTORS
See JET TOKAMAK
JET TOKAMAK
Fast particles in JET plasmas, 19:20316 (IA;XA)
Fast sawtooth collapse in tokamaks, 19:20363 (IA;AU)
In-beam study of $^{9}Be(\alpha\ n_1\gamma)\ ^{12}C$ reaction, promising as fast alpha-particle diagnostics in tokamak plasmas, 19:20351 (IA;XA)
Influence of radial diffusion on triton burn-up, 19:20318 (IA;XA)
Tuning of JET transmission line/antenna system during ICRH, 19:20424 (R;SE)
JMTR REACTOR
Experimental study on DNB heat flux correlations for JMTR safety analysis, 19:18612 (RA;US)
JOB TRAINING
See TRAINING
JOSEPHSON JUNCTIONS
Response of high T_c superconducting Josephson junction to nuclear radiation, 19:19437 (R;CN)
JRR-3M REACTOR
Development of neutron optical devices in JRR-3M, 19:18753 (RA;JP)
JRR-3M neutron radiography facility, 19:18749 (RA;JP)
Study of neutron medical irradiation facility with supermirror neutron guide tube in JRR-3M, 19:19776 (RA;JP)
JUNCTION TRANSISTORS
Non-alloyed, refractory metal contact optimization with shallow implantations of Zn and Mg, 19:19301 (R;US)

K

KAERI
Research activities for probabilistic safety assessment at the Korea Atomic Energy Research Institute, 19:18471 (RA;XA)
KAOLINITE
Synergistic capture mechanisms for alkali and sulfur species from combustion: Final report, 19:18451 (R;US)
KEK LINAC
Device controllers using an industrial personal computer of the PF 2.5-GeV Electron Linac at KEK, 19:19372 (RA;JP)
Network communication libraries for the next control system of the KEK e^-/e^+ Linac, 19:19364 (RA;JP)
KEK PHOTON FACTORY
A flexible graphic display system for accelerator control, 19:19426 (RA;JP)
KEK SYNCHROTRON
A program development tool for KEK VME-MAP control system, 19:19365 (RA;JP)
Delayed neutrons emitted from a cooling water for 12 GeV proton synchrotron at KEK, 19:19396 (RA;JP)
Multi-microprocessor control of the main ring magnet power supply of the 12 GeV KEK proton synchrotron, 19:19360 (RA;JP)
KERNFORSCHUNGSANLAGE JUELICH
User services in the central library of Juelich Research Center, 19:20600 (IA;DE)
KERNKRAFTWERK NIEDERAICHBACH
See NIEDERAICHBACH REACTOR
KIDNEYS
Clinical evaluation of ^{99m}Tc DMSA uptake by kidneys. Preliminary communication, 19:19731 (IA;CZ;In Czech)
Dynamic renal scintigraphy with captopril. Experience and problems in evaluation, 19:19729 (IA;CZ;In Czech)

Normalization of the parametric images generated from dynamic kidney studies, 19:19725 (IA;CZ)

LOVIISA-2 REACTOR
Decommissioning of the Loviisa power plant, 19:18519 (R;FI;In Finnish)

LOW ALLOY STEELS
Transformation plasticity in ductile solids: Annual progress report, June 1, 1993–May 31, 1994, 19:19034 (R;US)

LOW BTU GAS
A study of the NO_x formation from combustion of low heating value gas containing ammonia, 19:17882 (RA;FI)
Heavy duty gas turbine combustion tests with simulated low BTU coal gas, 19:19002 (R;US)

LOW FREQUENCY RADIATION
See LONG WAVE RADIATION

LOW LEVEL COUNTERS
Measurement of the Pb-210 content of commercially available lead samples, 19:19476 (R;DE;In German)

LOW-LEVEL RADIOACTIVE WASTES
Adsorption Isotherms
Determination of site specific distribution coefficients of mixed waste contaminants using an in-situ approach, 19:19637 (R;US)
Environmental Transport
Soil moisture monitoring results at the radioactive waste management complex of the Idaho National Engineering Laboratory, FY-1993, 19:19594 (R;US)
Ground Disposal
Field test of the Rapid Transuranic Monitoring Laboratory, 19:18053 (R;US)
Performance modeling of concrete/metal barriers used in low-level waste disposal, 19:18199 (R;US)
Maritime Transport
Low-level radwaste transportation in Taiwan, 19:17975 (IA;JP)
Radioactive Waste Disposal
Area 5 Site Characterization Project: Report of hydraulic property analysis through August 1993, 19:18032 (R;US)
Estimating costs of low-level radioactive waste disposal alternatives for the Commonwealth of Massachusetts, 19:18046 (R;US)

Identification of permit and waste acceptance criteria provisions requiring modification for acceptance of commercial mixed waste: National Low-Level Waste Management Program, 19:18026 (R;US)
Modeling approaches for concrete barriers used in low-level waste disposal, 19:18091 (R;US)
Standard Review Plan for the review of a license application for a low-level radioactive waste disposal facility: Revision 3, 19:18090 (R;US)

Radioactive Waste Management
Waste Management Facilities Cost Information report for Greater-Than-Class C and DOE equivalent special case waste, 19:18048 (R;US)

Radioactive Waste Processing
Guideline for benchmarking thermal treatment systems for low-level mixed waste, 19:18031 (R;US)
Process Technical Basis Documentation Diagram for a solid-waste processing facility, 19:18147 (R;US)
Surrogate formulations for thermal treatment of low-level mixed waste: Part 1: Radiological surrogates, 19:18030 (R;US)
WRAP 2A Waste Form Qualification Plan, 19:18162 (R;US)

Radioactive Waste Storage
Active sites environmental monitoring Program - Program Plan: Revision 2, 19:18099 (R;US)
Development of a monolith-type package for transport and storage of radioactive steel with particular respect to volume reduction, 19:19188 (IA;JP)

Radiochemical Analysis
Field test of the Rapid Transuranic Monitoring Laboratory, 19:18053 (R;US)

Solidification
Gas generation from Hanford grout samples: Final report, 19:17994 (R;US)
Testing and evaluation of alternative process systems for immobilizing radioactive mixed particulate waste in cement, 19:18159 (R;US)

Stabilization
Phosphate bonded ceramics as candidate final-waste-form materials, 19:18002 (R;US)

Underground Disposal
A modeling study of the effect of depth of burial of depleted uranium and thorium on radon gas flux at a dry desert alluvial soil radioactive waste management site (RWMS), 19:19532 (R;US)

Underground Storage
Soil moisture monitoring results at the radioactive waste management complex of the Idaho National Engineering Laboratory, FY-1993, 19:19594 (R;US)

Waste Processing
Preliminary plan for treating mixed waste, 19:17992 (R;US)

Waste Transportation
Development of a monolith-type package for transport and storage of radioactive steel with particular respect to volume reduction, 19:19188 (IA;JP)

LUBRICANTS
See also SOLID LUBRICANTS
Information on alternative refrigerants and lubricants: The ARTI refrigerant database, 19:19528 (R;US)
Measurement of viscosity, density, and gas solubility of refrigerant blends in selected synthetic lubricants: Quarterly report, January 1–March 31, 1994, 19:19090 (R;US)
Research update: Materials compatibility and lubricant research (MCLR) program, 19:19091 (R;US)
Sealed tube comparisons of the compatibility of desiccants with refrigerants and lubricants, 19:19092 (R;US)
Solubility, viscosity and density of refrigerant/lubricant mixtures: Quarterly technical progress report, 1 April 1993–30 June 1993, 19:19089 (R;US)
The effect of alternative fuels on the stability and lubricity of crankcase lubricants: Final report, September 1992–September 1993, 19:19013 (R;US)

LUMINOUS PAINTS
Prevalence of technical mesothorium in self-luminous compounds used by New Jersey radium dial workers, 19:19821 (R;US)

Development of MWD system for geothermal wells, 19:18408 (IA;JP)
Thermal Expansion
Data analysis and evaluation accompanied with development of power generation plant using hot water.: Analysis and evaluation of detector and trasmitter, 19:18393 (IA;JP;In Japanese)
Well Drilling
Data analysis and evaluation on the measuring system while geothermal well drilling, 19:18410 (IA;JP)
Study on detector and transmitter for geothermal MWD system, 19:18411 (IA;JP)
Well Logging Equipment
Study on detector and transmitter for geothermal MWD system, 19:18411 (IA;JP)

MYCOBACTERIUM
Novel microorganism for selective separation of coal from ash and pyrite: Second quarterly technical progress report, 1 December 1993–28 February 1994, 19:17818 (R;US)

MYELOID LEUKEMIA
Tables of standardized mortality ratio for cancer in cities, towns and villages in Japan (1973-1987): Multiple myeloma, 19:19891 (R;JP;In Japanese)

MYOCARDIUM
^{99m}Tc-sestamibi SPECT: Contribution of polar maps to the evaluation of left ventricle perfusion, 19:19739 (IA;CZ;In Czech)
Combined examination of perfusion of the myocardium and of the fibular muscle using ^{201}TlCl, 19:19734 (IA;CZ;In Slovak)
Examination of myocardial perfusion by the SPECT method using the radiopharmaceutical Cardiolite, 19:19735 (IA;CZ;In Czech)
Factorial analysis of malfunction of regional contractibility of the left chamber, based on planar ^{99m}Tc-MIBI perfusion scintigraphy with the help of the gating ECG, 19:19736 (IA;CZ;In Czech)
Monitoring of invasive therapy by means of polar maps of ^{99m}Tc-sestamibi SPECT (case study), 19:19738 (IA;CZ;In Czech)
Nuclear medicine: Czech special bulletin, 19:19724 (I;CZ;In Czech)
The potential of radionuclide methods in assessing the "viability" of the myocardium, 19:19737 (IA;CZ;In Slovak)

N

N-REACTOR
Flow loop defect-test behavior of NPR size coextruded fuel tubes, 19:18667 (R;US)
GETR graphite irradiation capsules: H-4, 5, 6 equivalent N Reactor exposure, 19:18733 (R;US)
Hanford contribution for the eighteenth high temperature fuels committee meeting, May 19–21, 1964, 19:18736 (R;US)
N-Reactor Department Research and Development budget for FY 1966 and revision of budget for FY 1965, 19:18731 (R;US)
PT IP-200-A, Temperature measurement of uranium swelling capsule, 19:18659 (R;US)
Preliminary report on CX-2 N-inner fuel tube number 1055-8, 19:18710 (R;US)
Processing data for NIE and NIN KER Loop charges (PT 377), 19:18687 (R;US)
Production Test IP-584-D, supplement B, irradiation of target assemblies in the KER Loops, 19:18718 (R;US)
Production test IP-584-D: Irradiation of target assemblies in the KER Loops, 19:18717 (R;US)
Proposal for charging heat treatment test elements GEH-10-44 & 45, 19:18683 (R;US)

Qualitative aspects of neutron moderation with respect to graphite damage, 19:18666 (R;US)
Reactivity capacity of NPR control systems, 19:18673 (R;US)

NAI DETECTORS
Assessment of ambient-temperature, high-resolution detectors for nuclear safeguards applications, 19:18276 (R;US)

NAL SYNCHROTRON
See FERMILAB ACCELERATOR

NAPHTHA
Rate enhancement for catalytic upgrading coal naphthas: Quarterly progress report for period ending, December 31, 1993, 19:17831 (R;US)
Rate enhancement for catalytic upgrading coal naphthas: Quarterly report, April–June 1993, 19:17800 (R;US)

NAPHTHALENE
Fate of polycyclic aromatic hydrocarbons in plant-soil systems: Plant responses to a chemical stress in the root zone, 19:19551 (R;US)

NATIONAL ACCELERATOR LABORATORY
See FERMILAB ACCELERATOR

NATIONAL ENVIRONMENTAL POLICY ACT

NATIONAL REACTOR TESTING STATION
See IDAHO NATIONAL ENGINEERING LABORATORY

NATO
The history of NATO TNF policy: The role of studies, analysis and exercises conference proceedings: Volume 1, Introduction and summary, 19:19510 (R;US)

NATURAL GAS
A comparison between direct spark ignition and prechamber ignition in an internal combustion engine, 19:17944 (R;US)
Development of a natural Gas Systems Analysis Model (GSAM): Annual report, 19:17943 (R;US)
Effects of natural gas composition on ignition delay under diesel conditions, 19:19006 (R;US)
Evaluation of high-efficiency gas-liquid contactors for natural gas processing: Second semiannual technical progress report, April 1, 1993–September 30, 1993, 19:17939 (R;US)
Federal offshore statistics: 1992: Leasing, exploration, production, and revenues as of December 31, 1992, 19:18883 (R;US)
Gasoline from natural gas by sulfur processing: Quarterly technical progress report No. 2, October 1, 1993–December 31, 1993, 19:18340 (R;US)
Membrane processes for removal of hydrogen sulfide from natural gas, 19:17938 (R;US)
Natural gas monthly, April 1994, 19:17942 (R;US)
Premixed burner studies of NO_x formation and control, 19:18446 (R;US)
Proceedings of the fuels technology contractors review meeting, 19:17940 (R;US)

NATURAL GAS DEPOSITS
Analysis of deep seismic reflection and other data from the southern Washington Cascades: Final report, September 15, 1992–December 31, 1993, 19:17937 (R;US)
Federal offshore statistics: 1992: Leasing, exploration, production, and revenues as of December 31, 1992, 19:18883 (R;US)
Integrated seismic study of naturally fractured tight gas reservoirs: Technical progress report, October 1, 1993–December 31, 1993, 19:17936 (R;US)

NATURAL GAS INDUSTRY
Natural gas monthly, April 1994, 19:17942 (R;US)
US Energy Industry Financial Developments, 1993 fourth quarter, April 1994, 19:17931 (R;US)
Wetland mitigation banking for the oil and gas industry: Assessment, conclusions, and recommendations, 19:19650 (R;US)

NATURAL GAS PROCESSING PLANTS
Evaluation of high-efficiency gas-liquid contactors for natural gas processing: Second semiannual technical progress report, April 1, 1993–September 30, 1993, 19:17939 (R;US)

NATURAL GASOLINE PLANTS
See NATURAL GAS PROCESSING PLANTS

NAVIER-STOKES EQUATION
See NAVIER-STOKES EQUATIONS

NAVIER-STOKES EQUATIONS
An equal-order approximate projection FEM, 19:19285 (R;US)

NEA
Information management in nuclear safety, radiation protection and environmental protection. The nuclear energy agency of OECD (NEA), 19:20602 (IA;DE)

NECKAR-2 REACTOR
The KTA nuclear safety rules. Experience with their application shown with the example of an operating nuclear power station, the GKN-1 and GHN-2, 19:18496 (RA;DE;In German)

NEGATONS
See ELECTRONS

NEGATRONS
See ELECTRONS

NEOCLASSICAL TRANSPORT THEORY
Development of neoclassical transport simulation for the H-1 Heliac, 19:20388 (IA;AU)

NEODYMIUM LASERS
Advanced laser driver for soft x-ray projection lithography, 19:19314 (R;US)
Chirped-Pulse Amplification with flashlamp-pumped Ti:Sapphire amplifiers: Revision 1, 19:19312 (R;US)

NEON 20 REACTIONS
Evaporation residues from complete and incomplete fusion of ^{20}Ne with ^{197}Au and ^{208}POb at E/A=8.6 to 15.0 MeV/u, 19:20198 (IA;RU)
Incomplete fusion of ^{20}Ne and ^{165}Ho, 19:20202 (IA;RU)
Projectile fragmentation and energy dissipation in peripheral heavy-ion collisions, 19:20209 (IA;RU)
Subthreshold antiproton and K^- production in heavy ion collisions, 19:20142 (R;DE)

NEOPLASMS
See also CARCINOMAS
GLIOMAS
LEUKEMIA
LYMPHOMAS
Intrathoracic neoplasms in the dog and cat, 19:19806 (R;US)
Iodine radiotherapy of thyroid cancer, 19:19767 (IA;UA;In Ukrainian)
Paraneoplastic syndromes, 19:19784 (R;US)
Radionuclide therapy of thyroid diseases, 19:19765 (IA;UA;In Ukrainian)
Tables of standardized mortality ratio for cancer in cities, towns and villages in Japan (1973-1987): All malignant neoplasms, 19:19886 (R;JP;In Japanese)

NEOPRENE
Generation of volatile organic compounds by alpha particle degradation of WIPP plastic and rubber material, 19:17995 (R;US)

NEPA
See US NATIONAL ENVIRONMENTAL POLICY ACT

NEPTUNIUM 237
Neptunium-237 production forecasts, IPD 1964–73, 19:18742 (R;US)
Production test IP-582-D, Irradiation of depleted uranium in the KW Snout Facilities, HAPO-275, 19:18715 (R;US)

NEPTUNIUM 238 TARGET
Development of a technique for measuring cross sections of interest to accelerator transmutation of waste (ATW), 19:18085 (R;US)

NEPTUNIUM ISOTOPES
See also NEPTUNIUM 237
Alpha-decay studies of light isotopes in region of U-Pu, 19:20104 (IA;RU)
NETHERLANDS
Nuclear power in the Netherlands, 19:18633 (IA;CA)

Neutron radiography: Status and international prospects, 19:18298 (RA;JP)
NEUTRON REACTIONS
See also THERMAL FISSION
High-spin nuclear target of $^{178}m_2$Hf: creation and nuclear reaction studies, 19:20185 (IA;RU)
Barium 137 Target
Measurement of the cross sections for the reactions ^{137}Ba(n,p) ^{137}Cs, ^{182}W(n,n'α) ^{178m2}Hf and ^{193}Ir(n,2n) ^{192m2}Ir at 14 MeV, 19:20149 (RA;XA)
Cadmium 108 Target
Cross section measurement for ^{108}Cd(n,p) ^{108m}Ag reaction, 19:20150 (RA;XA)
Differential Cross Sections
Comparison of 14 MeV isomer production of ^{178m2}Hf and ^{179m2}Hf using Feshbach-Kerman-Koonin and exciton preequilibrium models, 19:20117 (RA;XA)
Some results of the production of long-lived radionuclides in fast neutron induced reactions, 19:20144 (RA;XA)
Europium 151 Target
Measurements of some activation cross-sections for generation of long-lived nuclides, 19:20152 (RA;XA)
Europium 153 Target
Measurements of some activation cross-sections for generation of long-lived nuclides, 19:20152 (RA;XA)
Gamma Cascades
Self-consistent description of isomer yields in neutron reactions, 19:20103 (RA;XA)
Hafnium 179 Target
Activation cross section measurement for the ^{179}Hf(n,2n)^{178m2}Hf reaction, 19:20151 (RA;XA)
Iridium 193 Target
Measurement of the cross sections for the reactions ^{137}Ba(n,p) ^{137}Cs, ^{182}W(n,n'α) ^{178m2}Hf and ^{193}Ir(n,2n) ^{192m2}Ir at 14 MeV, 19:20149 (RA;XA)
Isomeric Nuclei
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology, 19:20119 (RA;XA)
Neutron reactions with nuclei in isomeric states, 19:20154 (RA;XA)

Mev Range 01-10
Calculated cross sections for production and destruction of some long-lived nuclides of importance in fusion energy applications, 19:20118 (RA;XA)
Influence of sequential (x,n) reactions on production of long-lived radionuclides in fusion reactors, 19:20120 (RA;XA)
Some results of the production of long-lived radionuclides in fast neutron induced reactions, 19:20144 (RA;XA)

Mev Range 10-100
Activation cross section measurement for the $^{179}Hf(n,2n)^{178m2}Hf$ reaction, 19:20151 (RA;XA)
Calculated cross sections for production and destruction of some long-lived nuclides of importance in fusion energy applications, 19:20118 (RA;XA)
Comparison of 14 MeV isomer production of $^{178m2}Hf$ and $^{179m2}Hf$ using Feshbach-Kerman-Koonin and exciton preequilibrium models, 19:20117 (RA;XA)
Cross section measurement for $^{108}Cd(n,p)\ ^{108m}Ag$ reaction, 19:20150 (RA;XA)
Evaluation of some activation cross-sections for formation of long-lived activities important for fusion technology, 19:20153 (RA;XA)
Influence of sequential (x,n) reactions on production of long-lived radionuclides in fusion reactors, 19:20120 (RA;XA)
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology, 19:20119 (RA;XA)
Measurements of 14 MeV neutron cross-sections for the production of isomeric states in Hafnium isotopes, 19:20147 (RA;XA)
Measurements on the cross sections for $^{94}Mo(n,p)$ and $^{95}Mo(n,np)^{94}Nb$, $^{158}Dy(n,p)^{158}Tb$, $^{182}W(n,n\alpha)^{178m2}Hf$ and $^{187}Re(n,2n)^{186m}Re$ reactions at 14 MeV region, 19:20146 (RA;XA)
Some results of the production of long-lived radionuclides in fast neutron induced reactions, 19:20144 (RA;XA)

Multigroup Theory
A Los Alamos Multigrouped Activation File, 19:20217 (R;US)

Nuclear Models
Comparison of 14 MeV isomer production of $^{178m2}Hf$ and $^{179m2}Hf$ using Feshbach-Kerman-Koonin and exciton preequilibrium models, 19:20117 (RA;XA)

Scandium 45 Target
Recent radiochemical studies of some long-lived soft β^- emitting radioisotopes formed in fast neutron induced reactions, 19:20148 (RA;XA)

Three-Body Problem
The neutron-deuteron problem in close coupling formalism with Sturmian functions, 19:20067 (R;DE;In German)

Total Cross Sections
Activation cross section measurement for the $^{179}Hf(n,2n)^{178m2}Hf$ reaction, 19:20151 (RA;XA)
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Texts of papers presented at the second research co-ordination meeting held in Del Mar, California, USA, 29 to 30 April 1993, 19:20143 (R;XA)
Calculated cross sections for production and destruction of some long-lived nuclides of importance in fusion energy applications, 19:20118 (RA;XA)
Evaluation of some activation cross-sections for formation of long-lived activities important for fusion technology, 19:20153 (RA;XA)
Intercomparison of theoretical calculations of important activation cross sections for fusion reactor technology, 19:20119 (RA;XA)
Investigations on the systematics in (n,α) cross sections at 14.6 MeV, 19:20155 (RA;XA)
Measurements of 14 MeV neutron cross-sections for the production of isomeric states in Hafnium isotopes, 19:20147 (RA;XA)
Measurements of some activation cross-sections for generation of long-lived nuclides, 19:20152 (RA;XA)
Measurements on the cross sections for $^{94}Mo(n,p)$ and $^{95}Mo(n,np)^{94}Nb$, $^{158}Dy(n,p)^{158}Tb$, $^{182}W(n,n\alpha)^{178m2}Hf$ and $^{187}Re(n,2n)^{186m}Re$ reactions at 14 MeV region, 19:20146 (RA;XA)
Neutron reactions with nuclei in isomeric states, 19:20154 (RA;XA)
Recent radiochemical studies of some long-lived soft β^- emitting radioisotopes formed in fast neutron induced reactions, 19:20148 (RA;XA)
Self-consistent description of isomer yields in neutron reactions, 19:20103 (RA;XA)

Tungsten 182 Target
Measurement of the cross sections for the reactions $^{137}Ba(n,p)\ ^{137}Cs$, $^{182}W(n,n'\alpha)\ ^{178m2}Hf$ and $^{193}Ir(n,2n)\ ^{192m2}Ir$ at 14 MeV, 19:20149 (RA;XA)

NEUTRON SOURCE FACILITIES
Analysis of the neutron generation from a D-Li neutron source, 19:20221 (R;US)

ON-SITE POWER GENERATION
Commercialization
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)
Establishment of testing methods for protective functions and others relating to demonstration of new distributed power generation technology commercialization, 19:18814 (R;JP;In Japanese)
Sumulational analysis of system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18907 (R;JP;In Japanese)

Electric Power
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)

Equipment Protection Devices
Establishment of testing methods for protective functions and others relating to demonstration of new distributed power generation technology commercialization, 19:18814 (R;JP;In Japanese)

Fuel Cells
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)
Sumulational analysis of system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18907 (R;JP;In Japanese)

Interconnected Power Systems
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Sumulational analysis of system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18907 (R;JP;In Japanese)

Photovoltaic Power Plants
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)
Sumulational analysis of system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18907 (R;JP;In Japanese)

Power Distribution Systems
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)
Sumulational analysis of system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18907 (R;JP;In Japanese)

Power Range 10-100 Kw
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)

Power Range 100-1000 Kw
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)

Verification
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)

Wind Power Plants
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)

ONCOGENES
Cellular oncogene expression following exposure of mice to γ-rays, 19:19810 (R;US)
Modulation of expression of genes encoding nuclear proteins following exposure to JANUS neutrons or γ-rays, 19:19814 (R;US)

OPERATION (REACTOR)
See REACTOR OPERATION

OPERATORS (MATHEMATICAL)
See MATHEMATICAL OPERATORS

OPIX PROCESS
See RADIOACTIVE WASTE PROCESSING

OPTICAL EQUIPMENT
High-sensitivity receiver for increasing multiplicity of measurement axes of Zygo's Heterodyne interferometer, 19:19493 (R;US)

OPTICAL FIBERS
Guiding hard x rays with glass polycapillary fiber, 19:19932 (R;US)

OPTICAL RADAR
Implementation of Raman lidar for profiling of atmospheric water vapor and aerosols at the SGP CART site, 19:19566 (R;US)

OPTICAL SYSTEMS
Issues in the design and optimization of adaptive optics and laser guide stars for the Keck Telescopes, 19:19492 (R;US)

ORDNANCE
Explosive laser light initiation of propellants, 19:19503 (PA;US)

OREGON
An experimental and numerical study of boundary layer structure over areas of inhomogeneous sensible heat fluxes, 19:19559 (R;US)
Comment and response document for the long-term surveillance plan for the Collins Ranch Disposal Site Lakeview, Oregon, 19:18008 (R;US)

ORGANIC CHLORINE COMPOUNDS
See also CHLORINATED ALIPHATIC HYDROCARBONS
CHLOROFLUOROCARBONS
NEOPRENE
Passive remediation of chlorinated volatile organic compounds using barometric pumping, 19:18262 (R;US)
Photocatalytic enhancement of pulp effluent bioreactors, 19:18983 (RA;US)
Travel to Austria for symposium on chlorinated dioxins and related compounds: Foreign trip report, September 18–25, 1993, 19:19518 (R;US)

ORGANIC COMPOUNDS

AMINES
AROMATICS
HYDROCARBONS
NUCLEIC ACIDS
ORGANIC PHOSPHORUS COMPOUNDS
ORGANIC POLYMERS
ORGANIC SILICON COMPOUNDS
ORGANIC SULFUR COMPOUNDS
ORGANOMETALLIC COMPOUNDS
1993 Tier Two emergency and hazardous chemical inventory: Emergency Planning and Community Right-To-Know Act Section 312, 19:18846 (R;US)
A novel high-capacity technology for removing volatile organic contaminants from water, 19:18981 (RA;US)
Action plan for response to abnormal conditions in Hanford high level radioactive liquid waste storage tanks containing flammable gases: Revision 1, 19:18137 (R;US)
Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 2: Data, 19:19588 (R;US)
Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 1: Results of Field Sampling Program, 19:19587 (R;US)

Final report on the Background Soil Characterization Project at the Oak Ridge Reservation, Oak Ridge, Tennessee: Volume 3: Project Plan, 19:19589 (R;US)
Final report: In situ radio frequency heating demonstration, 19:18175 (R;US)
Micellar-enhanced absorption for controlling dilute emissions of volatile organic compounds and chlorinated solvents, 19:18999 (RA;US)
Molecular beam surface analysis: 1993 Summary report, 19:19592 (R;US)
Monitoring radio-frequency heating of contaminated soils using electrical resistance tomography, 19:18245 (R;US)
Safety analysis of exothermic reaction hazards associated with the organic liquid layer in tank 241-C-103, 19:18163 (R;US)
Summary report of the drilling technologies tested at the Integrated Demonstration Project for cleanup of organic contaminants in soils and groundwater at non-arid sites, 19:19644 (R;US)
The use of micellar solutions for novel separation techniques, 19:19118 (R;US)
Toxic Chemical Release Inventory reporting "Qs & As": Environmental Guidance, 19:18844 (R;US)
VOC transport in vented drums containing simulated waste sludge, 19:19595 (R;US)

ORGANIC FLUORINE COMPOUNDS
See also CHLOROFLUOROCARBONS
Perfluorodiethoxymethane on nickel and nickel oxide surfaces, 19:19041 (R;US)

ORGANIC MATTER
See also PEAT
Organic carbon in Hanford single-shell tank waste, 19:18242 (R;US)

ORGANIC PHOSPHORUS COMPOUNDS
Synthesis, characterization and applications of tetraalkylalkylene-diphosphonates, 19:19112 (R;DZ;In French)
The rapid determination of ^{210}Po in uranium ores by TRPO extraction-α inner-scintillation method, 19:19114 (R;CN;In Chinese)

ORGANIC POLYMERS
See also COPOLYMERS
NEOPRENE
POLYISOPRENE
POLYVINYLS
RESINS
THERMOPLASTICS
Syntheses and studies of acetylenic polymers, 19:19100 (R;US)

ORGANIC SILICON COMPOUNDS
Cross-condensation reactions in an organically modified silica sol-gel, 19:19077 (R;US)
Spinnability of silica sols: The role of alkoxy group exchange, 19:19078 (R;US)
Syntheses and studies of acetylenic polymers, 19:19100 (R;US)

ORGANIC SOLVENTS
Advanced direct liquefaction concepts for PETC generic units: Quarterly technical progress report, July 1993–September 1993 (Bench-scale experiments insupport of coal liquefaction from a numbedr of laboatories are combined in this report.), 19:17790 (R;US)
Low severity coal liquefaction promoted by cyclic olefins: Quarterly report, October–December 1993, 19:17801 (R;US)
Progress in donor assisted coal liquefaction: Hydroaromatic compound formation, 19:17825 (R;US)

ORGANIC SULFUR COMPOUNDS
See also POLYCYCLIC SULFUR HETEROCYCLES
Protocols for the selective cleavage of carbon-sulfur bonds in coal: Final technical report, September 1, 1992–December 31, 1993, 19:17812 (R;US)

ORGANOMETALLIC COMPOUNDS
The transformation of organic amines by transition metal cluster compounds: Progress report, 1992–1993, 19:19127 (R;US)

ORNL
Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:18092 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Executive Summary, 19:18094 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Indexes, 19:18095 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part C, Waste Management, 19:18097 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part A, Decontamination and Decommissioning, 19:18096 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part C, Waste Management, 19:18097 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part A, Decontamination and Decommissioning, 19:18098 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part C, Waste Management, 19:18232 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 2, Technology Logic Diagram: Part A, Decontamination and Decommissioning, 19:18098 (R;US)

ORTHOGONAL TRANSFORMATIONS
Parallel tridiagnoalization through two-step band reduction, 19:20502 (R;US)

ORYZA
See RICE

OSCILLATIONS (PLASMA)
See PLASMA WAVES

OSMIUM ISOTOPES
Rotational properties of osmium nuclei in the A=180 mass region, 19:20081 (IA;RU)

OSTEOSARCOMAS
Primary bone neoplasms; Revision 2, 19:19791 (R;US)

OUTAGES
Risk-based evaluation of allowed outage times (AOTs): Considering risk of shutdown, 19:18510 (RA;XA)

OUTER CONTINENTAL SHELF
See CONTINENTAL SHELF

OVERHEAD POWER TRANSMISSION
Draft Environmental Impact Statement: BPA/Puget Power Northwest Washington Transmission Project, 19:18813 (R;US)

OXIDATION
See also COMBUSTION
Production Test IP-550-I, Supplement A routine monitoring for moderator oxidation rates, 19:18704 (R;US)
Study on development of geothermal-use materials, 19:18399 (IA;JP;In Japanese)

OXIDES

PACKAGING
Air Transport
Packagings for severe accident protection, 19:19223 (IA;JP)
Plutonium air transportable package development using metallic filaments and composite materials, 19:19224 (IA;JP)
Automation
Design considerations for automated packaging operations, 19:19234 (R;US)
Cocombustion
Co-combustion and emissions tests of mixed plastics and used packaging, 19:18421 (RA;FI)
Filters
Ontario Hydro radioactive filter transport packages, 19:19205 (IA;JP)
Fuel Assemblies
Drop testing of the Westinghouse fresh nuclear fuel package, 19:19225 (IA;JP)
Impact Tests
Drop testing of the Westinghouse fresh nuclear fuel package, 19:19225 (IA;JP)
Leak Testing
Interspace leak-testing a comparison with Helium Mass Spectrometry, 19:19289 (IA;JP)
Low-Level Radioactive Wastes
Demonstration tests for low level radioactive waste packaging safety, 19:19194 (IA;JP)
Maritime Transport
Evaluation by physical measurements of shielding analysis method used for TN-12/1, 19:19203 (IA;JP)
Molybdenum 99
Testing type-A packaging for a solution containing molybdenum-99, 19:19191 (IA;JP)
Optimization
Transportation package design using numerical optimization, 19:19211 (IA;JP)
Performance Testing
Design of a small type B package for the shipment of radioactive gas, 19:19204 (IA;JP)
Plutonium
Plutonium air transportable package development using metallic filaments and composite materials, 19:19224 (IA;JP)
Type B plutonium transport package development that uses metallic filaments and composite materials, 19:19222 (IA;JP)
Radioactive Materials
Over-the-road testing of radioactive materials packaging, 19:19213 (IA;JP)
Packagings for severe accident protection, 19:19223 (IA;JP)
Transportation package design using numerical optimization, 19:19211 (IA;JP)
Radioactivity Transport
Ontario Hydro radioactive filter transport packages, 19:19205 (IA;JP)
Packagings in the silicon era, 19:19219 (IA;JP)
Risk Assessment
Analysis and design of type b package tie-down systems, 19:19214 (IA;JP)
Safety
Demonstration tests for low level radioactive waste packaging safety, 19:19194 (IA;JP)
Seals
Modelling leaktightness in a sealing system using elastomeric seal, 19:19197 (IA;JP)
Shielding
Evaluation by physical measurements of shielding analysis method used for TN-12/1, 19:19203 (IA;JP)
Silicon
Packagings in the silicon era, 19:19219 (IA;JP)
Spent Fuels
Analysis and design of type b package tie-down systems, 19:19214 (IA;JP)
Transuranium Elements
Development of packaging for TRU materials, 19:19206 (IA;JP)
Tritium
Design of a small type B package for the shipment of radioactive gas, 19:19204 (IA;JP)
Waste Transportation
Modelling leaktightness in a sealing system using elastomeric seal, 19:19197 (IA;JP)

PADUCAH PLANT
Waste Generation Forecast for DOE-ORO's Environmental Restoration OR-1 Project: FY 1994–FY 2001: Environmental Restoration Program, September 1993 Revision, 19:18226 (R;US)

PAH
See POLYCYCLIC AROMATIC HYDROCARBONS

PAINTS

ELECTROSTATIC PRECIPITATORS
SCRUBBERS
DOE mixed waste metals partition in a rotary kiln wet off-gas system, 19:18176 (R;US)

POLLUTION REGULATIONS
Corrective Action Management Units and Temporary Units: RCRA Information Brief, 19:18015 (R;US)
Environmental implementation plan: Chapter 14, Environmental compliance tracking and data management: Revision, 19:18855 (R;US)
Environmental implementation plan: Chapter 16, Environmental appraisal and surveillance program: Draft revision, 19:18856 (R;US)
Environmental implementation plan: Chapter 5, Chemical management, pollution prevention and other compliance programs: Draft revision, 19:18854 (R;US)
Integrating Natural Resource Damage Assessment and environmental restoration activities at DOE facilities, 19:18845 (R;US)

POLONIUM 210
Fetal doses from plutonium-239 and polonium-210, 19:19809 (IA;CA)
The rapid determination of ^{210}Po in uranium ores by TRPO extraction-α inner-scintillation method, 19:19114 (R;CN;In Chinese)

POLONIUM 218
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres: Progress report, May 1, 1993–January 31, 1994, 19:19584 (R;US)

POLY(ISOBUTYLENE OXIDE)
See ORGANIC POLYMERS

POLY(VINYLIDENE FLUORIDE)
See POLYVINYLS

POLYACRYLONITRILE
See ORGANIC POLYMERS

POLYCHLORINATED BIPHENYLS
Data validation report for the 100-D Ponds Operable Unit: 100-D ponds sampling, 19:18161 (R;US)
High energy decomposition of halogenated hydrocarbons FY93 final report, 19:18047 (R;US)
Polychlorinated biphenyls and their interaction with the environment, 19:19610 (R;US)
Toxicological benchmarks for wildlife: Environmental Restoration Program, 19:18225 (R;US)

POLYCYCLIC AROMATIC HYDROCARBONS
Fate of polycyclic aromatic hydrocarbons in plant-soil systems: Plant responses to a chemical stress in the root zone, 19:19551 (R;US)
Nitration of polynuclear aromatic hydrocarbons in coal combustors and exhaust streams: Quarterly report, October 1, 1993–December 31, 1993, 19:19138 (R;US)
Toxic emissions from a cyclone burner boiler with an ESP and with the SNOX demonstration and from a pulverized coal burner boiler with an ESP/wet flue gas desulfurization system, 19:18443 (R;US)

POLYCYCLIC SULFUR HETEROCYCLES
Synthesis of 6-Methyl-9-propyldibenzothiophene-4-ol amended to 9-isopropyl-6-methyldibenzothiophene-4-ol: Final technical report, July 25, 1991–January 25, 1993, 19:19133 (R;US)

POLYENES
Syntheses and studies of acetylenic polymers, 19:19100 (R;US)

POLYETHYLENES
Generation of volatile organic compounds by alpha particle degradation of WIPP plastic and rubber material, 19:17995 (R;US)
Modeling unsteady-state VOC transport in simulated waste drums: Revision 1, 19:19593 (R;US)
Thermal testing of solid neutron shielding materials, 19:19098 (IA;JP)

POLYISOPRENE
SANS studies of space-time organization of structure in polymer blends, 19:20247 (RA;JP)

POLYMERS
See also ORGANIC POLYMERS
SILICONES
User's guide and documentation manual for "PC-Gel" simulator, 19:17922 (R;US)

POLYNUCLEAR AROMATIC HYDROCARBONS

OXYGEN COMPOUNDS

POLYVINYLS
Generation of volatile organic compounds by alpha particle degradation of WIPP plastic and rubber material, 19:17995 (R;US)

PONDEROMOTIVE FORCE
Ponderomotive effects of HF heating in fusion devices, 19:20371 (IA;AU)

POOL BOILING
Observations of quenching of downward-facing surfaces, 19:18535 (R;US)

POOL TYPE REACTORS
See also JRR-3M REACTOR
KUR REACTOR
SLOWPOKE TYPE REACTORS
VR-1 REACTOR
Prediction and measurement of the neutron environment in OSURR experimental facilities following conversion to LEU, 19:18610 (RA;US)

POROSITY REDUCTION
See FORMATION DAMAGE

POROUS MATERIALS
A novel approach to modeling unstable EOR displacements: Final report, 19:17908 (R;US)
Application of the lattice Boltzmann/lattice gas technique to multi-fluid flow in porous media, 19:19282 (R;US)
Characterization of non-Darcy multiphase flow in petroleum bearing formations: Annual status report, May 14, 1991–May 13, 1992, 19:17911 (R;US)
Characterization of non-Darcy multiphase flow in petroleum bearing formations: [Quarterly] report, January 1–March 30, 1993, 19:17910 (R;US)
Effects of capillarity on microscopic flow in porous media: Progress report, June 1, 1993–May 31, 1994, 19:19583 (R;US)
Heat transfer studies in waste repository design: Progress report, 19:18034 (R;US)
Heat transfer studies of waste repository design: Progress report, 19:19280 (R;US)
Research consortium on fractured petroleum reservoirs: Third quarterly report, July 1–September 30, 1993, 19:17916 (R;US)
User's guide and documentation manual for "PC-Gel" simulator, 19:17922 (R;US)

PORPHYRINS
See also CHLOROPHYLL

Femtosecond transient grating studies of electron transfer in porphyrin and chlorophyll donor-acceptor molecules, 19:18353 (R;US)

PORTLAND CEMENT
Individual and combined effects of chloride, sulfate, and magnesium ions on hydrated Portland-cement paste, 19:19156 (R;US)
Rapid setting of portland cement by greenhouse carbon dioxide capture, 19:18961 (R;US)

PORTSMOUTH GASEOUS DIFFUSION PLANT
Waste Generation Forecast for DOE-ORO's Environmental Restoration OR-1 Project: FY 1994–FY 2001: Environmental Restoration Program, September 1993 Revision, 19:18226 (R;US)

POSITION INDICATORS
See DISPLACEMENT GAGES

POSITION SENSITIVE DETECTORS
A ratio-to-digital converter (RDC) with time-resolution doubler for a position sensing system, 19:19466 (RA;JP)

POSITIONING
A position feedback control system for the test facility of JLC, 19:19383 (RA;JP)

POSITRON COMPUTED TOMOGRAPHY
Development of skin surface radiation detector system to monitor radioactivity in arterial blood with positron emission tomography, 19:19778 (RA;JP)
Dibenzodiazepines (clozapine) and analogues were labelled with carrier-free carbon-11 and fluorine-18, 19:19165 (R;DE;In German)
Recovery of germanium-68 from irradiated targets, 19:19783 (PA;US)

POSTULATED PARTICLES
See also GLUONS
HIGGS BOSONS
PARTONS
QUARKS
TOP PARTICLES
Exotic particle searches, photoproduction and diffraction in DIS at HERA, 19:20042 (R;DE)
Results from the H1 experiment at HERA, 19:20035 (R;DE)
Results from the ZEUS experiment at HERA, 19:20021 (R;DE)
Searches for new particles at HERA, 19:20019 (R;DE)

POTABLE WATER
See DRINKING WATER

POTASSIUM CARBONATES
Oil recovery improvement through profile modification by thermal precipitation: Final report, October 1, 1991–August 27, 1993, 19:17912 (R;US)

POTENTIAL (ELECTRIC)
See ELECTRIC POTENTIAL

POTENTIAL FLOW
Stability analysis for the flow of granular materials down an inclined plane, 19:19262 (RA;US)

POTENTIAL SCATTERING
Adiabatic perturbation theory: Semiclassical limit of the reflection coefficient on a potential barrier, 19:19923 (R;DE)

POTT-BROCHE PROCESS
See COAL LIQUEFACTION

POWDERS
Properties and applications of powder-filled evacuated-panel superinsulations, 19:18911 (R;US)

POWER AMPLIFIERS
Radially combined 30 W, 14-16 GHz amplifier, 19:19309 (R;US)

POWER DISTRIBUTION SYSTEMS
Analysis/evaluation of the issues on system interconnection relating to demonstration of new distributed power generation technology commercialization, 19:18908 (R;JP;In Japanese)
Demonstrative operation study relating to demonstration of new distributed power generation technology commercialization, 19:18906 (R;JP;In Japanese)

POWER PLANTS
See also DUAL-PURPOSE POWER PLANTS
FUEL CELL POWER PLANTS
GAS TURBINE POWER PLANTS
HYDROELECTRIC POWER PLANTS
Biological determinants of photobioreactor design: 1st Quarterly report, September 1, 1993–November 30, 1993, 19:19533 (R;US)

POWER POOLS
See INTERCONNECTED POWER SYSTEMS

POWER SYSTEMS
See also INTERCONNECTED POWER SYSTEMS
A procedure for oscillatory parameter identification, 19:18812 (R;US)

POWER TRANSMISSION LINES
Draft Environmental Impact Statement: BPA/Puget Power Northwest Washington Transmission Project, 19:18813 (R;US)
Draft environmental impact statement for construction and operation of the proposed Bangor Hydro-Electric Company's second 345-kV transmission tie line to New Brunswick, 19:18816 (R;US)
Environmental assessment and finding of no significant impact: Hungry Horse–Columbia Falls line rebuild and relocation project, 19:18817 (R;US)
Summit-Watertown transmission line project, South Dakota: Final Environmental Assessment, 19:18815 (R;US)

PRASEODYMIUM 141 TARGET
An intense proton beam diagnostic using the $^{7}Li(p,\gamma^{8})Be \rightarrow {}^{141}Pr(\gamma,n)^{140}Pr(\beta^{+})$ nuclear reaction sequence, 19:20466 (R;US)

PRECIPITATIONS (ATMOSPHERIC)
See ATMOSPHERIC PRECIPITATIONS

PREFABRICATED BUILDINGS
Design for manufacture of energy efficient housing in the 21st century, 19:18939 (RA;FI)
New models for low-energy building concepts, 19:18940 (RA;FI)

PRENATAL IRRADIATION
Fetal doses from plutonium-239 and polonium-210, 19:19809 (IA;CA)

PRESSURE GROUPS
See INTEREST GROUPS

PRESSURE TUBES
Fuel channel performance, 19:18531 (IA;CA)

PRESSURE VESSELS
Biaxial loading and shallow-flaw effects on crack-tip constraint and fracture-toughness, 19:19031 (R;US)
Participation in meetings of the (IAEA) International Working Group (IWG) on Life Management of Nuclear Power Plants (LMNPP): Foreign trip report, February 5–12, 1994, 19:18592 (R;US)
Participation in meetings on behalf of the international Network for Evaluating Steel Components and with nuclear industry researchers concerning fracture and constraint modeling issues in reactor pressure vessel steels: Foreign trip report, January 31–February 8, 1994, 19:18591 (R;US)
Production and testing of the VITAMIN-B6 fine-group and the BUGLE-93 broad-group neutron/photon cross-section libraries derived from ENDF/B-VI nuclear data, 19:18580 (R;US)
Validity of fracture toughness determined with small bend specimens, 19:19052 (R;FI;In Finnish)

PRESSURIZED WATER COOLED MODERATED REACTOR
See PWR TYPE REACTORS

PRESSURIZED WATER REACTORS
See PWR TYPE REACTORS

PRINTED CIRCUITS
Capillary flow solderability test for printed wiring boards, 19:19304 (R;US)
Ionic contamination detection: Final report, 19:19296 (R;US)

PROBES
See also NEUTRON PROBES
Network analyzer calibration for cryogenic on-wafer measurements, 19:19308 (R;US)

PROCESSING (DATA)
See DATA PROCESSING

PRODUCTION (PARTICLE)

Physical and hydraulic properties of sediments and engineered materials associated with grouted double-shell tank waste disposal at Hanford, 19:18104 (R;US)

Inventories
Integrated data base for 1993: US spent fuel and radioactive waste inventories, projections, and characteristics: Revision 9, 19:17990 (R;US)
Organic carbon in Hanford single-shell tank waste, 19:18242 (R;US)
Tank farm surveillance and waste status summary report for December 1993, 19:18136 (R;US)

Leaching
Colloid formation during the corrosion of SRL 200 glass, 19:17998 (R;US)

Minimization
A decision analysis method for selection of waste minimization process options for TRU mixed material at Rocky Flats, 19:18116 (R;US)

Packaging
Status of the Beneficial Uses Shipping System cask (BUSS), 19:17989 (R;US)

Radiation Monitoring
Environmental surveillance master sampling schedule, 19:18189 (R;US)
Groundwater level monitoring sampling and analysis plan for environmental monitoring in Waste Area Grouping 6 at Oak Ridge National Laboratory, Oak Ridge, Tennessee, 19:18092 (R;US)

Radioactive Waste Disposal
NPR liquid radioactive waste, 19:18632 (R;US)

Radioactive Waste Management
Savannah River Site environmental report for 1993 summary pamphlet, 19:19575 (R;US)

Radioactive Waste Processing
Health risk and impact evaluation for recycling of radioactive scrap metal, 19:18000 (R;US)
Research and development task plan: Shielded Cells Batch 1 campaign: Revision 2, 19:18170 (R;US)

Radioactive Waste Storage
Fire testing of 55 gallon metal waste drums for dry waste storage, 19:18127 (R;US)

Standards
Challenges in quality of environmental measurements for compliance, 19:18001 (R;US)

Transmutation
A Thorium/Uranium fuel cycle for an advanced accelerator transmutation of nuclear waste concept, 19:18084 (R;US)
Accelerator transmutation of wastes (ATW) - Prospects and safety, 19:18125 (R;SE)
Development of a technique for measuring cross sections of interest to accelerator transmutation of waste (ATW), 19:18085 (R;US)

Transport
A decision analysis method for selection of waste minimization process options for TRU mixed material at Rocky Flats, 19:18116 (R;US)
Status of the Beneficial Uses Shipping System cask (BUSS), 19:17989 (R;US)
Transport Regulations
Manifest requirements: RCRA Information Brief, 19:18014 (R;US)
Pretransport requirements for waste generators: RCRA Information Brief, 19:18013 (R;US)
Transportation of RCRA hazardous wastes: RCRA Information Brief, 19:18012 (R;US)
Transportation Systems
Hazardous and mixed waste transportation program, 19:17976 (IA;JP)
Underground Disposal
Development of a long-term post-closure radiation monitor: Phase 1, Final report, [September 30, 1992–February 28, 1994], 19:18027 (R;US)
INEL cold test pit demonstration of improvements in information derived from non-intrusive geophysical methods over buried waste sites: Phase 2, Final report, 19:18025 (R;US)
Inventory radioactive liquid waste to ground 200 Areas, 1945–1959, 19:18060 (R;US)
Underground tank vitrification: A pilot-scale in situ vitrification test of a tank containing a simulated mixed waste sludge, 19:18106 (R;US)
Vitrification
Vitrification of mixed waste from uranium processing operations, 19:18055 (R;US)
Waste Management
Mixed waste management facility FY94 plan, 19:18132 (R;US)
Waste Transportation
Travel to Austria to participate in the IAEA's Seminar on Developments in Radioactive Waste Transport: Foreign trip report, February 21–25, 1994, 19:18093 (R;US)

RADIOACTIVITY
Atmospheric pathway dosimetry report, 1944-1992: Hanford Environmental Dose Reconstruction project, 19:19563 (R;US)

RADIOACTIVITY TRANSPORT
Analysis of German rail accident statistics for risk assessments, 19:17980 (IA;JP)
Development of emergency arrangements for the transport of radioactive waste to a deep repository, 19:17983 (IA;JP)

RADIOBIOLOGICAL EFFECTS
See BIOLOGICAL RADIATION EFFECTS

RADIOBIOLOGY
Biomedical user facility at the 400-MeV Linac at Fermilab, 19:19398 (R;US)
Scientific Advisor of the US Delegation to the forty-third session of the United Nations Scientific Committee on the Effects of Atomic Radiation, held in Austria: Foreign trip report, March 4–12, 1994, 19:19894 (R;US)

RADIODIAGNOSIS (RADIONUCLIDES)

RADIOPHARMACEUTICALS
Clinical evaluation of ^{99m}Tc DMSA uptake by kidneys. Preliminary communication, 19:19731 (IA;CZ;In Czech)
Dibenzodiazepines (clozapine) and analogues were labelled with carrier-free carbon-11 and fluorine-18, 19:19165 (R;DE;In German)
National metrological testing of radiopharmaceutical activity meters in Czechoslovakia, 19:18296 (IA;CZ;In Czech)
Nuclear medicine program progress report for quarter ending March 31, 1994, 19:19782 (R;US)
Nuclear medicine: Czech special bulletin, 19:19724 (I;CZ;In Czech)

RADIOPROTECTIVE SUBSTANCES
Chemical protection from high LET radiation, 19:19882 (RA;JP;In Japanese)

RADIORESISTANCE
See RADIOSENSITIVITY

RADIOSENSITIVITY
Metaphase chromosome and nucleoid differences between CHO-K1 and its radiosensitive derivative xrs-5, 19:19811 (R;US)

RADIOSENSITIZERS
9-β-arabinofuranosyladenine preferentially sensitizes radioresistant squamous cell carcinoma cell lines to x-rays, 19:19812 (R;US)

RADIOSURGERY
See RADIOTHERAPY

RADIOTHERAPY
Accuracy
Performance requirements of treatment units, 19:19710 (RA;XA)

Dose-Response Relationships
The impact of quality assurance on the optimization of tumour control probability, 19:19703 (RA;XA)

Goiter
Peculiarities of radioactive iodine uses for treatment in endemic regions, 19:19766 (IA;UA;In Ukrainian)
Radionuclide therapy of thyroid diseases, 19:19765 (IA;UA;In Ukrainian)

Gold 198
Radionuclide therapy of thyroid diseases, 19:19765 (IA;UA;In Ukrainian)

Iodine 131
About the possibility of ^{131}I leukosogenic action during diffusion toxic goiter treatment, 19:19768 (IA;UA;In Ukrainian)
Iodine radiotherapy of thyroid cancer, 19:19767 (IA;UA;In Ukrainian)
Peculiarities of radioactive iodine uses for treatment in endemic regions, 19:19766 (IA;UA;In Ukrainian)
Radionuclide therapy of thyroid diseases, 19:19765 (IA;UA;In Ukrainian)

Meetings
Radiation dose in radiotherapy from prescription to delivery: Proceedings of the interregional seminar for Europe, the Middle East and Africa held in Leuven, 16-20 September 1991, 19:19701 (R;XA)

Physical Radiation Effects
Radiation dose in radiotherapy of cancer of the breast from prescription to delivery. The Nigerian experience, 19:19718 (RA;XA)

Planning
Acquisition of patient data, anatomical data, 19:19713 (RA;XA)
PC aided quality assurance in radiotherapy, 19:19864 (RA;XA)
Possibilities and limitations of in-vivo dosimetry, 19:19856 (RA;XA)
Quality assurance of treatment planning systems, 19:19717 (RA;XA)
Radiation dose in radiotherapy from prescription to delivery: Proceedings of the interregional seminar for Europe, the Middle East and Africa held in Leuven, 16-20 September 1991, 19:19701 (R;XA)
The ARL linear accelerator facility for radiotherapy dosimetry, 19:19863 (RA;XA)
The relative merits of radiotherapy plans: Radiobiological and physical considerations, 19:19715 (RA;XA)
Treatment simulation, 19:19714 (RA;XA)

Quality Assurance
A minimum quality assurance programme of the treatment unit, 19:19711 (RA;XA)
Different types of portal imaging systems, 19:19720 (RA;XA)
PC aided quality assurance in radiotherapy, 19:19864 (RA;XA)
Planned quality audit network in the USA, 19:19862 (RA;XA)
Problems and challenges in radiation dosimetry in Lagos, 19:19719 (RA;XA)
Quality assurance of treatment planning systems, 19:19717 (RA;XA)
Recommendations for an independent verification of the initial output calibration of megavoltage radiotherapy unit, 19:19868 (RA;XA)
Results of the dosimetric studies performed in the frame of the quality assurance programme of the Etanidazole (Sr 2508) radiotherapy multicenter study, 19:19712 (RA;XA)
The impact of quality assurance on the optimization of tumour control probability, 19:19703 (RA;XA)

Quality Control
Design of a high energy medical cassette for radiotherapy portal imaging, 19:19721 (RA;XA)
Different types of portal imaging systems, 19:19720 (RA;XA)
Quality audit activities in different countries, 19:19867 (RA;XA)
Radiation dosimetry in Cyprus, 19:19865 (RA;XA)

Simulation
Treatment simulation, 19:19714 (RA;XA)

Specificity
Quality audit activities in different countries, 19:19867 (RA;XA)

Thyroid
Iodine radiotherapy of thyroid cancer, 19:19767 (IA;UA;In Ukrainian)
Peculiarities of radioactive iodine uses for treatment in endemic regions, 19:19766 (IA;UA;In Ukrainian)

RADIUM
Dose-response relationships for female radium dial workers: A new look, 19:19820 (R;US)
Tumorigenesis in the U.S. radium luminizers: How unsafe was this occupation?, 19:19819 (R;US)

Auxiliary Water Systems
Emergency cooling and air filtration systems for HAPO reactors, 19:18784 (R;US)

Flow Rate
190-H drawdown test, 19:18706 (R;US)
A method to determine optimum venturi size, 19:18698 (R;US)
Increased coolant flow for H reactor, 19:18728 (R;US)
Interim flow increases at B, D, DR, F and H reactors related to the short-range water plant modification program, 19:18690 (R;US)
Low flow tubes, 19:18724 (R;US)
Production test IP-326-I: Low flow calibration tests at the old reactors, 19:18671 (R;US)
Technical note on the determination of K-reactor last-ditch cooling adequacy, 19:18734 (R;US)

Heat Transfer
Production test IP-285-C and supplement a measurement of operating temperatures of uncooled thermal shield cooling tube: Final report, 19:18680 (R;US)
Production test IP-338-A: DR-reactor heat decay test at high outlet water temperatures, 19:18674 (R;US)
The effect of fringe poison on heat generation in the shield complex, 19:18697 (R;US)

Hydraulics
B and D downcomer prototype data, 19:18693 (R;US)
Hydraulic demand curves for K-reactor geometry at low tube powers, 19:18679 (R;US)

Pipes
Verification of RELAP5 capabilities to simulate pressure wave propagation for instantaneous pipe breaks, 19:18640 (R;US)

Pressure Measurement
Pressure measurements on 19-1/2 crossheader: DR Reactor, 19:18719 (R;US)

Shutdown
K-pile water shut off, 19:18657 (R;US)

Stress Analysis
Results of the 105-DR effluent piping stress measurements from IP-342-AG, 19:18681 (R;US)

Testing
Flow loop defect-test behavior of NPR size coextruded fuel tubes, 19:18667 (R;US)
Pressure and flow data PT IP-573-I, 100-K flow tests, 19:18716 (R;US)
Results of reverse flow experimental tests for C operational charge-discharge tube at low tub powers, 19:18785 (R;US)

REACTOR CORES
Advances in fuel fabrication at the Chilean Commission for Nuclear Energy (CCHEN), 19:18622 (RA;US)
Georgia Tech research reactor conversion to low enrichment–calculational capabilities assessment, 19:18616 (RA;US)
HEU-LEU conversion of FRJ-2 DIDO at KFA Juelich, 19:18522 (RA;US)
Measurements and experiences during conversion of DR 3 to low enriched silicide fuel, 19:18608 (RA;US)
Power upgrade and conversion of the Colombia R-1 reactor to TRIGA-Leu fuel, 19:18618 (RA;US)
Production Test IP-358-AC: Replacement of carbon dioxide with nitrogen as a constituent of the K reactor atmosphere, 19:18682 (R;US)
State of the LEU conversion effort at the University of Virginia reactor, 19:18617 (RA;US)
Status report on the conversion of the Rhodel Island Nuclear Science Center Reactor, 19:18615 (RA;US)
Status report on the core conversion of the OSIRIS reactor, 19:18614 (RA;US)

REACTOR DECOMMISSIONING
Decommissioning of the Loviisa power plant, 19:18519 (R;FI;In Finnish)
Safety analysis of disposal of decommissioning waste from the Olkiluoto nuclear power plant - PURKU-93, 19:18181 (R;FI;In Finnish)
Summary report of the decommissioning plan for the Olkiluoto power plant, 19:18495 (R;FI;In Finnish)

REACTOR DISMANTLING
Application of the KTA nuclear safety rules in activities for decommissioning and dismantling nuclear power plant, shown with the example of the Niederaichbach reactor station, 19:18523 (RA;DE;In German)
Decommissioning of the NUKEM-Alt facility. The decommissioning procedure adopted for the Hanau fuel element fabrication plants NUKEM-A and HOBEG, 19:17952 (RA;DE;In German)

SUPERCONDUCTING MAGNETS
A computer code for measurement of SKS magnetic field: BKO-DAQ, 19:19417 (R;JP;In Japanese)
HEB spool pieces design description, 19:19402 (R;US)
Magnet test facility control system for superconducting magnets of UNK, 19:19357 (RA;JP)
SSCMAG2.6: Design and Optimize Superconducting Accelerator Magnets, 19:20539 (CM;US)

SUPERCONDUCTING SUPER COLLIDER
ANT tuner retrofit for LEB cavity, 19:19404 (R;US)
Close-out report: Schematics and documentation, 19:19410 (R;US)
HEB beam collimation system, 19:19403 (R;US)
Hardware capabilities required for bunch rotation and the HEB to collider transfer, 19:19407 (R;US)
Intrabeam scattering in the HEB, 19:19341 (R;US)
Operational decoupling in the SSC collider, 19:19395 (RA;JP)
Radiation shielding for the Super Collider West Utility region, 19:19326 (R;US)
SSCL groundwater model, 19:19628 (R;US)
Summary of beam coupling impedance measurements and simulations of collider liner with pumping holes or slots, 19:19408 (R;US)

SUPERCONDUCTING WIRES
An investigation of A.C. losses in two sub-size conductors for the ITER, 19:20452 (R;JP)
Continuum fluorescence of Cu in NbTi/Cu composite wires, 19:20300 (R;US)
Superconductive wire, 19:20298 (PA;US)
Workshop on effects of chromium coating on Nb_3Sn superconductor strand: Proceedings, 19:20431 (R;US)

SUPERCONDUCTIVITY
Flux motion in the self-organized critical state of type-II superconductors, 19:20293 (R;US)

SUPERCONDUCTORS
See also HIGH-TC SUPERCONDUCTORS
TYPE-II SUPERCONDUCTORS
Magnetic structure in single crystal of antiferromagnetic heavy fermion superconductor UPd_2Al_3, 19:20297 (RA;JP)
Site preference, superconductivity and magnetism in $Pb_2Sr_2Y1_{-x}Ca_x(Cu_{1-y}M_y)_3O_8$(M = Fe, Co, Ni, Zn, Ga), 19:20263 (RA;JP)

SUPERCRITICAL FLOW
See TURBULENT FLOW

SUPERFUND
See US SUPERFUND

SUPERSTRING MODELS
Non critical super string amplitudes in more than two dimensions, 19:19958 (RA;DE)

SUPERSYMMETRY
Do deep inelastic scattering data favor a light gluino?, 19:20036 (R;DE)
On bosonic and supersymmetric current algebras for non-semi-simple groups, 19:19952 (R;DE)
Physically meaningful and not so meaningful symmetries in Chern-Simons theory, 19:19983 (R;NL)
Supersymmetric top quark decays, 19:20020 (R;DE)
Two-loop radiative corrections to the upper limit of the lightest Higgs boson mass in the minimal supersymmetric model, 19:20060 (R;DE)
Universal SU(2/1) and the Higgs and fermion masses, 19:19979 (R;US)

SUPERVOLTAGE RADIOTHERAPY
See RADIOTHERAPY

SUPPORTS
HEB spool pieces design description, 19:19402 (R;US)

SURFACE AIR
Atmospheric pathway dosimetry report, 1944-1992: Hanford Environmental Dose Reconstruction project, 19:19563 (R;US)
Practical experience in and improvements to aerosol sampling for trace analysis of airborne radionuclides in ground level air, 19:19564 (R;DE)

SURFACE BARRIER DETECTORS
GaAs particle and gamma-ray detectors, 19:19461 (RA;CZ)

SURFACE CONTAMINATION
Engineering scale electrostatic enclosure demonstration, 19:18054 (R;US)

SURFACE TREATMENTS
Study of the mechanism of wool surface modification by oxygen plasma, 19:20287 (IA;AU)

SURFACE WATERS
See also LAKES
STREAMS
Dungeness crab and razor clam surveys at sites near Grays Harbor, Washington, and at Willapa Bay bar entrance, September 1993, 19:19662 (R;US)
Surface radiological investigations at two creek receiving runoff from White Wing Scrap Yard, Oak Ridge Reservation, Oak Ridge, Tennessee: Environmental Restoration Program, 19:18231 (R;US)
UMTRA Project water sampling and analysis plan: Canonsburg and Burrell, Pennsylvania, 19:18210 (R;US)

SURFACE-ACTIVE AGENTS
See SURFACTANTS
SURFACES
Laser probing of interfaces, 19:19488 (R;US)
Perfluorodiethoxymethane on nickel and nickel oxide surfaces, 19:19041 (R;US)
SURFACTANTS
A study of the thermodynamic properties of surfactant mixtures: Mixed micelle formation and mixed surfactant adsorption, 19:19129 (R;US)
Screening of mixed surfactant systems: Phase behavior studies and CT imaging of surfactant-enhanced oil recovery experiments, 19:17923 (R;US)
SURPLUS NUCLEAR FACILITIES
Fire protection for inactive contaminated structures, 19:18254 (R;US)
Oak Ridge National Laboratory Technology Logic Diagram: Volume 1, Technology Evaluation: Part A, Decontamination and Decommissioning, 19:18096 (R;US)
Results of the mobile gamma scanning activities in Wayne and Pequannock Townships, New Jersey, 19:18233 (R;US)
SURRY POWER STATION UNIT-1
See SURRY-1 REACTOR
SURRY POWER STATION UNIT-2
See SURRY-2 REACTOR
SURRY-1 REACTOR
Independent review of SCDAP/RELAP5 natural circulation calculations, 19:18803 (R;US)
SURRY-2 REACTOR
Independent review of SCDAP/RELAP5 natural circulation calculations, 19:18803 (R;US)
SURRY-3 REACTOR
Independent review of SCDAP/RELAP5 natural circulation calculations, 19:18803 (R;US)
SURRY-4 REACTOR
Independent review of SCDAP/RELAP5 natural circulation calculations, 19:18803 (R;US)
SURVEILLANCE (MEDICAL)
See MEDICAL SURVEILLANCE
SURVEILLANCE (RADIOACTIVITY)

CERN PS SYNCHROTRON
CERN SPS SYNCHROTRON
COSY STORAGE RING
EREVAN SYNCHROTRON
FERMILAB ACCELERATOR
FERMILAB TEVATRON
KEK SYNCHROTRON
Conceptual design for one megawatt spallation neutron source at Argonne, 19:19317 (R;US)
High frequency acceleration cavities of heavy ion storage rings and synchrotrons, 19:19418 (R;JP;In Japanese)
SYNCRUDE
See SYNTHETIC PETROLEUM
SYNROC
See SYNTHETIC ROCKS
SYNTHESIS GAS
Catalyst and process development for synthesis gas conversion to isobutylene: Quarterly report, October 1, 1993–December 31, 1993, 19:18335 (R;US)
Development of a stable cobalt-ruthenium Fischer-Tropsch catalyst: Technical progress report No. 14, January 1, 1993–March 31, 1993, 19:18332 (R;US)
Heterogeneous catalytic process for alcohol fuels from syngas: Quarterly technical progress report No. 8, October–December 1993, 19:19134 (R;US)
High pressure synthesis gas conversion: Final report, 19:18336 (R;US)
SYNTHETIC CRUDE OIL
See SYNTHETIC PETROLEUM
SYNTHETIC FUELS REFINERIES
The economical production of alcohol fuels from coal-derived synthesis gas: Quarterly technical progress report Number 9, October 1, 1993–December 31, 1993, 19:18337 (R;US)
SYNTHETIC PETROLEUM
High conversion of coal to transportation fuels for the future with low HC gas production: Progress report No. 5, October 1, 1993–December 31, 1993, 19:17809 (R;US)
SYNTHETIC ROCKS
Present status of the Waste Safety Testing Facility, 19:18080 (RA;JP)
SYNTHETIC-APERTURE RADAR
Ground-penetrating radar for buried mine detection, 19:19501 (R;US)
Radially combined 30 W, 14-16 GHz amplifier, 19:19309 (R;US)
SYNTHINE PROCESS
See FISCHER-TROPSCH SYNTHESIS

T

T CODES
TDACE1: Fission Product Transport and Offsite Dose Calculation, 19:20557 (CM;US)
T INVARIANCE
Current status and future prospect of space and time reversal symmetry violation on low energy neutron reactions, 19:20092 (R;JP;In Japanese, English)

TANDEM MIRRORS
Self-purification of a fusion plasma in tandem-mirror devices, 19:20345 (IA;XA)

TANK FARMS
See STORAGE FACILITIES

TANKS
Action plan for response to abnormal conditions in Hanford high level radioactive liquid waste storage tanks containing flammable gases: Revision 1, 19:18137 (R;US)
Closure report for underground storage tank 141-R3U1 and its associated underground piping, 19:18129 (R;US)
Engineering Assessment and Certification of Integrity of the 177-R2 tank system, 19:18128 (R;US)
Environmental Assessment: Waste Tank Safety Program, Hanford Site, Richland, Washington, 19:18011 (R;US)
Frequency of deflagration in the in-tank precipitation process tanks due to loss of nitrogen purge system: Revision 2, 19:18173 (R;US)
Hanford surplus facilities programs facilities listings and descriptions: Revision 1, 19:18164 (R;US)
Hydrodynamically induced loads on components submerged in high-level waste-storage tanks, 19:18151 (R;US)
Impact of access port diameter on the long reach manipulator design, 19:19232 (R;US)
Neutron pulse simulation in nuclear waste for waste characterization, 19:18158 (R;US)
Progress in resolving Savannah River Site high-level waste tank safety issues, 19:18167 (R;US)
Safety analysis of exothermic reaction hazards associated with the organic liquid layer in tank 241-C-103, 19:18163 (R;US)
Spacing effects on seismic responses of underground waste storage tanks, 19:18005 (R;US)
State Waste Discharge Permit Application: Electric resistance tomography testing, 19:19590 (R;US)
Tank 24-C-103 headspace flammability: Revision 1, 19:18141 (R;US)
Tank farm surveillance and waste status summary report for December 1993, 19:18136 (R;US)
Underground storage tank 431-D1U1, Closure Plan, 19:19238 (R;US)

TANTALUM ALLOYS
Scanning x-ray diffraction: A technique with high compositional resolution for studying phase formation in co-deposited thin films, 19:19029 (R;US)

TAR SANDS
See OIL SANDS

TATB
Thin-film methods for examining the decomposition chemistry of explosives, 19:19504 (R;US)

TAU LEPTONS
See TAU PARTICLES

TAU PARTICLES
Hadronic tau decays, 19:20024 (R;DE)

TAUONS
See TAU PARTICLES

TBP
Scavenging of stored TBP waste, 19:18058 (R;US)

TEARING INSTABILITY
Calculations of dimensions and attractors of non-linear tearing mode dynamics, 19:20393 (IA;AU)

TECHNETIUM 99
Radionuclide releases from natural analogues of spent nuclear fuel, 19:18083 (R;US)

TECHNETIUM COMPLEXES
The coordination chemistry of technetium and rhenium and applications to nuclear medicines: [Annual] technical report, April 1, 1993–December 31, 1993, 19:19696 (R;US)

TECHNICAL INFORMATION CENTER
See US DOE

TECHNOLOGY TRANSFER
Sharing values, sharing a vision, 19:20478 (R;US)
Technology transfer 1994, 19:18862 (R;US)

TELESCOPES
Issues in the design and optimization of adaptive optics and laser guide stars for the Keck Telescopes, 19:19492 (R;US)

TFTR TOKAMAK
A survey of reflectometry techniques with applications to TFTR, 19:20310 (R;US)
Alpha physics in TFTR - Summary of PPPL workshop of 3/28-29/91, 19:20315 (IA;XA)
Alpha physics issues in ITER and BPX, 19:20313 (IA;XA)
Influence of radial diffusion on triton burn-up, 19:20318 (IA;XA)
MeV ion loss in TFTR, 19:20317 (IA;XA)
Preparations for deuterium tritium experiments on the Tokamak Fusion Test Reactor, 19:20463 (R;US)

Princeton Plasma Physics Laboratory (PPPL) annual site environmental report for Calendar Year 1992, 19:20462 (R;US)

THALLIUM OXIDES
Superconducting $TlCa_2Ba_2Cu_3O_9$ thick films: Final report, 19:19058 (R;US)

THERMAL ANALYSIS
HEAT2: Two-Dimensional Heat Transfer Finite Element Code, 19:20558 (CM;US)
MLTAP: Modular Helium Reactor Plant Transient Thermal-Hydraulic Analysis, 19:20552 (CM;US)
MLTAP: Modular Helium Reactor Plant Transient Thermal-Hydraulic Analysis, 19:20553 (CM;US)
Some neutronics and thermal-hydraulics codes for reactor analysis using personal computers, 19:18579 (RA;US)

THERMAL BATTERIES
Characterization of energetic devices for thermal battery applications by high-speed photography, 19:19505 (R;US)

THERMAL DEGRADATION
Thermal study of HOM couplers for superconducting RF cavities, 19:19344 (R;FR)

THERMAL EFFLUENTS
Impact of a 1,000-foot thermal mixing zone on the steam electric power industry, 19:18433 (R;US)

THERMAL FISSION
Channeling of heavy ions: perspectives for precision spectrometry, 19:19454 (RA;DE)
One-armed fission fragment time-of-flight spectrometer with fissile target near the reactor core, 19:19457 (RA;DE)

THERMAL INSULATION
Development of a simple thermophysical property model for cane fiberboard packages subjected to a hypothetical accident fire, 19:19244 (R;US)
Properties and applications of powder-filled evacuated-panel superinsulations, 19:18911 (R;US)

THERMAL POLLUTION (AIR)
See AIR POLLUTION

THERMAL RADIATION
Determining the radiative properties of pulverized-coal particles from experiments: Final report, 19:17828 (R;US)

THERMAL STORAGE
See HEAT STORAGE

THERMISTORS
Neutron transmutation doped natural and isotopically engineered germanium thermistors, 19:19486 (R;US)

THERMOLUMINESCENT DOSEMETERS
Activities of the radiation physicists in Bulgaria, 19:19866 (RA;XA)
Calibration of soft high power pulses X-ray source by TL dosemeters and other SXR dosimetric methods, 19:18297 (RA;CZ)
Review of dose intercomparison at a reference point, 19:19709 (RA;XA)

THERMONUCLEAR DEVICES
See also CLOSED PLASMA DEVICES
ICF DEVICES
Canada's strategy for the engineering test reactor phase of fusion power development, 19:20492 (IA;CA)

THERMONUCLEAR IGNITION
Alpha particles in fusion research: A collection of papers presented at the IAEA technical committee meeting, 19:20312 (I;XA)
Burn stability of tokamak fusion plasmas with synergetic current drive, 19:20329 (IA;XA)
Physics basis for compact ignition experiments, 19:20314 (IA;XA)
Studies of fusion burn control, 19:20333 (IA;XA)

THERMONUCLEAR REACTOR MATERIALS
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Texts of papers presented at the second research co-ordination meeting held in Del Mar, California, USA, 29 to 30 April 1993, 19:20143 (R;XA)
Compatibility of ITER candidate structural materials with static gallium, 19:20428 (R;US)
Nuclear data needs for fusion waste management, 19:20157 (RA;XA)
Review of the activation data for fast charged particle induced reactions, 19:20156 (RA;XA)
Some results of the production of long-lived radionuclides in fast neutron induced reactions, 19:20144 (RA;XA)

THERMONUCLEAR REACTOR WALLS
Activation cross sections for the generation of long-lived radionuclides of importance in fusion reactor technology: Summary report of the second research coordination meeting held in Del Mar, California, USA, 29 to 30 April 1993, 19:20158 (R;XA)

THERMONUCLEAR REACTORS
See also D-T REACTORS
LASER FUSION REACTORS
Fusion energy development: The involvement of Canada's nuclear industry, 19:20436 (IA;CA)

Estimates of durability of TMI-2 core debris canisters and cask liners, 19:19047 (R;US)

THULIUM 153
In-beam γ-ray spectroscopy of N=84 nuclei above Gd and the impact of the $(\pi h_{11/2} \nu h_{9/2})1^+$ attraction on their yrast lines, 19:20091 (R;DE)

THULIUM 169
Production of ^{170}Tm, 19:18282 (R;US)

THULIUM 170
Production of ^{170}Tm, 19:18282 (R;US)

THYLOX PROCESS
See DESULFURIZATION

THYMUS CELLS
Proliferation ability of central immunological organ cells treated with low doses by different radiators, 19:19839 (R;CN;In Chinese)

THYROID
Biomedical Radiography
Diagnostic significance of radiation methods in thyroid diseases investigation, 19:19756 (IA;UA;In Ukrainian)
Biopsy
Ultra-sound screening and ultra-sound aimed biopsy of thyroid hearth changes in persons from Chernobyl, 19:19872 (IA;UA;In Ukrainian)
Chemotherapy
Problems of diagnosis and therapy in thyroid diseases: Thesis, 19:19752 (I;UA;In Ukrainian)
Children
Peculiarities of development, diagnosis and treatment of thyroid cancer at children and teen-ages, 19:19764 (IA;UA;In Ukrainian)
Computerized Tomography
Ultra-sound and computer-tomographic investigations in norm and at thyroid pathology, 19:19760 (IA;UA;In Ukrainian)
Diagnosis
Diagnostic significance of radiation methods in thyroid diseases investigation, 19:19756 (IA;UA;In Ukrainian)
Problems of diagnosis and therapy in thyroid diseases: Thesis, 19:19752 (I;UA;In Ukrainian)
Radiation diagnosis of thyroid discusses, 19:19753 (IA;UA;In Ukrainian)
Icrp Critical Group
Dynamics of tireopathy increasing at 'mitigators' of the Chernobyl accident consequences who like in Kharkov district, 19:19763 (IA;UA;In Ukrainian)
Iodine 123
Methodic aspects of iodide sodium ^{123} I diagnostic use during thyroid pathology, 19:19757 (IA;UA;In Ukrainian)
Low Dose Irradiation
Situation with thyroid and formation of 'risk groups' from children influenced by radiation, 19:19874 (IA;UA;In Ukrainian)
Metastases
Complex radionuclide diagnostics of thyroid cancer remote metastases, 19:19754 (IA;UA;In Ukrainian)
Neoplasms
Amelioration of thyroid disease diagnostics with the help of quantitative criteria of image processing, 19:19761 (IA;UA;In Ukrainian)
Dynamics of tireopathy increasing at 'mitigators' of the Chernobyl accident consequences who like in Kharkov district, 19:19763 (IA;UA;In Ukrainian)
Peculiarities of development, diagnosis and treatment of thyroid cancer at children and teen-ages, 19:19764 (IA;UA;In Ukrainian)
Nuclear Medicine
Radiation diagnosis of thyroid discusses, 19:19753 (IA;UA;In Ukrainian)
Pathological Changes
Diagnostic significance of radiation methods in thyroid diseases investigation, 19:19756 (IA;UA;In Ukrainian)
Ultra-sound and computer-tomographic investigations in norm and at thyroid pathology, 19:19760 (IA;UA;In Ukrainian)
Ultra-sound screening and ultra-sound aimed biopsy of thyroid hearth changes in persons from Chernobyl, 19:19872 (IA;UA;In Ukrainian)
Patients
Complex radionuclide diagnostics of thyroid cancer remote metastases, 19:19754 (IA;UA;In Ukrainian)
Radioimmunoassay
Radioimmune analysis of thyroid diseases, 19:19755 (IA;UA;In Ukrainian)
Radiopharmaceuticals
Amelioration of thyroid disease diagnostics with the help of quantitative criteria of image processing, 19:19761 (IA;UA;In Ukrainian)
Radiotherapy
In-vivo dosimetry of therapy radioiodine in thyroid carcinoma using PET, 19:19859 (RA;XA)
Problems of diagnosis and therapy in thyroid diseases: Thesis, 19:19752 (I;UA;In Ukrainian)
Scintiscanning
Methodic aspects of iodide sodium ^{123} I diagnostic use during thyroid pathology, 19:19757 (IA;UA;In Ukrainian)
Statistical Data
Tables of standardized mortality ratio for cancer in cities, towns and villages in Japan (1973-1987): Malignant neoplasms of the lung and the thyroid, 19:19892 (R;JP;In Japanese)
Ultrasonography
Amelioration of thyroid disease diagnostics with the help of quantitative criteria of image processing, 19:19761 (IA;UA;In Ukrainian)
Ultra-sound and computer-tomographic investigations in norm and at thyroid pathology, 19:19760 (IA;UA;In Ukrainian)

THYROID HORMONES
Role of thyroid hormones and adenopituitary in compensatory reactions at blood circulation insufficiency, 19:19801 (IA;UA;In Ukrainian)

Alfven Waves
Alpha particle effect on global MHD modes, 19:20325 (IA;XA)
Alpha Particles
Alpha particles confinement in presence of magnetic ripple and MHD perturbations, 19:20324 (IA;XA)
Effect of stochastic damping resonance wave packet on energetic alpha particle transport, 19:20302 (R;CN;In Chinese)
Evolution of α particle distribution in burning tokamaks including energy dependent α transport effects, 19:20322 (IA;XA)
Nonlocal interaction of fast magnetosonic waves with alpha particles in tokamaks, 19:20335 (IA;XA)
Simulation of fusion α-component in a tokamak with He^3 plasma and high power NBL, 19:20337 (IA;XA)
The effect of X-points on alpha particle orbits in tokamak configurations, 19:20347 (IA;XA)
Ballooning Instability
Excitation of magnetohydrodynamic modes by energetic trapped ions in reactive and dissipative systems, 19:20327 (IA;XA)
Control Systems
US-JAPAN Workshop on Plasma Profile Control for High Power Performance Operation and Non-inductive Current Drive: Foreign trip report, January 30–February 4, 1994, 19:20457 (R;US)
Drift Instability
Excitation of magnetohydrodynamic modes by energetic trapped ions in reactive and dissipative systems, 19:20327 (IA;XA)
Kink Instability
Alpha particle effect on global MHD modes, 19:20325 (IA;XA)
Magnetic Field Configurations
ULQ operation and evolution to RFP in SWIP-RFP(M), 19:20434 (IA;XA)
Magnetoacoustic Waves
Excitation of fast magneto-acoustic waves in unhomogeneous plasma of a large size tokamak., 19:20414 (R;UA;In Russian)
Magnetohydrodynamics
Theory of MHD instabilities resonantly excited by energetic particles in tokamaks, 19:20376 (IA;AU)
Non-Inductive Current Drive
Current drive information from measurements of the steady and high frequency magnetic fields in the toroidal device <j-tilde x b-tilde> RYTHMAC, 19:20374 (IA;AU)
US-JAPAN Workshop on Plasma Profile Control for High Power Performance Operation and Non-inductive Current Drive: Foreign trip report, January 30–February 4, 1994, 19:20457 (R;US)
Particle Losses
Effect of up-down asymmetry on ripple transport in stellarators and tokamaks, 19:20361 (IA;AU)
Plasma Diagnostics
Applications of optical fiber in spectroscopic plasma diagnostics, 19:20311 (IA;XA)
Plasma Radial Profiles
On aspects of burn/profile control, 19:20320 (IA;XA)
Rotational Transform
ULQ operation and evolution to RFP in SWIP-RFP(M), 19:20434 (IA;XA)
Superconducting Magnets
Workshop on effects of chromium coating on Nb_3Sn superconductor strand: Proceedings, 19:20431 (R;US)
Thermonuclear Ignition
Evolution of α particle distribution in burning tokamaks including energy dependent α transport effects, 19:20322 (IA;XA)
Physics basis for compact ignition experiments, 19:20314 (IA;XA)
Toroidal Configuration
Toroidal plasma deposition source, 19:20444 (IA;AU)
TOKAMAK FUSION TEST REACTOR

UMTRA project water sampling and analysis plan, Spook, Wyoming, 19:18213 (R;US)

X

X RADIATION
See also SOFT X RADIATION
Guiding hard x rays with glass polycapillary fiber, 19:19932 (R;US)
X-RAY DETECTION
Automatic acquisition and management system for NaI(Tl) spectra, 19:19836 (R;BE)
X-RAY DIFFRACTION
A gradient method for anomalous small-angle x-ray scattering, 19:19286 (R;US)
X-RAY FLUORESCENCE ANALYSIS
Proceedings of the CTU seminar 94. Pt. C, 19:20496 (R;CZ)
X-RAY SOURCES
Calibration of soft high power pulses X-ray source by TL dosemeters and other SXR dosimetric methods, 19:18297 (RA;CZ)
X-RAY SPECTROMETERS
Alignment and experiment of the HL-1 X-ray bent-crystal spectrometer, 19:19438 (R;CN;In Chinese)
X-ray and gamma-ray spectrometry systems developed at the Nuclear Research Institute at Rez, 19:19459 (RA;CZ)
X-RAY SPECTROSCOPY
X-ray and Γ-ray spectroscopy of solids under pressure: Annual technical progress report, November 1993–October 1994, 19:19093 (R;US)
XENON
Thermal diffusion development design of experiments, 19:18286 (R;US)
Thermal diffusion development design of main equipment, 19:18287 (R;US)
Two-photon photoemission and the dynamics of electrons at interfaces, 19:19149 (R;US)
XENON 129 REACTIONS
Fragmentation of hot nuclear systems formed in Xe-induced reactions at E_{beam}=60 MeV/nucleon, 19:20218 (R;US)
XENON 136 TARGET
Unexpected features of reactions between very heavy ions at intermediate bombarding energies, 19:20206 (IA;RU)
XENON ISOTOPES
A review of selected aspects of the effect of water vapor on fission gas release from uranium oxycarbide, 19:18521 (R;US)
XI BARYONS
The cascade-deuteron system, 19:20050 (R;US)

Y

Y-12 PLANT
Federal and state regulatory requirements for the D&D of the Alpha-4 Building, Y-12 Plant, Oak Ridge, Tennessee, 19:18179 (R;US)
Testing of the Y-12 Plant Criticality Accident Alarm System detectors at the Sandia Pulsed Reactor Facility, 19:18811 (R;US)
YEARS LIVING RADIOISOTOPES

Report Number Index

The report number index consists of the alphanumeric identifiers assigned to report literature as well as patent and conference literature cited in this publication. Entries provide the abstract number; the source(s) of availability of the document; the GPO file prefix for GPO depository library documents; the order number for OSTI and NTIS report ordering purposes; and, if the document was distributed under the DOE distribution program, the category number is shown for paper copy (PC), microfiche (MF), or no distribution (ND). These categories are included to assist DOE librarians in responding to requests for reports in their collections. The index also lists secondary numbers, with the corresponding abstract numbers and cross-references to other identifying numbers.

Report Number	*Abstract Number*	*Source of Availability*	*GPO Dep.*	*Order Number*	*Distribution Category*

ORDER FORM

DOE and DOE Contractors: Fill in Parts I, II, and IV. **Others:** Fill in Parts I, III, and IV. Mark appropriate blanks in Part IV to indicate quantity and form (microfiche or paper copy).

I. SHIPPING AND PAYMENT INFORMATION

Ordering Address

Name _____ Telephone _____

Address _____

City _____ State _____ Zip _____

Shipping Address (if different from above)

Name _____

Address _____

City _____ State _____ Zip _____

_____

SIGNATURE (Required to validate ALL orders)

II. OSTI ORDERS (DOE and DOE contractors can order from OSTI.)

☐ Charge OSTI deposit account no. _____

☐ Charge to my ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

Mail orders to: U.S. Department of Energy
Office of Scientific and Technical Information
P.O. Box 62
Oak Ridge, TN 37831

III. NTIS ORDERS

☐ Charge NTIS deposit account no. _____

☐ Check/Money Order enclosed for $ _____

☐ Charge to my ☐ American Express ☐ VISA ☐ Mastercard

_____ _____

Account Number **Card expiration date**

☐ Ship and Bill (see below for restrictions) _ _ _ _ _ _ _ _ _

Employer identification number (9 digits) —

Purchase Order number _____

Phone number of billing office _____
(Required for Ship & Bill orders)

Ship & Bill service is restricted to North American business locations for an extra $7.50 per order (or per Custom Search). The business' employer identification number plus the phone number of the office paying the bill are required to process these requests. A late payment charge will be applied to billings more than 30 days overdue. Prepaying, using an NTIS Deposit Account or a charge account, speeds order processing. Be sure payment and order are sent together. Checks, payable to NTIS, must be in U.S. dollars.

Mail orders to: U.S. Department of Commerce
Technology Administration
National Technical Information Service
Springfield, VA 22161

IF NO METHOD OF PAYMENT IS INDICATED, YOUR ORDER WILL BE RETURNED TO YOU AS A PRICE QUOTE UNPROCESSED.

IV. SELECTIONS

Order number _____ Report number _____

Abstract number (with vol., issue) _____

Federal Depository Library Program

As a result of an agreement between the U.S. Government Printing Office (GPO) and the Department of Energy, beginning in 1984 DOE reports with unlimited distribution are now included in the Federal Depository Library Program. The Regional Depository Libraries listed below receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. You may wish to ask your local library to contact a Regional Depository to help you locate specific publications, or you may contact the Regional Depository yourself. Do not send checks or orders to these libraries.
